Non-Technical summary

This report provides analysis of an area of lidar (Light Detection and Ranging) data captured in advance of the construction of the Foynes-Limerick road scheme and comprising a linear distance of c. 34 km, with a data capture width of 1 km. Using multiple visualisations, previously recorded SMR/RMP entries and scheme constraints were examined according to a pre-determined grid, and new potential archaeological features identified. These were assigned confidence scores from 1 (strong possibility of the feature being archaeological) to 3 (weak possibility of the feature being archaeological). Additionally, confidence scores of 0 (no trace of site remains) and 4 (site not suitable for comment – e.g. buildings) were assigned. In this way 140 new potential sites were identified in addition to the 158 previously recorded, a potential increase of almost 90%.

Areas considered of high archaeological potential have been highlighted, based upon clusters of monuments and archaeological features as well as on the Geological Survey of Ireland Quaternary dataset. The proposed road scheme passes through a number of areas of lake sediment, peatland and alluvium, all of which are likely to be of archaeological potential.

A series of appendices list all sites, both newly identified and pre-existing, provide a comprehensive grid-by-grid image catalogue and a brief description of what is present in each grid.

Introduction

This report outlines the querying of an area of lidar data for potential heritage assets along a c. 34 km stretch of road corridor in Co. Limerick, captured in advance of the Foynes to Limerick Road Improvement Scheme (Fig. 1).

Lidar (Light Detection and Ranging) or ALS (Airborne Laser Scan) data are airborne survey data – distance measurements captured using a time of flight laser scanner mounted on an aircraft and tightly controlled spatially using a combination of differential GPS and Inertial Measurement Unit (the latter to counteract movement of the aircraft in flight). These are expressed as elevation data and comprise millions of x,y,z points which are usually interpolated to create a surface – a Digital Elevation Model or DEM. The first surface struck by each laser pulse is usually the vegetation canopy – a model made from these ‘first returns’ is called a Digital Surface Model (DSM). Conversely the last return made from each laser pulse often represents the ground; a model made from these last returns is known as a Digital Terrain Model (DTM) or ‘bare earth model’ and is usually the desired product for archaeological prospection. Lidar data can only identify features with upstanding topographic expression so can only ever be one of a suite of methods used in archaeological prospection.

The density of measurements depends upon a range of factors, both logistical and also practical, with point spacing usually ranging between one point per 2m² to over 50 points per square metre. At higher point density (‘posting’) the number of ground points, even beneath dense vegetation can be increased, allowing virtual removal of vegetation and identification of archaeological features beneath it. The current dataset was captured at an average point density of 16 points per metre and filtered (i.e. the vegetation removed) using the commercial software package TerraScan by Bluesky Ireland who flew the data. This was provided as a Digital Terrain Model gridded 0.5 m (i.e. four points per metre). While it is possible to work with the full 16 point per metre dataset, this would add little additional value: the value of additional resolution is primarily at the data capture stage where increased resolution = better vegetation penetration. In the current survey this is very clearly demonstrated: many of the ringforts recorded here are beneath dense vegetation, and data capture at less than that undertaken would have produced very poor results.

As lidar data represent elevation alone they require additional visualisation methods to maximise their potential. These are increasingly diverse and no one method alone is ideal. As such, a range of methods should be utilised in any such study (Crutchley 2010; Challis et al. 2011).

- Single Direction Hillshading represents the simplest visualisation of all, lighting the surface from an azimuth (light direction) and elevation of the operator’s choosing. The elevation value is usually kept low (10 degrees) to maximise the potential of identifying very low profile earthworks, while the azimuth is varied. The main weakness of this approach is that some features will be visible from one azimuth but invisible from another.
- Multi-direction hillshading attempts to overcome the weakness of conventional hillshading by producing a composite image of a number of (often 16) hillshades. This eliminates issues of features ‘vanishing’ from certain azimuths; however, some subtle features can be ‘washed out’ using this method alone.
- SkyView Factor (Zakšek et al. 2011) assesses the visibility of sky from each pixel within the elevation dataset, assigning a value between 0 (no sky visible) and 1 (all sky visible). This is

particularly valuable in highlighting abrupt changes in elevation where adjacent pixels can go from very low to very high number (e.g. walls or sharp-edged pits). It is ineffectual in the case of low, subtle earthworks as the variation in how much sky is visible is negligible.

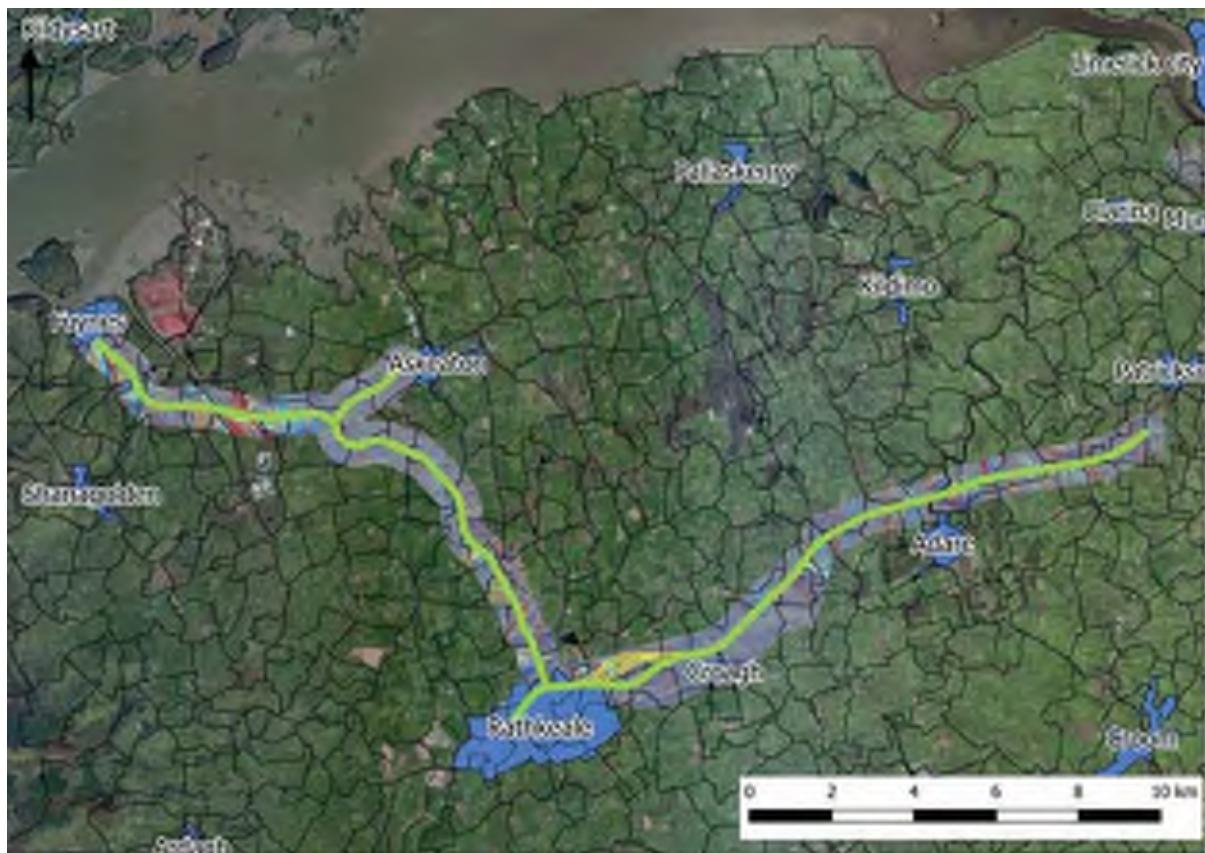

Fig. 1. Road corridor from Foynes to Limerick. 100 m route corridor marked in green. Area of lidar capture shown as 16-direction hillshade, urban centres in blue.

- Local Relief Modelling (trend removal – cf. Hesse 2010). Given that archaeological features essentially represent deviation from the underlying topographic trend, it is possible to enhance them by looking at this deviation. There are a number of trend removal methods which essentially work along the same lines: the DEM is smoothed to produce an underlying trend raster. This is then subtracted from the original, unsmoothed surface providing a map of deviation from the underlying topography. Trend removal methods are especially useful in areas with significant topographic variation in that they remove the ‘shadow’ issues which can be problematic hillshading/SkyView factor. By convention the trend surface is displayed using a blue (low relief) to red (high relief) colour ramp.

Using the package RVT (Relief Visualisation Toolbox v. 1.3 - <http://iaps.zrc-sazu.si/en/rvt#v>) all of these visualisations can be batch-processed ready for incorporation into a GIS.

Frequently the best results can be achieved using a combination of methods and transparencies. All of the images included in this report are combinations of either 16-direction hillshade or SkyView

Factor overlain with a semi-transparent trend surface (60% transparency). This is felt to provide the greatest level of visible detail. Parameters used are as follows:

- SkyView Factor. Calculated using default settings in RVT (16 search directions, 10 pixel radius). Minimum/maximum between 0.94-0.99
- 16-direction hillshade. Calculated using default settings in RVT with the exception of elevation set to 20 degrees.
- Simple LRM. Calculated using default settings in RVT (20 pixel trend assessment). Displayed at a transparency of between 60 and 70% as considered appropriate.

Profile images were created using GlobalMapper v.13.2. Where dimensions of an enclosure are stated these are internal – from inner edge of bank to inner edge.

All analyses have been undertaken using the open-source package QGIS2.18.6. All tiled data (including aerial imagery and 6 inch mapping) have been compiled into Virtual Raster catalogues (.vrt files), essentially treating them as single large raster files from the perspective of colour ramps etc. It should be noted that there are slight inconsistencies within some of these data sourced: the 6 inch mapping has some small gaps between tiles, a feature of the legacy dataset, and the lidar data appear to have been acquired over a short time window, meaning that one or two tiles have a slightly different appearance. This does not impact on their utility for prospection.

A 1 km grid was placed over the dataset, resulting in 76 grid squares. Each of these has been assessed using the range of visualisations discussed above with the exception of a single-direction hillshade, as this adds little value beyond the combination of LRM + SVF + 16 direction hillshade. A point-based shapefile was created to include

- Code number by grid;
- SMR/RMP/RPS/NIAH no. (if relevant)
- Scheme constraint number (if relevant)
- ITM co-ordinates;
- Barony;
- Townland;
- Civil Parish;
- Grid (i.e. which arbitrary grid square the site resides in)
- Corridor (i.e. whether it lies within the 100m corridor)
- Site dimensions (where appropriate)
- Degree of confidence on a three point scale, with 1 = Highly likely to be archaeologically significant to 3 = Possibly of archaeological significance. In the case of previously recorded sites the confidence scale has been expanded to include 0 = sites which have no topographic signature or have been destroyed and 4 = sites for which these data provide no additional useful information (e.g. upstanding buildings).

The shapefiles were also spatially cross-referenced with previously assigned Built Heritage (BH), Cultural Heritage (CH) and Demesne (DL) categories, so within the shapefile each point can be queried as to whether it lies within any of these areas

Within this report a number of categories of site will be used, some very broad, some much more descriptive. These include:

- Field system: An organised grouping of former field boundaries. In some cases these may represent deserted settlement
- Deserted settlement: A more organised grouping of field boundaries, with some signs of nucleation and possibly buildings
- Settlement cluster: A small group of enclosures perhaps relating to one or two farmsteads.
- Enclosure: The broadest category, encompassing everything from barrows to moated sites. Where the character of the enclosure is more suggestive a sub-classification will be suggested
- Ringfort: Small enclosures (25-40 m), in particular those with external ditches are most likely to belong in this category.
- Mound: Mounds, unless they are large ones, are one of the least satisfactory elements of lidar-based prospection. Modern mounds within agricultural land are frequent and difficult to discern from the archaeological.
- Platform: Often raised, rectangular areas, likely to represent demolished and levelled building remains.

The distinction between these categories is often a matter of personal experience with such datasets. This is also the case with the existing RMP data. As such there is a degree of fluidity, especially between the ringfort and enclosure classes.

Physical character of the area

The road corridor stretches from what are essentially estuarine deposits to the west, through an area of outcropping limestone, with the majority of the corridor lying on glacial sediments, especially limestone-derived tills (Fig. 2). Rock outcrops in a number of locations, and there are some patches of alluvium also, in particular the area north of Adare. There are several areas of peat and lake sediment impacted by the road corridor; these must be regarded as areas of high archaeological potential, especially given the number of fulachtaí fia encountered in such landscapes during the construction of the Bord Gáis Pipeline to the West (cf. Grogan et al. 2007). While in the case of lake sediments the shoreline might be a particular focus, without better understanding the history of terrestrialisation it is possible that these remained as low-lying wet areas for many hundreds or even thousands of years. In particular three areas are worthy of note:

- The area immediately north of Rathkeale (Fig. 3; 4)
- The low-lying area of marl in Feenagh/Nantan townlands (Fig. 5)
- The area of cut peat at Ballybronoge South (Fig. 6)

Recorded archaeology and new survey

There are 158 recorded monuments (including 5 redundant records) within the proposed 1 km route corridor (Fig. 7; Table 1). These are dominated by early medieval sites, including 40 ringforts, 4 cashels, and one crannóg. A number of the 34 recorded enclosures are likely to be additional ringforts. Bronze Age activity is also well-represented in the area, with 21 fulachtaí fia, 2 burnt mounds and 2 standing stones recorded. Later medieval activity is represented by tower houses (3) and unclassified castles (2), with some industrial features (4 mills). There is no obvious indication of Neolithic presence in the area, although the possibility remains that some of the enclosures could be prehistoric in nature.

A similar distribution is also reflected in the 'new' sites (Fig. 8; Table 2).

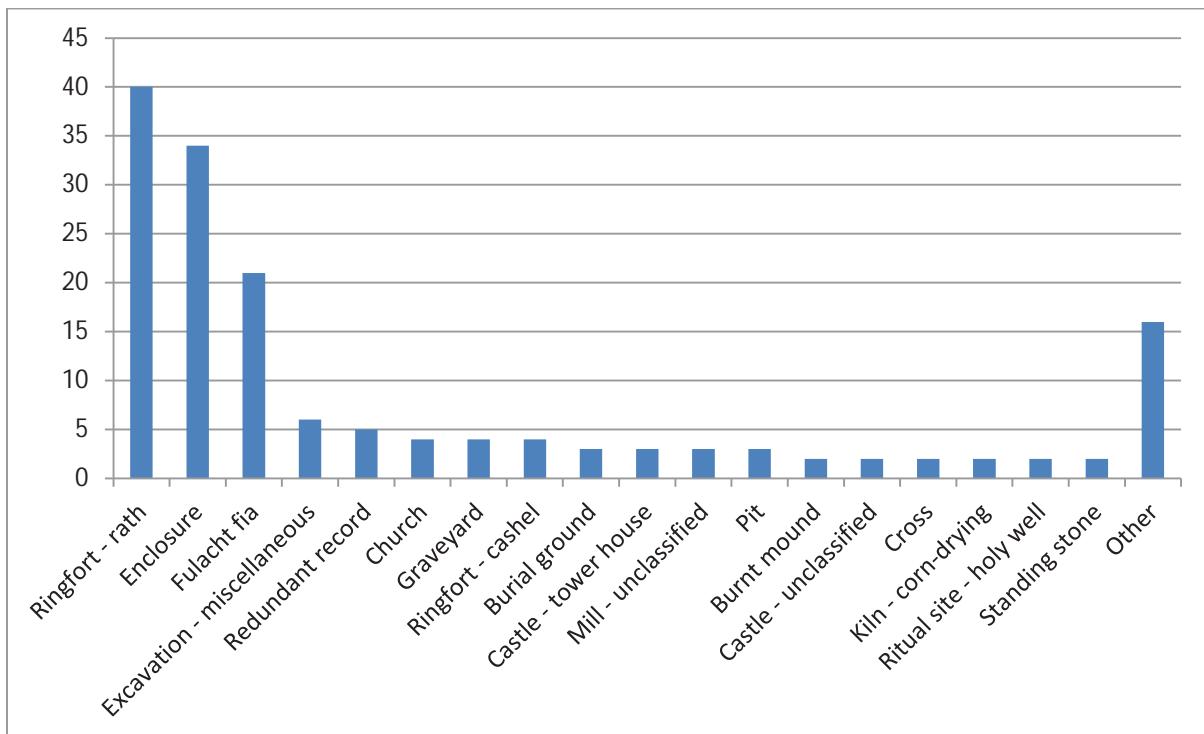

Fig. 7. Previously recorded monuments within the proposed corridor

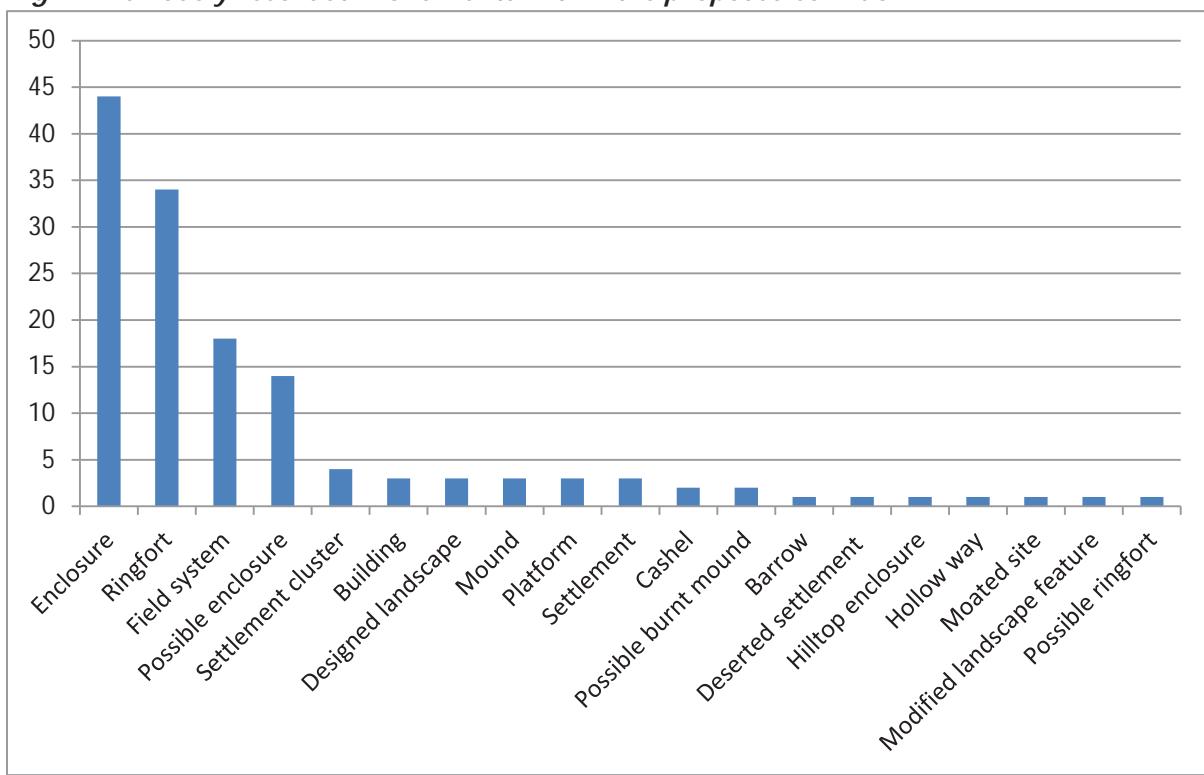

Fig. 8. Newly identified 'Potential Archaeological Features' within the 1km route corridor.

140 new potential features have been recorded within the area of data provided. These are dominated by enclosures (44) and ringforts (34). 69 of the potential sites identified are considered to be strong candidates, 49 moderate candidates and 22 only weak candidate sites. It is likely that the

Bronze Age component is under-represented here as the most common recorded site type, fulachtaí fia, are generally difficult to spot from lidar data owing to their small size. As in any survey of this type there features identified are only of potential archaeological interest and require further archaeological investigation to ascertain their significance. Also, given that lidar is only useful in the identification of sites with topographic expression, there are likely to be many sites which are not identified during the current survey.

Table 1. Sites listed on the Sites and Monuments Record (SMR) and/or Record of Monuments and Places (RMP) within the 1 km corridor

Class	Count

Possible ringfort	1

Sites impacted by the 100 m road corridor

A total of 49 sites have been recorded within the 100 m lidar corridor. These comprise 26 previously recorded sites and 23 newly identified potential features (Table 3). Of the 25 previously identified sites 2 are designated as 'redundant records', 10 present no remaining topographic signature (but may be preserved as sub-surface remains), 8 comprise sites excavated in previous infrastructural projects and one is reported as of no archaeological significance. In the 'Archaeological Heritage' layer supplied with the data, the standing stone LI020-156---- appears to lie within the road corridor. However, inspection of the RMP reveals that this is marked in wrong place on the data provided.

A single NIAH site, the railway station at Rathkeale (NIAH Registration number 21831013), currently the Palatine Heritage Centre

<http://www.buildingofireland.ie/niah/search.jsp?type=record&county=LC®no=21831013>

32 Previously identified Cultural Heritage (CH) constraints, 5 Built Heritage (BH) constraints and 9 Demesne (DL) constraints are also impacted by the corridor to a greater or lesser degree (see Table 4). The majority of these have no overlap with sites identified in the lidar survey; however, in some cases the lidar survey has better defined the extent of the asset (CH4; CH7) or demonstrate the extent of archaeological remains within the impacted demesnes (e.g. DL12). These are included

within the image database and labelled with their respective constraint identifiers. Confidence scores have been assigned to these also, following the same criteria outlined above.

Of the 23 newly identified sites within the 100 m corridor, 10 are considered strong candidates, 3 of which are classified as ringforts, 2 as enclosures, 3 as field systems with one each as hilltop enclosure and moated site. A further 7 are classified as moderate candidates (with the exception of one settlement these are all ringforts or enclosures) with the remaining 6 as weak candidates. Overall 15 potential new ringforts or enclosures have been identified within the 100 m corridor (including one moated site and one hilltop enclosure), 6 settlements or associated field systems and one mound.

Table 3. Sites and potential sites impacted by the 100 m road corridor. CH = Cultural Heritage constraint; BH = Built Heritage constraint; DL = Demesne constraint. Confidence scale: 0 = Site not visible/destroyed; 1 = high confidence; 2 = medium confidence; 3 = low confidence; 4 = not appropriate for comment using these data.

Table 4. Previously recorded constraints (CH, BH or DL) impacted by the 100 m road corridor. The Easting and Northing here represent centroids of the polygons supplied. * denotes that the centroid lies beyond the grid system implemented and the nearest grid square is stated. Confidence scale: 0 = Site not visible/destroyed; 1 = high confidence; 2 = medium confidence; 3 = low confidence; 4 = not appropriate for comment using these data. Where outstanding buildings/remains are described a confidence score of 1 is automatically assigned.

Discussion

Analysis of lidar data from the proposed Foyne-Limerick road scheme has enabled the identification of 140 potential new archaeological features, including 68 strong candidates. Analysis of lidar datasets such as this begins with two questions:

1. Is it archaeology?
2. If it is archaeology, what type of site is it?

Lidar data only records topographic variation, and classification of features relies on the experience and background knowledge of the interpreter. Classification of archaeological features from form alone is problematic, especially in Ireland where circular enclosure was commonplace from the late Neolithic through to at least the early medieval period, covering henges, hillforts, cashels and ringforts. In this sense the most straightforward analysis would list all such features as 'enclosure' and make no attempt at further classification. Given the prevailing archaeology of the study area (early medieval settlement in the form of ringforts) it is likely that many of the enclosures identified fall within this category. It is not always clear from topographic surveys whether sites are ditched internally (i.e. hengiform) or externally (in the manner of ringforts).

In keeping with the previously recorded archaeology in the area, the majority of new potential sites are likely to be ringforts. Close comparison is difficult owing to difficulties in classification, meaning that many sites are generically labelled 'enclosure' and hence not really assignable to a particular time period. As might be expected, some of the more upland locations (i.e. likely to have been exposed to less intensive agricultural improvement) preserve the greatest concentration of potential sites. This can be seen for example in Grids 5, 6 and 16. Conversely, low-lying areas which are likely to have been subject to more agricultural improvements (e.g. Grid 12, 13, 62) present few new sites with topographic signatures, and some existing sites are preserved only as very low profile monuments.

Several possible Bronze Age features are present, including the large oval enclosure identified as CH6 (Site 16.3 in this study) and a probable large barrow (Site 6.3). A number of previously recorded Bronze Age sites were only found during previous construction projects (e.g. in pipeline laying). This is likely to mean that Bronze Age monuments will be under-represented in this study and that significant numbers could be found at the excavation stage (especially fulachaí fia). Two sites have been tentatively identified as fulachaí fia but the small size of such monuments makes them difficult to identify through lidar survey. Other Bronze Age features such as pits are likely to have left no topographic signature at all and are therefore invisible to lidar.

A number of field systems have also been identified in the lidar survey. Field systems are notoriously difficult to date by form alone. While some (e.g. Site 5.4) are in close proximity to early medieval enclosures this is not any guarantee that the field system has any connection to the enclosures. In other cases (e.g. 39.1; 58.1) the field systems appear more closely related to deserted settlement-type land enclosure – generally represented by small, rectangular fields often on a single alignment. These represent a croft-toft arrangement and might be expected to have house platforms parallel to the settlement long axis.

9 sites previously identified within the SMR/RMP as 'Ringfort – rath' have been awarded a confidence score of 0, meaning they are effectively levelled. In addition, 13 'Enclosure' sites are also awarded the same confidence score. This represents a significant loss of above ground archaeological remains since the first edition OS maps were compiled in the mid C19th.

Sites and areas of potentially high significance

A number of areas of high archaeological potential have been highlighted based on complexes of enclosures/field boundaries (see Figs 9-24 below). Additionally, 9 further sites of significance have been highlighted. These can be cross-referenced with the image catalogue in Appendix 4.

- **Area around Site 2.3 (Fig. 9).** Numerous field boundaries and possible enclosure elements.
- **Wider area of CH4 and BH1 (Fig. 10).** 100 m corridor catches the western portion but avoids much of the obvious archaeology. The field systems here (Site 5.4) may well have a prehistoric origin. This also incorporates BH1, newly identified enclosure 6.1 and ringforts LI010-010, LI010-011 and LI010-012 (AH1).
- **Wider area of CH43 (Fig. 11).** This incorporates an extensive field system (15.3) much of which lies under woodland, and includes the ringforts 15.2, 15.4 and 15.6. **The northern part of this area is impacted by the 100 m corridor** but the archaeological landscape extends for another c. 400m south.
- **Area north of LI019-048 (Fig. 12).** Elongated area of enclosures and field systems.
- **The area around BH4 and CH11 (Fig. 13)** also includes enclosures 18.3 (which lies south of the corridor) and field system 18.5. **The northern part of field system 18.5 is impacted by the 100m corridor**
- **Area around 19.3 and 24.1 (Fig. 14).** Elements of field systems in the hinterland of LI019-058.
- **LI019-064 large ringfort (Fig. 15).** At least bivallate and with central platform measuring c. 37m diameter. Suggestion of associated rectangular enclosure to the east, perhaps suggesting later fortification of this site. **Northern edge of site likely to be impacted by 100m corridor.**
- **Area around 26.1-2 (Fig. 16).** Three enclosures and some field boundaries in this location along existing pipeline route.
- **Area around LI020-056001 and LI010-056002 (Fig. 17).** Complex area of field boundaries and enclosures. **Likely to represent a significant medieval settlement.**
- **The area of DL12 (Fig. 18).** Incorporating cashel LI020-057, ringforts 52.3 and 52.4, field system 53.2 and enclosure 57.1. This is a significant cluster of probable early medieval monuments preserved within a former demesne landscape. **Northeast portion impacted by 100m road corridor.**
- **Designed landscape 76.1, Glebe House, Castlematrix (Fig. 19).**
- **Field systems associated with LI020-159 (BH 39; AH119) (Fig. 20).**
- **Designed landscape associated with Clonshire House (49.1). Fig. 21.**
- **The area around BH28, including 49.3 Ringfort and 49.4 Mound (Fig. 23)** is of high archaeological potential and is significantly impacted by the 100 m corridor **Significant complex of field boundaries including 2 potential monuments (Fig. 22).**

- Area of DL18 and eastwards (Fig. 23), including CH96. Incorporating deserted settlement LI021-025001 and burial ground LI021-25002. Settlement extends eastward beyond road (33.2) and possible as far as field system 33.1. This represents an extensive later medieval settlement complex with elements of early medieval enclosure incorporated. Enclosure 32.1 may represent a previously unrecorded ecclesiastical site. There is no indication of remains north of the present road corridor.
- The area of 16.3 Hilltop Enclosure (CH6 and CH7) (Fig. 24) has significant archaeological potential and incorporates a possible cashel (16.2) and extensive field system 16.1. This may be connected to the field systems around CH43 above. The northern part of this area is impacted by the 100m corridor

Individual sites of significance

- Possible deserted settlement 58.1, comprising a series of plots divided east-west.
- Barrow 6.3. A substantial bowl barrow, c. 56 m diameter. Central area partially overlain by possible church (townland is named 'Churchfield')
- Enclosure 17.1 may represent a large and previously undescribed platform rath, although it is difficult to categorise from its topographic appearance alone. 59 x 45 m
- LI020-113 crannog (Grid 63; AH95). This site appears to be exceptionally well-preserved as a platform, c. 35 m diameter within the infilled lake basin of Rathkeale. Road corridor passes within 150 m of site to NE.
- Conjoined enclosures LI021-011001 (AH62) and LI021-011002 (AH62) lie within the corridor extents (although outside of the 100 m corridor). Such conjoined enclosures are uncommon and poorly understood.
- Enclosures 14.3 and 14.4 are both likely to be impacted by the 100 m road corridor
- Settlement 39.1 appears to extend northeastwards beneath the 100 m road corridor
- Site LI021-015 (AH69) is closer to the corridor than planned owing to being incorrectly placed in the RMP and will be impacted by the 100m road corridor.
- The large moated site 38.2 is potentially significant.

Fig. 9. Area around Site 2.3. Numerous field boundaries and possible enclosure elements.

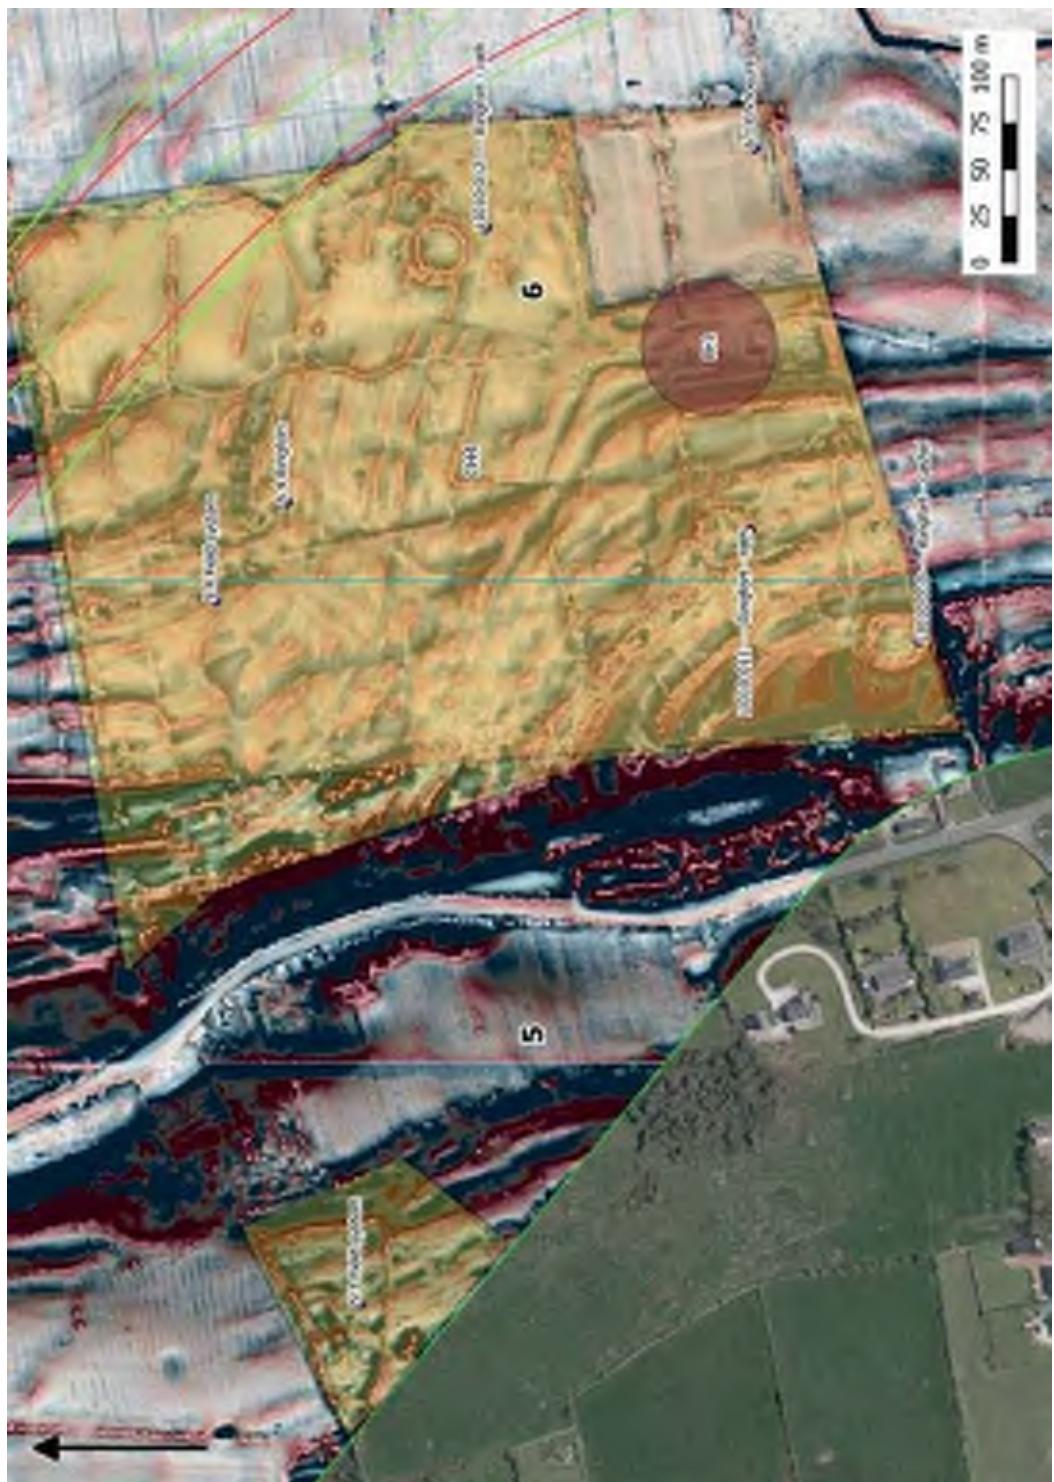

Fig. 10. Area around Site 5.4. This overlaps with previously identified CH4 and includes previously identified BH1. Also field systems around site 5.3, which are separated from the former by a valley but are of similar type.

Fig. 11. Area around ringfort 15.6. This is an extensive complex of field boundaries including several enclosure elements. Previously identified CH43 underestimates the overall area. Further fieldsystems at 15.5 may be connected.

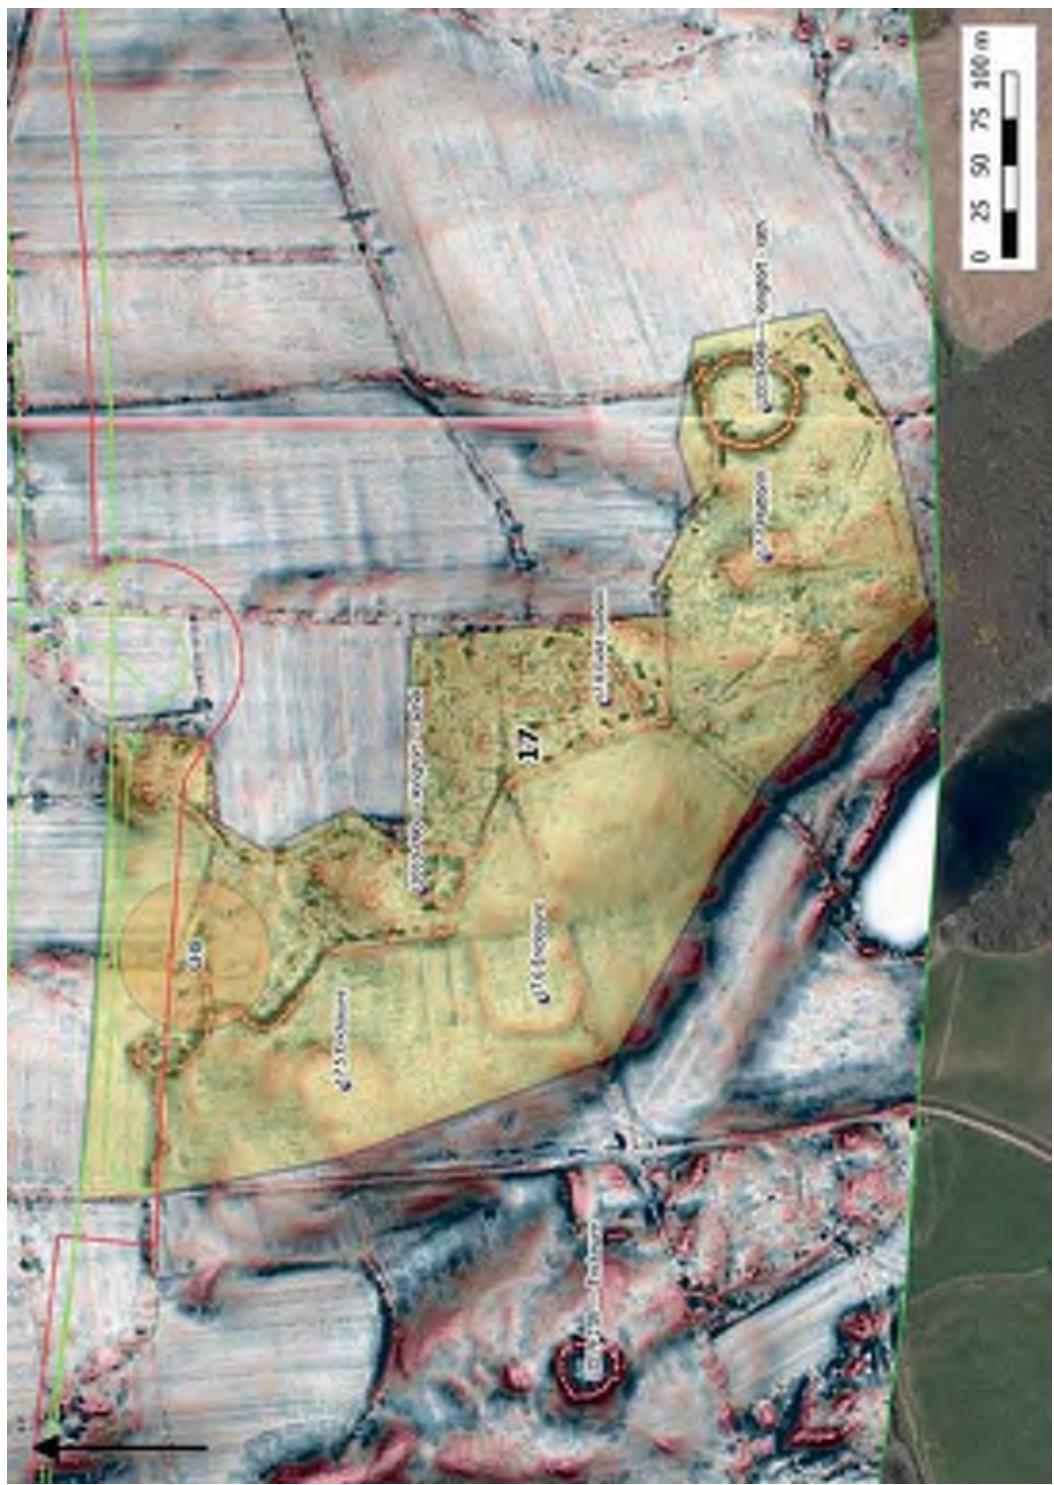

Fig. 12. Area north of LI019-048. Elongated area of enclosures and field systems. SVF over LRM, scheme orthophotography baselayer.

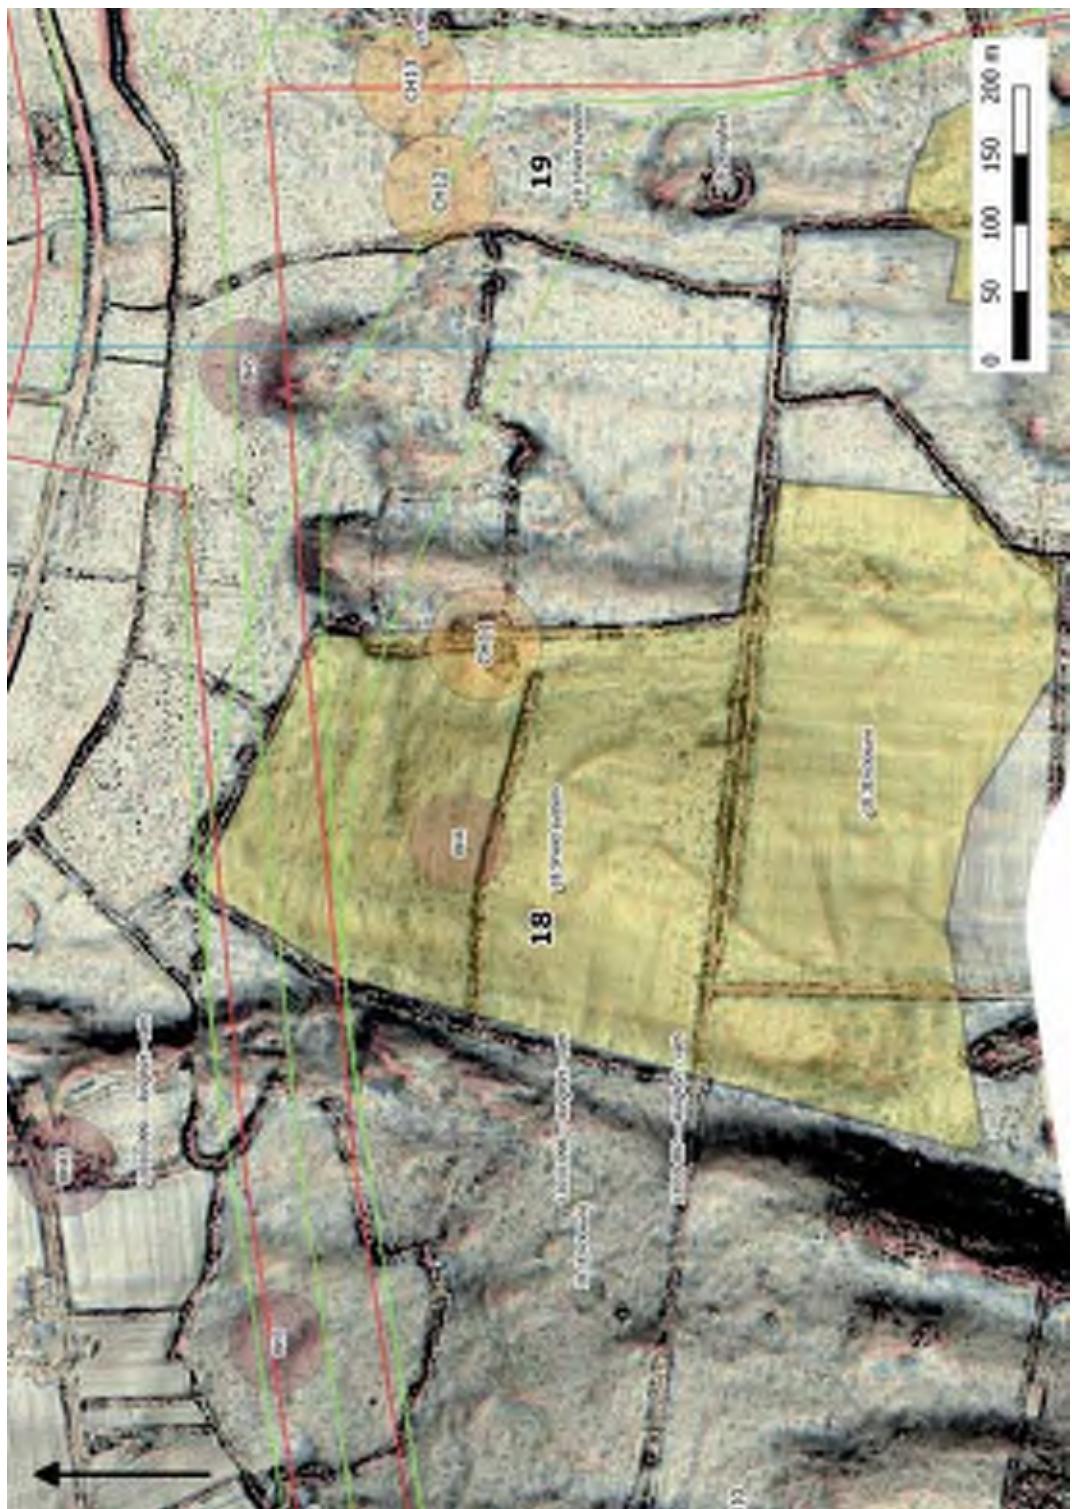

Fig. 13. Area around 18.3 and 18.5, including BH4 and CH11. Complex of field boundaries with some enclosure. SVF over LRM, scheme orthophotography baselayer.

Fig. 14. Area around 19.3 and 24.1. Elements of field systems in the hinterland of LI019-058. SVF over LRM, scheme orthophotography baselayer.

Fig. 15. LI019-064. Area around large enclosure including possible rectangular enclosure elements to the east. SVF over LRM.

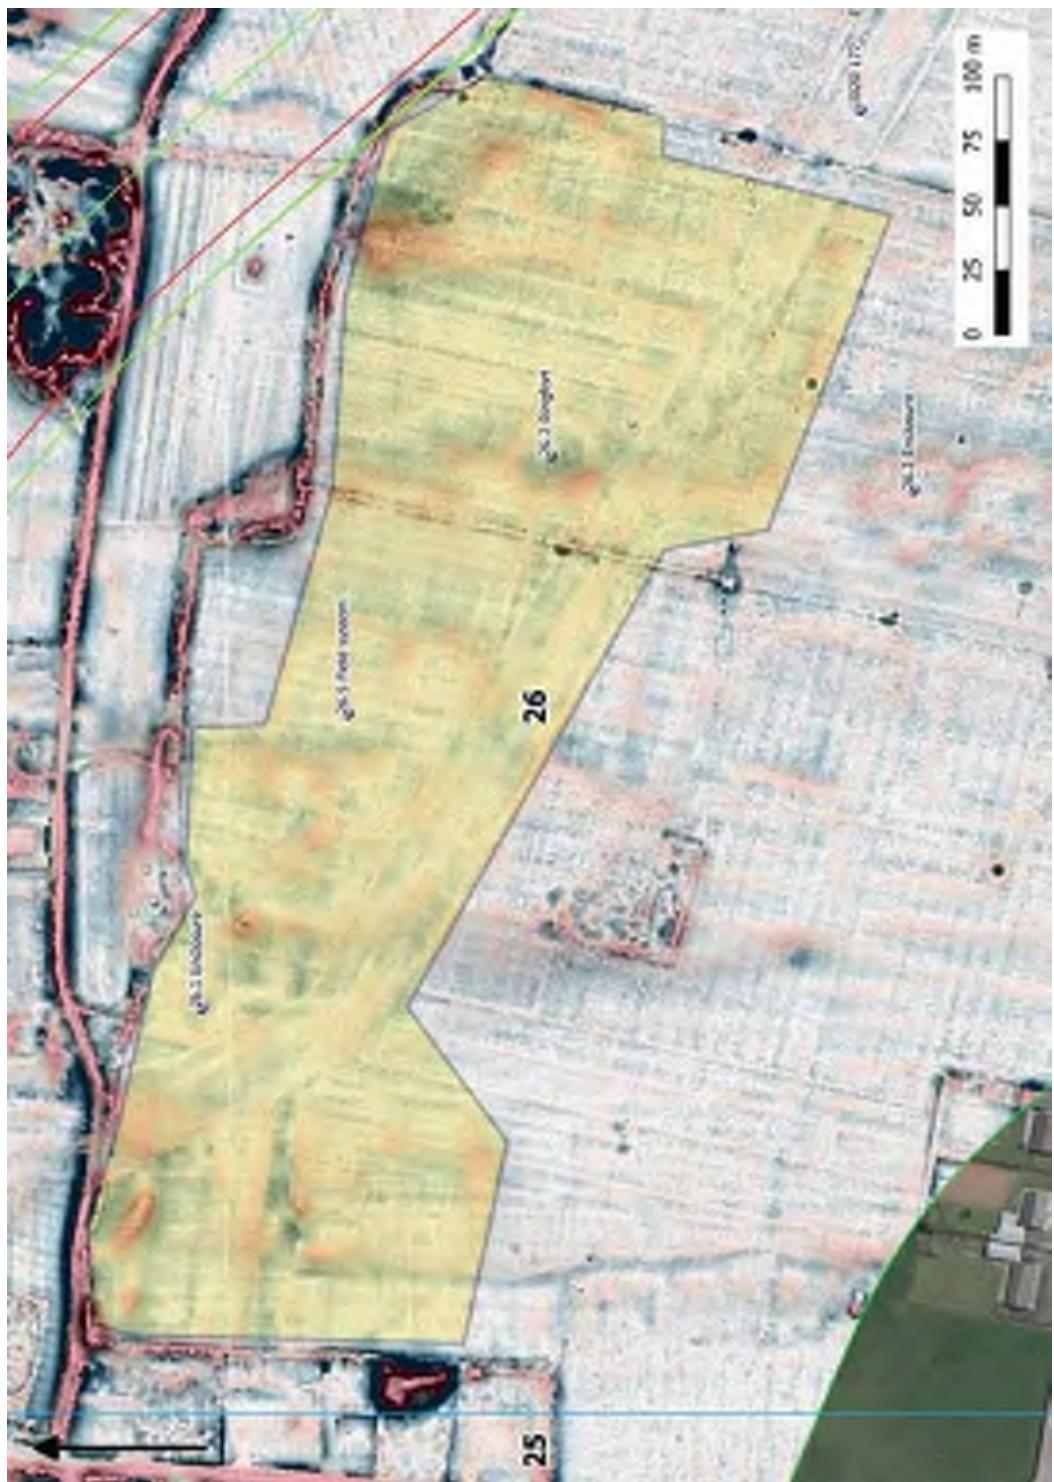

Fig. 16. Area around 26.1-2. Three enclosures and some field boundaries in this location along existing pipeline route. SVF over LRM, scheme orthophotography baselayer.

Fig. 17. Area around LI020-056001 and LI020-056002. Complex area of field boundaries and enclosures. Likely to represent a significant medieval settlement. SVF over LRM, scheme orthophotography baselayer.

Fig. 18. Area around L1020-057. Including four additional enclosures and elements of field systems. SVF over LRM, scheme orthophotography baselayer.

Fig. 19. Designed landscape 76.1. SVF over LRM, scheme orthophotography baselayer.

Fig. 20. Field systems associated with LI020-159 (BH 39; AH119). SVF over LRM, scheme orthophotography baselayer.

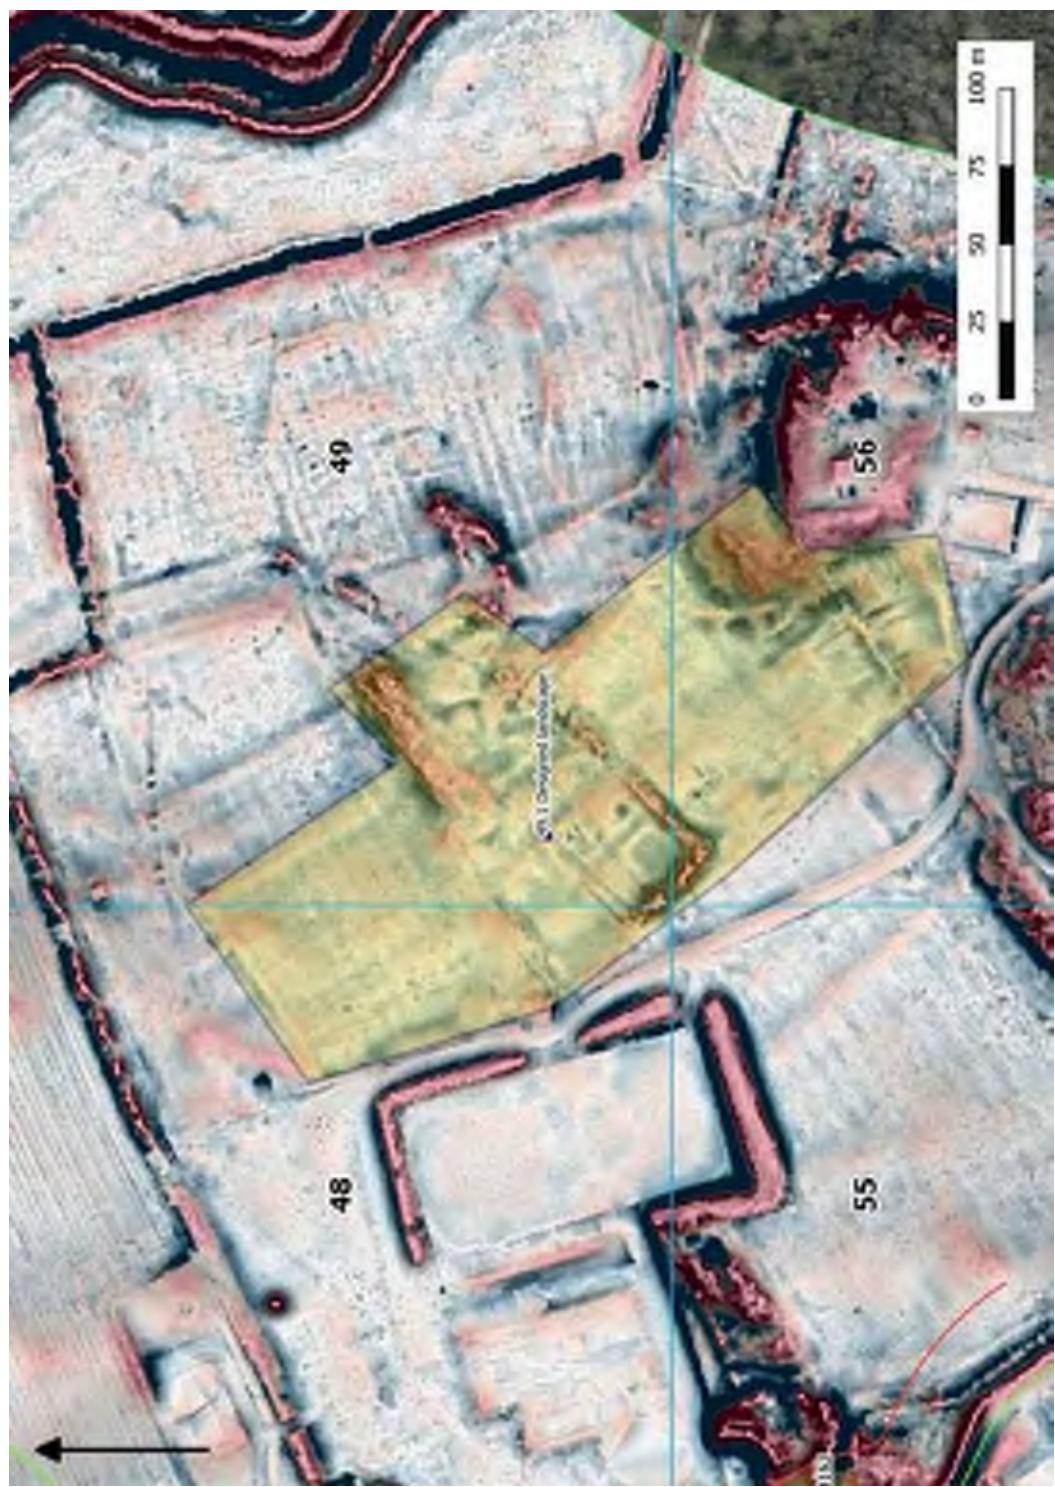

Fig. 21. Designed landscape associated with Clonsshire House. SVF over LRM, scheme orthophotography baselayer.

Fig. 22. Area around enclosure 49.3 and mound 49.4. Significant complex of field boundaries including 2 potential monuments. SVF over LRM.

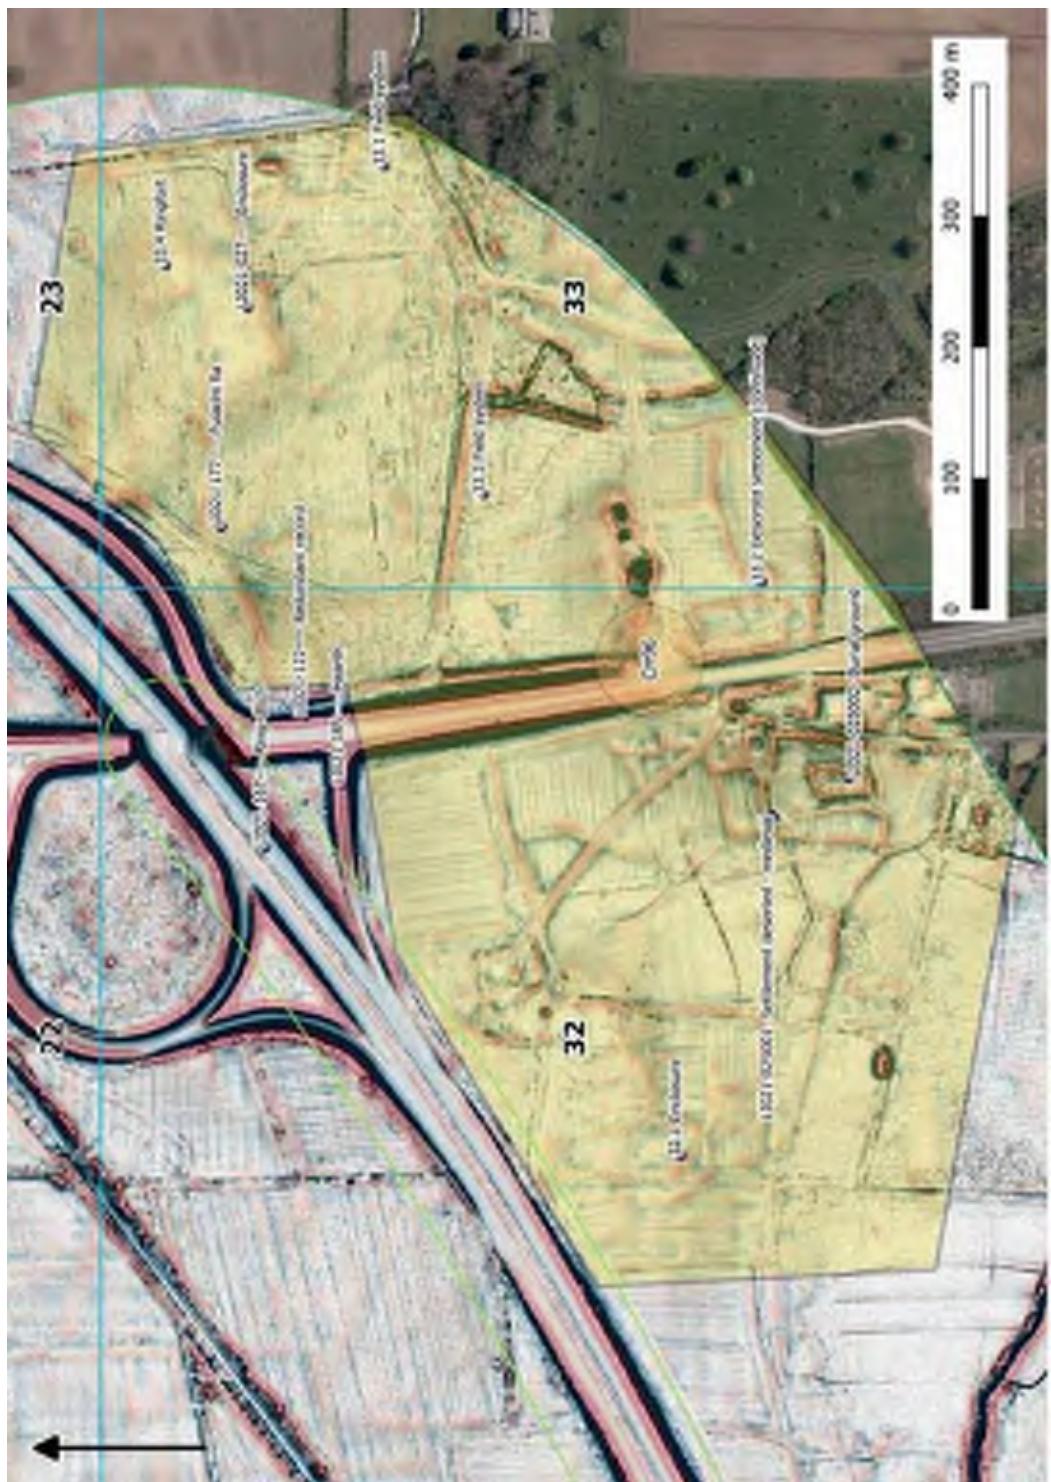

Fig. 23. Settlements at Attyflin. Significant medieval habitation including recorded cílín and possible ecclesiastical enclosure. Includes LI021-025001 and LI021-025002, LI021-177, LI021-167 (AH75) and LI021-122 (Redundant record). SWF over LRM, scheme orthophotography baselayer.

Fig. 24. The area of 16.3 Hilltop Enclosure (CH6 and CH7) has significant archaeological potential and incorporates a possible cashel (16.2) and extensive field system 16.1. This may be connected to the field systems around CH43 above. The northern part of this area is impacted by the 100m corridor.

Future Recommendations

A number of recommendations are proposed, based on the lidar prospection.

- Further survey (i.e. geophysical survey) is suggested at any site (existing or newly recognised) potentially impacted by the road corridor.
- Extreme caution is advised in areas identified as wetland environments. Previous infrastructural schemes in the area (e.g. Gas Pipeline to the West) have consistently identified monuments within these environments, especially fulachtaí fia, and it is likely that a large number of these will be encountered on this scheme.
- Some of the large areas of field systems identified are potential archaeological ‘hot spots’, especially as regards early medieval activity. Some of these are previously identified as scheme constraints, but in some cases these have been only partially defined to this point.
- The opportunity to feed back the results of geophysical survey to the lidar prospection would be very useful and allow future lidar-based prospection to be better defined. As such, all geophysical survey results should be requested as georeferenced tiff files to incorporate into the final scheme GIS.

Appendices

Appendix 1 comprises a list of all sites within the 1 km road corridor, including classification, code, townland, barony, parish, constraint numbers, grid, confidence and a brief descriptions. The range of fields presented means that there is not space to include the ITM co-ordinates within this table. However, all images can be cross-referenced to the image catalogue (Appendix 4). Where available previously excavated sites have been cross-referenced with their license number.

As part of the Limerick survey remains unpublished it is suggested that any impact on these monuments should involve additional desk-based research, in particular consulting the NMS archives. This is considered beyond the scope of the current study.

Appendix 2 comprises a ‘zoomed out’ view of the grid scheme as AP, LRM and SVF images.

Appendix 3 comprises a gridwise image catalogue, with images presented in 2-grid blocks

Appendix 4 constitutes a brief grid by grid description of each square

Appendix 5 comprises the main image catalogue. This is ordered in a grid by grid manner, with images of previously recorded sites followed within each grid square by images of newly identified potential features. In some cases additional images of constraints are placed at the beginning of this grid sections.

APPENDIX 1: LIST OF ALL SITES WITHIN THE 1KM CORRIDOR¹

¹ Sites shown in bold lie within the table lie within the 100 m corridor.

Easting	Northing	Site Type	Code/SMR	Townland	Parish	Constraining	Grid	Brief Description		Confidence
								Barrow	Ringfort	
525652	651083	Field system	1.1	Corgig	Shanid	Robertstown		1	Probable field system associated with L1010-007. 148 x 85 m	1
525914	651153	Possible enclosure	1.2	Corgig	Shanid	Robertstown		1	Possible oval enclosure, 33.9 m NE-SW, 31.4 m NW-SE. No indications on early mapping	3
525687	650823	Enclosure	1.3	Corgig	Shanid	Robertstown		1	Very low profile circular enclosure, probable ringfort. 22.4 m diameter. Not visible in AP or 6-inch mapping	2
525499	650700	Designed landscape	1.4	Corgig	Shanid	Robertstown		1	Rectangular field and raised linear bank, possibly associated with demesne of Corgig Castle. 55 x 25 m	2
526142	651201	Possible enclosure	1.5	Durnish	Shanid	Robertstown		1	Oval raised area, possibly modified natural platform. Truncated to NE by railroad. Dimensions 56.4 x 41.5 m	2
526254	651266	Enclosure	1.6	Durnish	Shanid	Robertstown		1	Long, curving bank, possibly forming SW portion of a large enclosure	3
525747	650582	Ringfort	1.7	Corgig	Shanid	Robertstown		1	Small enclosure, truncated to west by modern farm buildings. 24 m diameter	2
526311	651083	Ringfort	2.1	Durnish	Shanid	Robertstown		2	Small, univallate ringfort, c. 34 m diameter.	1
526277	650913	Enclosure	2.2	Ardaneer	Shanid	Shanagolden		2	Possible ringfort. Oval, dimensions 22 m NE-SW, 29 m NW-SE.	1
526507	650877	Settlement	2.3	Ardaneer	Shanid	Shanagolden		2	Settlement cluster, medieval or post-medieval. Comprising a well-defined rectangular enclosure (possible bawn), 70 m NE-SW, 50 m NW-SE, with a smaller enclosure to the SW., 21 m NE-SW, 29 m NW-SE. Suggestions of hollow-ways connecting site to the NW	1
526668	650714	Settlement cluster	2.4	Ardaneer	Shanid	Shanagolden		2	Apparent settlement cluster aligned along roadway, comprising three rectangular plots with associated ridge and furrow cultivation. 79 x 27 m	2
525493	650534	Enclosure	5.1	Corgig	Shanid	Robertstown		5	Probable ringfort at edge of dataset, 27 m diameter. Visible in AP, possible a landscape feature	1
525565	650481	Enclosure	5.2	Corgig	Shanid	Robertstown		5	Small trapezoidal ditched enclosure, c. 27 x 29 m.	1
525870	650334	Field system	5.3	Corgig	Shanid	Robertstown		5	Field system, defined by multiple walls, some visible in AP. 190 x 69 m	1
526248	650412	Field system	5.4	Ardaneer	Shanid	Shanagolden	CH4	5	Extensive and potentially significant field system, perhaps associated with L1010-010 and L1010-011. 475 x 423 m extending as far as L1010-010 and L1010-011. 475 x 423 m	1
526491	650122	Enclosure	6.1	Ardaneer	Shanid	Shanagolden	CH4	6	Probable ringfort, NW portion only. Defined by curving bank, describing an oval, 30 m along its long axis.	3
526694	650012	Ringfort	6.2	Sroolane North	Shanid	Robertstown		6	Low profile ringfort, apparently truncated to west, probably by field boundary evident in 6-inch mapping. Diameter c. 35.4 m	2
526948	650475	Barrow	6.3	Churchfield	Shanid	Shanagolden		6	Probable bowl barrow, 40.2 m diameter, surrounded by broad fosse. Overbuilt by rectangular structure, possibly a church (townland name is Churchfield)	1
526300	650374	Ringfort	6.4	Ardaneer	Shanid	Shanagolden		6	Small ringfort, 27 m diameter, within field system 5.4	2
528970	649707	Cashel	8.1	Crags	Shanid	Robertstown		8	Cashel or ringfort, within heavy forestry, c. 44.6 x 31.7 m diameter.	1
528974	649666	Platform	8.2	Crags	Shanid	Robertstown		8	Apparent rectangular platform in heavy forestry. 18 m N-S, 9 m E-W. Possibly building associated with Crags House Demesne	3

Easting	Northing	Site Type	Code/SMR	Towliland	Parish	Constraint	Grid	Brief Description		Confidence
								Barony	Townland	
528299	649722	Ringfort	8.3	Oorla	Shanid	Robertstown		8	Low profile subcircular enclosure, 31 x 23 m.	1
529834	649614	Mound	9.1	Mulderrick'sfield	Shanid	Robertstown		9	Small mound in otherwise flat field. 8 m diameter.	2
530641	649740	Enclosure	10.1	Hazefield	Shanid	Robertstown		10	Enclosure sited in corner of field system, c. 21 m diameter	1
531886	649579	Possible enclosure	11.1	Ballycullen	Connello Lower	Lismakeery	CH14	11	Possible oval enclosure, 36 m NW-SE, 22 m SW-NE.	2
532169	649745	Enclosure	11.2	Ballycullen	Connello Lower	Lismakeery		11	Possible ringfort, defined by curving bank to the NW. Truncated to SE. c. 32.6 m diameter.	1
532795	649763	Possible enclosure	12.1	Cloonreak	Connello Lower	Askeaton		12	Very low profile possible ringfort. c. 26.2 m diameter. Best preserved to SW truncated to SW 66 x 49 m	2
532739	649936	Settlement cluster	12.2	Cloonreak	Connello Lower	Askeaton		12	Possible settlement cluster defined by two rectangular enclosures, and a third possibly truncated to SW 66 x 49 m	3
526536	649387	Ringfort	14.1	Inchagreenoge	Shanid	Robertstown		14	Low profile probable ringfort, c. 17.2 m diameter	3
526597	649426	Enclosure	14.2	Inchagreenoge	Shanid	Robertstown		14	Possible enclosure, 17 m diameter. Perhaps part of field system extending to NE	2
527197	649535	Enclosure	14.3	Robertstown	Shanid	Robertstown		14	Small enclosure, one of a pair. c. 23.6 m diameter. Probable ringfort	1
527182	649444	Enclosure	14.4	Robertstown	Shanid	Robertstown		14	Pair to 14.3 which is c. 100 m to the north. Small enclosure, 21 m diameter. Probable ringfort.	1
527214	649212	Field system	14.5	Robertstown	Shanid	Robertstown		14	Approximately triangular field, defined by low banks. 38 m x 22 m.	2
527483	649256	Enclosure	15.1	Robertstown	Shanid	Robertstown		15	Probable ringfort, 26 m diameter. Some suggestion of internal structure	1
527661	649511	Ringfort	15.2	Robertstown	Shanid	Robertstown		15	Ringfort, truncated to NW and associated with the extensive field system 15.3. c. 25 m diameter	1
527702	649429	Field system	15.3	Robertstown	Shanid	Robertstown	CH43	15	Extensive field system associated with at least one early medieval enclosure (probably more). 370 x 190 m	1
527736	649399	Ringfort	15.4	Robertstown	Shanid	Robertstown	CH43	15	Probable low-profile ringfort associated with field system 15.3. 32 m diameter	2
527527	649102	Field system	15.5	Robertstown	Shanid	Robertstown		15	Elements of field system potentially associated with 15.1. 138 x 126 m	3
527834	649122	Ringfort	15.6	Robertstown	Shanid	Robertstown		15	Ringfort constituting southern end of field system 15.3. 31m diameter	1
528309	649066	Field system	16.1	Rinculla	Shanid	Robertstown	CH7	16	Rectangular field system/enclosure, 38 x 36 m. Well-defined in AP. Possibly stock enclosure.	1
528430	649210	Cashel	16.2	Rinculla	Shanid	Robertstown	CH7	16	Small cashel, 23 m diameter with associated with field systems and enclosure 16.3	1
528354	649354	Hilltop enclosure	16.3	Rinculla	Shanid	Robertstown	CH6	16	Large D-shaped enclosure, flattened to N, 60 m N-S, 50 m E-W. Associated with field boundaries but impossible to define order of construction without ground survey.	1
528439	648895	Possible enclosure	16.4	Ballinleckane	Shanid	Kilmoylan		16	Possible enclosure, well-defined to north but potentially quarried to south. 28 m diameter	1
528625	649230	Possible enclosure	16.5	Ballinleckane	Shanid	Kilmoylan		16	Possible oval enclosure, 31 x 20 m.	3
529472	649368	Enclosure	17.1	Mulderrick'sfield	Shanid	Kilmoylan		17	Large, oval enclosure defined by a low platform. 56 x 50 m. Probably a large ringfort	1
529402	649544	Settlement cluster	17.2	Mulderrick'sfield	Shanid	Robertstown		17	Small rectangular enclosure/building, 22 x 15 m with curving bank, possibly part of earlier ringfort, 30 m diameter. Some external elements to SE of rectangular enclosure	1
529773	649389	Ringfort	17.3	Mulderrick'sfield	Shanid	Kilmoylan		17	Substantial possible ringfort, somewhat flattened/damaged to SW. 38 x 22 m diameter	2

Easting	Northing	Site Type	Code/SMR	Towliland	Barony	Parish	Grid	Constraint	Brief Description		Confidence
									Brief	Description	
529687	649247	Possible enclosure	17.4	Mulderrickfield	Shanid	Kilmoylan	CH9	17	Low profile rectangular enclosure, 25 m E-W, 40.5 m N-S.		3
529637	648996	Enclosure	17.5	Craggs	Shanid	Kilmoylan		17	Flattened terrace, possible natural feature with modification. 35 x 35 m		3
529684	648889	Enclosure	17.6	Craggs	Shanid	Kilmoylan		17	Possible field system, associated with LI010-090. Sub-rectangular, 48 x 33 m. Truncated to east.		1
529924	648768	Platform	17.7	Craggs	Shanid	Kilmoylan		17	Rectangular platform in dense woodland, 38 m NW-SE x 25 m NE-SW.		2
529845	648856	Field system	17.8	Mulderrickfield	Shanid	Kilmoylan		17	Field system under dense woodland, possibly incorporating ringfort, 43 m diameter.		2
530569	649044	Enclosure	18.1	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery		18	Probable ringfort, 29 m diameter. May be LI010-098 but mis-recorded.		1
530409	649242	Possible enclosure	18.2	Ballyclogh (Ed Askeaton West)	Shanid	Lismakeery		18	Possible enclosure/farmstead, 39 m diameter. May be part of a ringfort.		3
530917	648836	Enclosure	18.3	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	DL1	18	Probable ringfort, 37 x 18 m diameter. In context of broader field system. Located within DL1		1
530996	649535	Possible enclosure	18.4	Ballyellinan	Connello Lower	Lismakeery		18	Possible enclosure, 23 x 15 m diameter. Possible quarry.		2
530862	649064	Field system	18.5	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery		18	Series of probable field boundaries extending northwards from 18.3. Northern extent may be within 100 m corriid. 577 x 438 m		2
531363	649048	Field system	19.1	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	DL1	19	Series of rectangular plots along road; possible deserted medieval settlement. 101 x 39 m		3
531375	648942	Ringfort	19.2	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	DL1	19	Ringfort (or possibly demesne feature), heavily wooded. 24 m diameter.		1
531314	648740	Field system	19.3	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	DL1	19	Field system including possible enclosure, 40 m diameter.		2
531479	649163	Ringfort	19.4	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	CH13	19	Small enclosure, probable ringfort associated with 19.1 and 19.2, c. 26.5 x 25.5 m diameter		1
533194	648660	Enclosure	20.1	Baunreagh	Connello Lower	Askeaton		20	Small D-shaped enclosure, 21 x 19 m.		1
551134	648955	Enclosure	22.1	Ballybronoge North	Pubblebrien	Killonahan		22	Small circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge.		1
551045	648982	Enclosure	22.2	Ballybronoge North	Pubblebrien	Killonahan		22	Small circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge.		1
531332	648411	Field system	24.1	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery		24	Field system with enclosure elements. 152 x 110 m		3
533416	648011	Enclosure	26.1	Milltown North	Connello Lower	Lismakeery		26	Well-defined ringfort, 26.5 m diameter. Part of field system extending SE RMP		3
533630	647875	Ringfort	26.2	Milltown North	Connello Lower	Lismakeery		26	Small enclosure, 14.5 m diameter. Part of field system extending SE		1
533616	647734	Enclosure	26.3	Milltown North	Connello Lower	Lismakeery		26	Possible enclosure, apparently damaged by buildings to SE. 20.5 x 11.5 m		3
534028	648139	Building	26.4	Ballynacaheragh	Connello Lower	Askeaton		26	Rectangular platform, 42.2 x 42.2 m. Marked as wooded area in 6 inch mapping but with clear structure in lidar data.		2

Easting	Northing	Site Type	Code/SMR	Towliland	Barony	Parish	Constraint	Grid	Brief Description		Confidence
									Description	Image	
533530	647954	Field System		26.5	Milltown North	Connello Lower	Lismakeery		26	Field system. Irregular raised boundaries between enclosures 26.1 and 26.2.	2
547099	647874	Ringfort		28.1	Mondellihy	Coshma	Adare		28	Small circular enclosure in low-lying ground. 28 m diameter. Probable ringfort	1
548920	647667	Possible enclosure		30.1	Rineroe	Coshma	Adare		30	Small circular depression. 18.5 m diameter. Possible quarry.	2
549596	647966	Enclosure		31.1	Ballycarrane	Pubblebrien	Groom	D117	31	Possible enclosure. Sub-rectangular are 71 x 85 m. Possible demesne feature associated with Ballycarrane House..	1
550056	647864	Enclosure		31.2	Gorteen (Ed Clarina)	Pubblebrien	Groom		31	Trapezoidal enclosure, approx. 38 x 31 m. Possible moated site.	1
550125	648397	Ringfort		31.3	Ballycarrane	Pubblebrien	Groom		31	Possible ringfort, 30 m diameter	1
550825	648130	Enclosure		32.1	Ballybroneg South	Pubblebrien	Killonahan	D118	32	Deserted settlement. Continuation of L1021-025001 to the east of road. 65 x 26 m	1
551580	648356	Field system		33.1	Attyflin	Pubblebrien	Killonahan		33	Possible deserted settlement in grounds of Attyflin House. May include designed landscape features. 134 x 82	1
551263	648068	Deserted settlement		33.2	Attyflin	Pubblebrien	Killonahan		33	Deserted settlement. Continuation of L1021-025001 to the east of road. 65 x 26 m	1
551330	648280	Field system		33.3	Attyflin	Pubblebrien	Killonahan		33	Rectangular enclosure as part of field system. Possibly continuation of L1021-025001. 26 x 26m	2
551505	648522	Ringfort		33.4	Attyflin	Pubblebrien	Killonahan		33	Ringfort associated with L1021-027. Diameter 41 m	2
534067	647258	Hollow way		34.1	Milltown North	Connello Lower	Lismakeery		34	Substantial hollow-way. 18 m across, 135 m in length. Potentially connected to L1010-004002	1
534092	646755	Building		34.2	Milltown South	Connello Lower	Lismakeery		34	Possible building/farmstead. 48 x 18 m	2
534046	646669	Enclosure		34.3	Milltown South	Connello Lower	Lismakeery		34	Possible ringfort. 30.3 x 22 m diameter.	2
534003	646629	Possible burnt mound		34.4	Milltown South	Connello Lower	Lismakeery		34	Crescentic mound, 11.5 m diameter. Riverside location suggestive of burnt mound.	2
534476	647378	Possible enclosure		35.1	Boolaglass		Nantinan		35	Possible enclosure; however, form suggests this might be a small quarry. 26 x 24 m	2
534618	647219	Modified landscape feature		35.2	Boolaglass		Connello Nantinan		35	Rectangular platform, 44 x 56 m. Probably a natural rise with some modification	2
534374	647143	Mound		35.3	Boolaglass		Connello Nantinan		35	Tree-covered mound, 10 m diameter. Possibly landscape feature	2
534645	646885	Ringfort		35.4	Boolaglass		Connello Nantinan		35	Ringfort, c. 27.5 x 24 m diameter. Under heavy woodland	1
534293	646709	Possible burnt mound		35.5	Bullaun	Connello Lower	Nantinan		35	Small, crescentic mound located adjacent to river, c. 13 m diameter with underlying spread N-S	2
544772	646708	Enclosure		38.1	Kilknockan	Kenry	Adare		38	Possible enclosure. Curving bank to north with some disruption to south. 45 m diameter	2
544882	646801	Moated site		38.2	Kilknockan	Kenry	Adare		38	Large moated site. 54 x 43m to exterior of ditches.	1
555587	646846	Settlement		39.1	Ilandea	Coshma	Adare		39	Row of settlement plots along present field boundary (c. 212 x 48 m)	2
546422	647050	Ringfort		40.1	Ardshanbally	Coshma	Adare		40	Small enclosure, probable ringfort. Defined by broad bank. Overall diameter 27 m.	3

Easting	Northing	Site Type	Code/SMR	Towliland	Barony	Parish	Grd	Constraint	Brief Description		Confidence
									Confidence		
548766	647378	Enclosure	42.1	Rhinoe	Coshma	Adare		42	Small penannular enclosure with causeway to east. Central area 26 m diameter.	1	
534362	646002	Enclosure	46.1	Ardgou North	Connello Lower	Nantinan		46	Small enclosure, truncated to SE by another enclosure (46.2), 38 x 30 m diameter.	1	
534382	645961	Enclosure	46.2	Ardgou North	Connello Lower	Nantinan		46	Enclosure with conjoined building. Impacted by former hedge-line to NW (now removed). 30 x 19 m.	1	
535154	646239	Ringfort	46.3	Nantinan	Connello Lower	Nantinan	Dl11	46	D-shaped enclosure, c. 53 x 26 m	1	
535399	645946	Field system	47.1	Nantinan	Connello Lower	Nantinan	Dl11	47	Field system associated with L1020-056001. c. 78 x 63 m.	1	
535465	646035	Ringfort	47.2	Nantinan	Connello Lower	Nantinan	Dl11	47	Small ringfort, 21.2 m diameter.	1	
543281	645612	Designed landscape	49.1	Clonshire Beg	Connello Lower	Clonshire	Dl21	49	Formal designed gardens within grounds of Clonshire Demesne. c. 253 x 132 m	1	
543334	645967	Enclosure	49.2	Rower More	Coshma	Adare		49	Possible enclosure. Raised circular area, 21 m diameter	1	
544093	646549	Ringfort	49.3	Tuogh (Ed Adare North)	Kerry	Adare		49	Enclosure and associated field system (250 x 240 m). Central enclosure sub-rectangular but likely to be a ringfort, c. 25 x 21 m	1	
544162	646520	Mound	49.4	Tuogh (Ed Adare North)	Kerry	Adare		49	Mound, 10 m diameter. May be natural but in area of underlying low topography	3	
535772	645373	Possible ringfort	53.1	Ballingarrane	Connello Lower	Nantinan		53	Possible ringfort. Elevated area 27.2 m diameter	2	
535548	644792	Field system	53.2	Graigeen	Connello Lower	Nantinan	Dl12	53	Associated with L1020-057. Extensive field system with enclosure elements. 409 x 338 m	1	
535342	644638	Ringfort	53.3	Graigeen	Connello Lower	Nantinan	Dl12	53	Small ringfort, 29.8 x 27 m diameter.	1	
535404	644734	Ringfort	53.4	Graigeen	Connello Lower	Nantinan	Dl12	53	Low profile oval ringfort to the west of L1020-057. 31 m diameter.	2	
535310	645038	Ringfort	53.5	Graigeen	Connello Lower	Nantinan	Dl12	53	Small ringfort under heavy forestry. 26 m diameter	1	
542904	645533	Possible enclosure	55.1	Gortnagrour	Connello Lower	Clonshire		55	Trapezoidal area defined by depression. 38.5 x 24.5 m. Probable quarry	2	
542402	644667	Field system	55.2	Clonshire More	Connello Lower	Clonshire		55	Field system associated with L1020-159. 181 x 115 m	2	
543358	645114	Enclosure	56.1	Clonshire Beg	Connello Lower	Connello Lower	Dl21	56	Possible ringfort bisected by driveway of Clonshire Lodge. Diameter 33.7 m	1	
535362	644501	Enclosure	57.1	Stoneville	Connello Lower	Nantinan	Dl12	57	Rectangular enclosure associated with 53.3. 30 x 25 m	1	
535798	644341	Possible enclosure	57.2	Ballingarrane	Connello Lower	Nantinan		57	Possible oval enclosure, truncated to west. 26 x 21 m. Connected to possible building by low spur to NE	3	
536330	643794	Settlement	58.1	Ballingarrane	Connello Lower	Nantinan		58	Group of rectangular plots aligned along field boundary. Possible medieval settlement plots, 45 x 15 m	2	
540022	643602	Ringfort	59.1	Clogh East	Connello Lower	Croagh		59	Small, circular enclosure, 21.8 m diameter. Probable ringfort.	1

								Barony		
541197	644253	Enclosure	60.1	Croagh	Connello Lower	Croagh		60	Small, circular enclosure, defined to the NE by curve in field boundary. Diameter 18.1 m	1
540810	643998	Ringfort	60.2	Knockdrumin	Connello Lower	Clonshire		60	Circular enclosure, truncated to west by field boundary. Possible ringfort, 38.8 m diameter	1
541331	644426	Building	61.1	Croagh	Connello Lower	Croagh		61	Raised, circular area, 8 m diameter. Possible windmill stump.	1
541598	644256	Settlement cluster	61.2	Croagh	Connello Lower	Croagh	CH157	61	Possible farmstead. Rectangular building platform with associated field systems to NE. 71 x 48 m	3
541487	644111	Enclosure	61.3	Croagh	Connello Lower	Croagh		61	Curvilinear bank, probably SW portion of ringfort. Approx. diameter 21.4 m	2
541641	644086	Enclosure	61.4	Croagh	Connello Lower	Croagh		61	Oval enclosure, 31.8 x 24.8 m. Somewhat irregular - possible quarry	1
542068	644005	Enclosure	61.5	Croagh	Connello Lower	Croagh		61	Roughly plectrum-shaped enclosure defined by slight bank. 56 x 51 m. Visible as crop-mark in AP	1
542708	643956	Enclosure	62.1	Coolballyshane	Connello Lower	Clonshire		62	Small circular area defined by depression. Possible ringfort. 30 m diameter	2
535912	643456	Enclosure	63.1	Kyletaun	Connello Lower	Rathkeale		63	Possible trapezoidal enclosure, truncated to south. 50 m NE-SW; truncation to south. Projected NW-SE measurement 49 m	3
535828	643064	Ringfort	63.2	Kyletaun	Connello Lower	Rathkeale		63	Small ringfort, diameter 27 m.	1
536060	643157	Enclosure	63.3	Kyletaun	Connello Lower	Rathkeale		63	Very low profile possible enclosure defined a shallow circular depression. 44 m diameter.	2
536624	643499	Ringfort	64.1	Ballingarrane	Connello Lower	Nantinan		64	Circular raised platform, 29 m diameter. Probably a ringfort.	2
537443	642900	Enclosure	65.1	Wolfesburgess East	Connello Lower	Rathkeale		65	Low profile circular enclosure on low rise. 32 x 28 m diameter	3
537895	642765	Platform	65.2	Blossomhill (Ed Rathkeale Rural)	Connello Lower	Rathkeale		65	Trapezoidal platform 43 x 31 m; 6 inch mapping suggests some complexity to field system in this area. Possibly modified natural elevation	2
533010	642783	Ringfort	66.1	Amogan Beg	Connello Lower	Croagh		66	Circular enclosure, quarried in the north and ploughed out to the NE. 32.3 m diameter	2
538814	642711	Ringfort	66.2	Amogan Beg	Connello Lower	Croagh		66	Small circular enclosure, 26.1 m diameter. Probable ringfort.	2
539058	643467	Enclosure	66.3	Cloch West	Connello Lower	Croagh		66	Small circular enclosure, probable ringfort, 19.4 m diameter	1
538973	643256	Possible enclosure	66.4	Cloch West	Connello Lower	Croagh		66	Small circular depression with possible ditch to SW. Possible quarry. 19.4 m diameter	3
539199	643105	Ringfort	66.5	Cloch West	Connello Lower	Croagh		66	Low mound with ditch to northwest. Visible in orthophotography. 29 m diameter. Possibly natural mound with quarry.	2
538987	642682	Ringfort	66.6	Amogan Beg	Connello Lower	Croagh		66	Ringfort, levelled to the east but well-preserved to the west. 46 x 30 m	2
535476	642084	Ringfort	70.1	Kyletaun	Connello Lower	Rathkeale		70	Small ringfort, 24 m diameter.	1

								Barony		
536945	642066	Enclosure	71.1	Wolfesburgess East	Connello Lower	Rathkeale	71	Small enclosure with central mounded area. 44 m diameter	2	
538391	642220	Enclosure	73.1	Croagh Commons	Connello Lower	Croagh	73	Possible plectrum-shaped enclosure, partially overbuilt to SW by modern farmyard. 43 m diameter	1	
538800	642191	Ringfort	73.2	Ballymacave	Connello Lower	Croagh	73	Probable ringfort located on low E-W ridge. Largely levelled but broad external fosse still visible. Diameter 39.8 m.	2	
535630	641256	Designed landscape	76.1	Castlematrix	Connello Lower	Rathkeale	76	Complex of ditched features, probably part of the grounds of Castlematrix. Covering in excess of 1.7 ha.	2	
525544	651164	Castle - tower house	L1010-007	Corgig	Shanid	Robertstown	1	Corgig Castle. Heavily wooded. Former landscaped grounds of Corgig House now covered by housing development to the east.	1	
525978	651401	Enclosure	L1010-009	Durnish	Shanid	Robertstown	1	Heavily wooded univallate ringfort, 37 m diameter. Occupies prominent position on a bluff, with the land falling away to the west.	1	
526226	650035	Ringfort - cashel	L1010-010	Ardaneer	Shanid	Shanagolden	5	Ringfort, 27.5 x 21 m diameter, under heavy woodland. Possibly bivallate.	1	
526286	650125	Ringfort - rath	L1010-011	Ardaneer	Shanid	Shanagolden	6	Univallate ringfort, 27 m in diameter. Well-preserved with field systems on all sides. Part of potentially an important complex of enclosures covering c. 15 ha.	1	
526448	650267	Ringfort - rath	L1010-012	Ardaneer	Shanid	Shanagolden	6	Univallate ringfort, 24 m in diameter. Well-preserved with field systems to NE covering up to 15 ha. RMP places this 13 m south of its actual location. ITM: 526436 650290	1	
526990	650174	Castle - tower house	L1010-013	Churchfield	Shanid	Robertstown	6	Robertstown Castle. Very little visible in lidar or APs.	1	
526286	649785	Ringfort - rath	L1010-066	Sroolane North	Shanid	Robertstown	6	Modern house at this location. No visible trace remains of monument	0	
526914	649791	Ringfort - rath	L1010-068	Robertstown	Shanid	Robertstown	6	Modern house at this location. No visible trace remains of monument	0	
527009	649997	Church	L1010-069001	Robertstown	Shanid	Robertstown	BH41 AH121	Within L1010-069002. Little of note visible beyond modern graveyard use	1	
527010	650003	Graveyard	L1010-069002	Robertstown	Shanid	Robertstown	BH41 AH121	Walled graveyard within sub-rectangular enclosure 54 x 47 m. Hollow-way access route visible to NW. Previously identified as BH4	1	
527376	649346	Ringfort - rath	L1010-070	Robertstown	Shanid	Robertstown	AH5	Well-preserved ringfort under scrub. Associated field systems to west covering up to 14 ha. 25 m diameter	1	
527635	649591	Burial ground	L1010-071	Robertstown	Shanid	Robertstown	AH6	Burial ground. Disturbed by cattle feeders and no obvious trace in elevation data.	2	
528027	649674	Ringfort - rath	L1010-073	Rincullia	Shanid	Robertstown	AH11	Ringfort, possibly bivallate, under heavy woodland. 46 m diameter.	1	
528231	649430	Enclosure	L1010-074	Rincullia	Shanid	Robertstown	AH8	Roughly circular enclosure, truncated to east, under heavy woodland. 42 m diameter.	1	
528546	649825	Ringfort - rath	L1010-079	Craggs	Shanid	Robertstown	8	Modern house at this location. No visible trace remains of monument.	0	
528802	649319	Ringfort - rath	L1010-081	Craggs	Shanid	Kilmoylan	AH9	Modern quarry at this location. No visible trace remains of monument.	0	
529165	649640	Ringfort - rath	L1010-084	Craggs	Shanid	Robertstown	8	Under heavy woodland, but no obvious trace remains. Requires ground survey to check.	0

Appendix 4: Brief description of grid squares³

³ In the tables below sites impacted by the 100 m road corridor are marked in bold.

Grid 1.

Class	Code	Townland	Barony	Parish	Confidence
Castle - tower house	LI010-007----	Corrig	Shanid	Robertstown	1
Enclosure	LI010-009----	Durnish	Shanid	Robertstown	1
Field system	1.1	Corrig	Shanid	Robertstown	1
Possible enclosure	1.2	Corrig	Shanid	Robertstown	3
Enclosure	1.3	Corrig	Shanid	Robertstown	2
Designed landscape	1.4	Corrig	Shanid	Robertstown	2
Possible enclosure	1.5	Durnish	Shanid	Robertstown	2
Enclosure	1.6	Durnish	Shanid	Robertstown	3
Ringfort	1.7	Corrig	Shanid	Robertstown	2

Increase from 2 to 9 sites. Much of this grid is occupied by the edge of Foynes town. Several features (e.g. 1.1; 1.2; 1.3; 1.4) lie within former Corrig House demesne.

Grid 2.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort	2.1	Durnish	Shanid	Robertstown	1
Enclosure	2.2	Ardaneer	Shanid	Shanagolden	1
Settlement	2.3	Ardaneer	Shanid	Shanagolden	1
Settlement cluster	2.4	Ardaneer	Shanid	Shanagolden	2

Increase from 0 to 4 sites, three of which are strong candidates. Some reclaimed land within this grid square along the Robertstown River. Includes part of Churchfield townland.

Grid 3.

No sites recorded.

Grid 4.

No sites recorded.

Grid 5.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - cashel	LI010-010----	Ardaneer	Shanid	Shanagolden	1
Enclosure	5.1	Corrig	Shanid	Robertstown	1
Enclosure	5.2	Corrig	Shanid	Robertstown	1
Field system	5.3	Corrig	Shanid	Robertstown	1
Field system	5.4	Ardaneer	Shanid	Shanagolden	1

Increase from 1 to 5 sites, all of which are strong candidates. Perhaps in the hinterland of the very large enclosure LI010-064001- which lies to the SW. Also includes some glebe land, perhaps associated with the adjacent townland of Churchfield or LI010-069001 which is in Grid 6. One site, field system 5.4, is impacted by the 100 m road corridor.

Grid 6

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-011----	Ardaneer	Shanid	Shanagolden	1
Ringfort - rath	LI010-012----	Ardaneer	Shanid	Shanagolden	1
Castle - tower house	LI010-013----	Churchfield	Shanid	Robertstown	1
Ringfort - rath	LI010-066----	Sroolane North	Shanid	Robertstown	0
Ringfort - rath	LI010-068----	Robertstown	Shanid	Robertstown	0
Church	LI010-069001-	Robertstown	Shanid	Robertstown	1
Graveyard	LI010-069002-	Robertstown	Shanid	Robertstown	1
Mill - unclassified	LI010-106----	Sroolane North	Shanid	Robertstown	0
Enclosure	LI010-144----	Robertstown	Shanid	Robertstown	1
Enclosure	6.1	Ardaneer	Shanid	Shanagolden	3
Ringfort	6.2	Sroolane North	Shanid	Robertstown	2
Barrow	6.3	Churchfield	Shanid	Shanagolden	1
Ringfort	6.4	Ardaneer	Shanid	Shanagolden	2

Increase from 9 to 13 sites, including one very strong candidate and one site (6.2) within the road corridor. Hinterland of Robertstown Castle (LI010-13) and church (LI010-069001-).

Grid 7.

Class	Code	Townland	Barony	Parish	Conf
Burial ground	LI010-071----	Robertstown	Shanid	Robertstown	2
Ringfort - rath	LI010-073----	Rincullia	Shanid	Robertstown	1

No potential new sites recorded. Mostly low-lying ground adjacent to Robertstown River.

Grid 8.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-079----	Craggs	Shanid	Robertstown	0
Ringfort - rath	LI010-084----	Craggs	Shanid	Robertstown	0
Burnt mound	LI010-141001-	Rincullia	Shanid	Robertstown	4
Pit	LI010-141002-	Rincullia	Shanid	Robertstown	4
Road - gravel/stone trackway - peatland	LI010-141003-	Rincullia	Shanid	Robertstown	4
Cashel	8.1	Craggs	Shanid	Robertstown	1
Platform	8.2	Craggs	Shanid	Robertstown	3
Ringfort	8.3	Oorla	Shanid	Robertstown	1

Increase from 5 to 8 sites, including two strong candidates. Southern part of grid dominated by a large quarry which extends to grid 16.

Grid 9.

Class	Code	Townland	Barony	Parish	Confidence
Mound	9.1	Mulderricksfield	Shanid	Robertstown	2

One potential new site. Grid only clipped by the road corridor.

Grid 10.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	10.1	Hazelfield	Shanid	Robertstown	1

One potential new strong candidate site. Grid only clipped by the road corridor.

Grid 11.

Class	Code	Townland	Barony	Parish	Confidence
Possible enclosure	11.1	Ballycullen	Connello Lower	Lismakeery	2
Enclosure	11.2	Ballycullen	Connello Lower	Lismakeery	1

Two potential new sites, including one strong candidate. Grid with some possible cut peatland or reclaimed land, with stream channel running n-s.

Grid 12.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-107----	Cloonreask	Connello Lower	Askeaton	1
Possible enclosure	12.1	Cloonreask	Connello Lower	Askeaton	2
Settlement cluster	12.2	Cloonreask	Connello Lower	Askeaton	3

Two potential new sites including one (12.2) within the road corridor.

Grid 13.

Class	Code	Townland	Barony	Parish	Conf
Ringfort - rath	LI011-090----	Cloonreask	Connello Lower	Askeaton	2

No potential new sites recorded. Adjacent to the town of askeaton and only clipped by the 1 km route corridor.

Grid 14.

Class	Code	Townland	Barony	Parish	Confidence
Excavation - miscellaneous	LI010-136006-	Inchagreenoge	Shanid	Robertstown	4
Burial	LI010-136005-	Inchagreenoge	Shanid	Robertstown	4

Fulacht fia	LI010-136003-	Inchagreenoge	Shanid	Robertstown	4
Fulacht fia	LI010-136004-	Inchagreenoge	Shanid	Robertstown	4
Burnt mound	LI010-142----	Robertstown	Shanid	Robertstown	4
Ringfort	14.1	Inchagreenoge	Shanid	Robertstown	3
Enclosure	14.2	Inchagreenoge	Shanid	Robertstown	2
Enclosure	14.3	Robertstown	Shanid	Robertstown	1
Enclosure	14.4	Robertstown	Shanid	Robertstown	1
Field system	14.5	Robertstown	Shanid	Robertstown	2

Increased from 7 to 12 sites, including two strong candidates. Includes a number of sites excavated on Gas Pipeline to the West in low-lying ground. This highlights the potential for these wetland areas to yield archaeological remains in this region.

Grid 15.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-070----	Robertstown	Shanid	Robertstown	1
Enclosure	LI010-074----	Rincullia	Shanid	Robertstown	1
Excavation - miscellaneous	LI010-140----	Rincullia	Shanid	Robertstown	4
Enclosure	15.1	Robertstown	Shanid	Robertstown	1
Ringfort	15.2	Robertstown	Shanid	Robertstown	1
Field system/ribbon settlement	15.3	Robertstown	Shanid	Robertstown	1
Ringfort	15.4	Robertstown	Shanid	Robertstown	2
Field system	15.5	Robertstown	Shanid	Robertstown	3
Ringfort	15.6	Robertstown	Shanid	Robertstown	1

Increase from 3 to 9 sites, including three strong potential new sites. Three sites within the road corridor – LI010-074, 15.2 and 15.3. An area of extensive early medieval activity around field system 15.3 especially.

Grid 16.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-081----	Craggs	Shanid	Kilmoylan	0
Field system	16.1	Rincullia	Shanid	Robertstown	1
Cashel	16.2	Rincullia	Shanid	Robertstown	1
Hilltop enclosure	16.3	Rincullia	Shanid	Robertstown	1
Possible enclosure	16.4	Ballinknockane	Shanid	Kilmoylan	1
Possible enclosure	16.5	Ballinknockane	Shanid	Kilmoylan	3

Increase from 1 to 6 sites, including four strong potential new sites. Two sites, hilltop enclosure 16.3 and ringfort LI010-081 – are impacted by the road corridor. Grid dominated by significant quarry and possible hilltop enclosure 16.3 (CH6).

Grid 17.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI010-087----	Craggs	Shanid	Kilmoylan	1
Ringfort - cashel	LI010-090----	Mulderricksfield	Shanid	Kilmoylan	1
Ringfort - rath	LI019-048----	Craggs	Shanid	Kilmoylan	1
Enclosure	LI019-238----	Craggs	Shanid	Kilmoylan	1
Enclosure	17.1	Mulderricksfield	Shanid	Kilmoylan	1
Settlement cluster	17.2	Mulderricksfield	Shanid	Robertstown	1
Ringfort	17.3	Mulderricksfield	Shanid	Kilmoylan	2
Possible enclosure	17.4	Mulderricksfield	Shanid	Kilmoylan	3
Enclosure	17.5	Craggs	Shanid	Kilmoylan	3
Enclosure	17.6	Craggs	Shanid	Kilmoylan	1
Platform	17.7	Craggs	Shanid	Kilmoylan	2
Field system	17.8	Mulderricksfield	Shanid	Kilmoylan	2

Increase from 4 to 12 sites, including three strong candidates. A significant area of early medieval archaeology including several enclosures. Predominantly low-lying.

Grid 18.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI010-097----	Ballyclogh (Connello Lower by.)	Connello Lower	Lismakeery	0
Ringfort - rath	LI010-098----	Ballyclogh (Connello Lower by.)	Connello Lower	Lismakeery	0
Ringfort - rath	LI010-099----	Mulderricksfield	Shanid	Kilmoylan	0
Pit	LI010-134----	Ballyellinan	Connello Lower	Lismakeery	4
Enclosure	18.1	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	1
Possible enclosure	18.2	Ballyclogh (Ed Askeaton West)	Shanid	Lismakeery	3
Enclosure	18.3	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	1
Possible enclosure	18.4	Ballyellinan	Connello Lower	Lismakeery	2
Field system	18.5	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	1

Increase from 4 to 8 sites, including two strong candidates and one site impacted by the road corridor. Southern half of grid occupied by Ballyclogh Demesne, northern half by very small, irregular fields (field system 18.5), partly impacted by the 100 m road corridor.

Grid 19.

Class	Code	Townland	Barony	Parish	Confidence
Castle - unclassified	LI019-059----	Ballycullen	Connello Lower	Lismakeery	4
Redundant record	LI019-060----	Ballycullen	Connello Lower	Lismakeery	4
Fulachta fia	LI010-149----	Ballycullen	Connello Lower	Lismakeery	4
Field system	19.1	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	3
Ringfort	19.2	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	1
Field system	19.3	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeery	2
Ringfort	19.4	Ballyclogh (Ed Askeaton West)	Connello Lower	Lismakeer	1

Increase from 3 to 7 sites, including 2 strong candidates. Two sites are impacted by the road corridor, including site 19.4 which lies within CH13. Almost entirely occupied by Ballycullen House demesne.

Grid 20.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI010-103----	Cloonreask	Connello Lower	Askeaton	1
Fulacht fia	LI019-268----	Baunreagh	Connello Lower	Askeaton	4
Fulacht fia	LI019-269----	Baunreagh	Connello Lower	Lismakeery	4
Enclosure	20.1	Baunreagh	Connello Lower	Askeaton	1

Increase from 4 to 5 sites, the only new site (20.1) being a strong candidate. Approximately half of the grid is outside of the 1 km route corridor. Much ground that is liable to flooding.

Grid 21.

No sites recorded. Only clipped by route corridor.

Grid 22.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI012-085----	Ballybronoge North	Pubblebrien	Killonahan	1
Enclosure	22.1	Ballybronoge North	Pubblebrien	Killonahan	1
Enclosure	22.2	Ballybronoge North	Pubblebrien	Killonahan	1

Increase from 1 to 3 sites, with the two additional sites being strong candidates. Grid only clipped by route corridor. Sites in grounds of spring lodge.

Grid 23.

Class	Code	Townland	Barony	Parish	Confidence
Designed landscape feature	LI012-138----	Attyflin	Pubblebrien	Killonahan	0
Fulacht fia	LI021-178----	Attyflin	Pubblebrien	Killonahan	0
Fulacht fia	LI021-183----	Attyflin	Pubblebrien	Killonahan	0

No additional sites recorded. Grid only clipped by route corridor.

Grid 24.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI019-058--	Ballyclogh (Connello Lower by.)	Connelo Lower	Lismakeery	1
Field system	-- 24.1	Ballyclogh (Ed Askeaton West)	Connelo Lower	Lismakeery	3

One additional site recorded. Much of this grid is very low lying. Recorded as alluvium in GSI data.

Some potential for wetland archaeology/fulachtai fia.

Grid 25.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI019-064----	Lismakeery	Connelo Lower	Lismakeery	1
Fulacht fia	LI020- 163001-	Baunreagh	Connelo Lower	Askeaton	4
Excavation - miscellaneous	LI020- 163002-	Baunreagh	Connelo Lower	Askeaton	4
Pit	LI019-267----	Baunreagh	Connelo Lower	Askeaton	4

No additional sites recorded. Some glebe land associated probably with Lismakeery chuch to the south. Three sites impacted by the road corridor, two of which have been previously excavated.

Grid 26.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI020-002----	Ballynacaheragh	Connello Lower	Askeaton	1
Fulacht fia	LI020-175----	Milltown North	Connello Lower	Lismakeery	4
Excavation - miscellaneous	LI020-177----	Milltown North	Connello Lower	Lismakeery	4
Enclosure	26.1	Milltown North	Connello Lower	Lismakeery	3
Ringfort	26.2	Milltown North	Connello Lower	Lismakeery	1
Enclosure	26.3	Milltown North	Connello Lower	Lismakeery	3
Building	26.4	Ballynacaheragh	Connello Lower	Askeaton	2
Field system	26.5	Milltown North	Connello Lower	Lismakeery	2

Increase from 3 to 8 sites recorded, including one strong candidate. An active area of early medieval archaeology, especially to the south of the road corridor.

Grid 27.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-006----	Boolaglass	Connello Lower	Nantinan	1

No new sites recorded. Grid only clipped by route corridor. Bisected N-S by Deel River.

Grid 28.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort	28.1	Mondellihy	Coshma	Adare	1

One new site recorded, a strong candidate. Grid only clipped by route corridor. Grounds of Mondellihy House.

Grid 29.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI021-147002-	Kilgobbin	Coshma	Adare	0

No new sites recorded. Significant part of grid occupied by grounds of Mondellihy House. One site impacted by road corridor, of which no topographic trace remains.

Grid 30.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI021-014----	Kilgobbin	Coshma	Adare	1
Enclosure	LI021-015----	Rineroe	Coshma	Adare	2
Enclosure	LI021-115----	Ballyloughnaan	Pubblebrien	Croom	0
Enclosure	LI021-148----	Kilgobbin	Coshma	Adare	0
Possible enclosure	30.1	Rineroe	Coshma	Adare	2

Increase from 4 to 5 sites recorded. One site (LI021-148) is impacted by the road corridor but has no topographic expression. Much low-lying ground, especially to west of grid.

Grid 31.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	LI021-018----	Ballycarrane	Pubblebrien	Croom	2
Enclosure	LI021-020----	Killeen (Coshma by)	Coshma	Adare	1
Moated site	LI021-017----	Gorteen (Pubblebrien by.)	Pubblebrien	Croom	3

Ringfort	49.3	Tuogh (Ed Adare North)	Kenry	Adare	1
Mound	49.4	Tuogh (Ed Adare North)	Kenry	Adare	3

Increase from 1 to 4 sites including 3 strong candidates. Two sites to be impacted by the road corridor, including LI021-005. Significant area of alluvium running from NW (grid 38). Potential for wetland archaeology/fulachtai fiadh.

Grid 50.

No sites recorded

Grid 51.

No sites recorded.

Grid 52.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-052----	Feeagh	Connello Lower	Nantinan	1

No new sites recorded. Much of grid taken up by grounds of Wellmount House (bh20).

Grid 53.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - cashel	LI020-057----	Graigeen	Connello Llower	Nantinan	1
Ringfort - rath	LI020-059----	Ballingarrane	Connello Llower	Nantinan	1
Possible ringfort	53.1	Ballingarrane	Connello Llower	Nantinan	2
Field system	53.2	Graigeen	Connello Llower	Nantinan	1
Ringfort	53.3	Graigeen	Connello Llower	Nantinan	1
Ringfort	53.4	Graigeen	Connello Llower	Nantinan	2
Ringfort	53.5	Graigeen	Connello Llower	Nantinan	1

Increase from 2 to 7 sites, including 3 strong candidates. Much of grid within Stoneville demesne.

Several sites (53.2; 53.3; 53.4; LI020-057) lie within the former deer park.

Grid 54.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-086----	Ballinvira	Connello Lower	Cappagh	1
Enclosure	LI020-087----	Graigue (Connello lower by., Croagh ed)	Connello Lower	Clonshire	1
Ritual site - holy well	LI020-093----	Ballinvira	Connello Lower	Croagh	4

No new sites recorded. Includes part of the grounds of Ballinvira House.

Grid 55.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-095----	Clonshire More	Connello Lower	Clonshire	1
Church	LI021-029001-	Clonshire More	Connello Lower	Clonshire	1
Graveyard	LI021-029002-	Clonshire More	Connello Lower	Clonshire	1
Cross	LI021-029003-	Clonshire More	Connello Lower	Clonshire	1
Cross	LI021-029004-	Clonshire More	Connello Lower	Clonshire	1
Castle - hall-house	LI020-159----	Clonshire More	Connello Lower	Clonshire	1
Possible enclosure	55.1	Gortnagrour	Connello Lower	Clonshire	2
Field system	55.2	Clonshire More	Connello Lower	Clonshire	2

Increase from 6 to 8 sites, including one (a possible quarry) which will be impacted by the road corridor. Substantial glebe field associated with LI021-029001.

Grid 56.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	56.1	Clonshire beg	Connello Lower	Clonshire	1

One new site recorded, a strong candidate. Grid mostly taken up by Clonshire Lodge and only clipped by route corridor.

Grid 57.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-058----	Ballingarrane	Connello Lower	Nantinan	0
Ringfort - rath	LI020-060----	Ballingarrane	Connello Lower	Nantinan	1
Enclosure	57.1	Stoneville	Connello Lower	Nantinan	1
Possible enclosure	57.2	Ballingarrane	Connello Lower	Nantinan	3

Increase from 2 to 4 sites, including one strong candidate. Catches edge of Stoneville Demesne.

Grid 58.

Class	Code	Townland	Barony	Parish	Confidence
Settlement	58.1	Ballingarrane	Connello Lower	Nantinan	2

One new potential site. Catches edge of Doohyle Lough, so potential for wetland sites

Grid 59.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-119----	Closh east	Connello Lower	Croagh	1
Ringfort - rath	LI020-121----	Croagh	Connello Lower	Croagh	1
Ringfort	59.1	Closh east	Connello Lower	Croagh	1

Increase from 2 to 3 sites, with one strong candidate. Much of grid outside of route corridor.

Grid 60.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	60.1	Croagh	Connello Lower	Croagh	1
Ringfort	60.2	Knockdromin	Connello Lower	Clonshire	1

Two previously unrecorded sites, both strong candidates.

Grid 61.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-088----	Graigue (connello lower by., croagh ed)	Connello Lower	Clonshire	1
Building	61.1	Croagh	Connello Lower	Croagh	1
Settlement cluster	61.2	Croagh	Connello Lower	Croagh	3
Enclosure	61.3	Croagh	Connello Lower	Croagh	2
Enclosure	61.4	Croagh	Connello Lower	Croagh	1
Enclosure	61.5	Croagh	Connello Lower	Croagh	1

Increase from 1 to 6 sites, including three strong candidates. Three sites to be impacted by the road corridor, including 61.2 which lies within CH157. Includes BH37 (Smithfield House).

Grid 62.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-126----	Coolballyshane	Connello Lower	Clonshire	1
Mill - corn	LI020-132----	Coolballyshane	Connello Lower	Clonshire	4
Enclosure	62.1	Coolballyshane	Connello Lower	Clonshire	2

Increase from 2 to 3 sites. Includes significant area of low-lying ground, including alluvium adjacent to LI020-159.

Grid 63.

Class	Code	Townland	Barony	Parish	Confidence
Crannog	LI020-113----	Kyletaun	Connello Lower	Rathkeale	1
Enclosure	63.1	Kyletaun	Connello Lower	Rathkeale	3
Ringfort	63.2	Kyletaun	Connello Lower	Rathkeale	1
Enclosure	63.3	Kyletaun	Connello Lower	Rathkeale	2

Increase from 1 to 4 sites, including 1 strong candidate. Includes significant area of wetlands, former lake at Kyletaun.

Grid 64.

Class	Code	Townland	Barony	Parish	Confidence
Burial ground	LI020-114---	Kyletaun	Connello Lower	Rathkeale	0
Redundant record	-	Wolfesburgess east	Connello Lower	Rathkeale	4
Standing stone	LI020-156---	Rathkeale	Connello Lower	Rathkeale	0
Ringfort	64.1	Ballingarrane	Connello Lower	Nantinan	2

Increase from 3 to 4 sites. One site (the redundant record LI020-115) will be impacted by the road corridor. Including large area of terrestrialised lake (formerly Doohyle Lough).

Grid 65.

Class	Code	Townland	Barony	Parish	Confidence
Enclosure	65.1	Wolfesburgess East	Connello Lower	Rathkeale	3
Platform	65.2	Blossomhill (ed Rathkeale Rural)	Connello Lower	Rathkeale	2

Two previously unrecorded sites. Including large area of terrestrialised lake (formerly Doohyle Lough) and southern spur in Blossom Hill.

Grid 66.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort	66.1	Amogan Beg	Connello Lower	Croagh	2
Ringfort	66.2	Amogan Beg	Connello Lower	Croagh	2
Enclosure	66.3	Closh west	Connello Lower	Croagh	1
Possible enclosure	66.4	Closh West	Connello Lower	Croagh	3
Ringfort	66.5	Closh West	Connello Lower	Croagh	2
Ringfort	66.6	Amogan Beg	Connello Lower	Croagh	2

Six new sites recorded, including one strong candidate. Two sites (66.2 and 66.4) will be impacted by the road corridor. Includes significant element of early medieval settlement. Some low-lying ground.

Grid 67.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-120----	Amogan Beg	Connello Lower	Croagh	1
Ringfort - rath	LI020-137----	Ballycannon	Connello Lower	Croagh	0

No new sites recorded.

Grid 68.

Class	Code	Townland	Barony	Parish	Confidence
Ringfort - rath	LI020-122----	Ballycannon	Connello Lower	Croagh	1
Castle - unclassified	LI020-123001-	Adamswood	Connello Lower	Croagh	1
Church	LI020-123003-	Adamswood	Connello Lower	Croagh	1

Ringfort - rath	LI029-023----	Wolfesburgess West	Connello Lower	Rathkeale	1
Bridge	LI029-031002-	English Tenements, Enniscoush, Rathk eale	Connello Lower	Rathkeale	1
Designed landscape	76.1	Castlematrix	Connello Lower	Rathkeale	2

Increase from 2 to 3 sites. Includes glebe lands associated with church at Mount Southwell and grounds of Castlematrix.

Appendix 5: Image catalogue

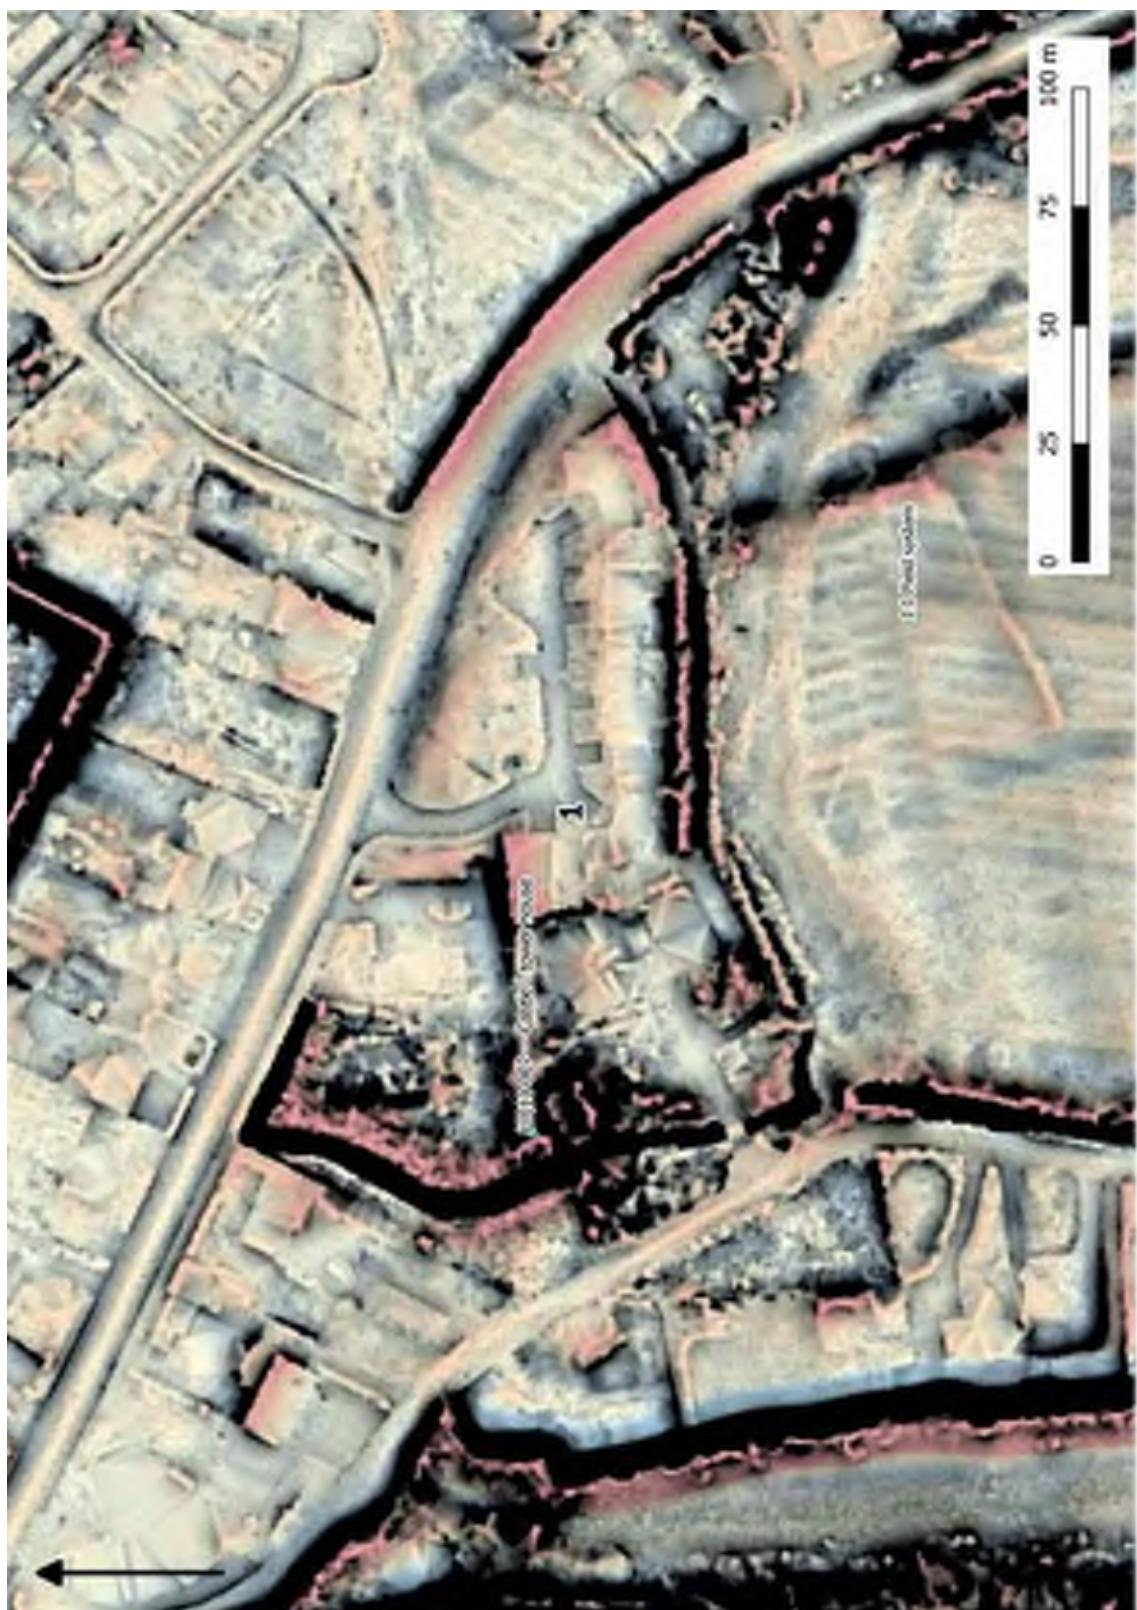

Grid 1

L1010-007. Corrig Castle. Heavily wooded. Former landscaped grounds of Corrig House now covered by housing development to the east.

LJ010-007. Corgrig Castle. Heavily wooded. Former landscaped grounds of Corgrig Castle now covered by housing development to the east. Scheme orthophotography.

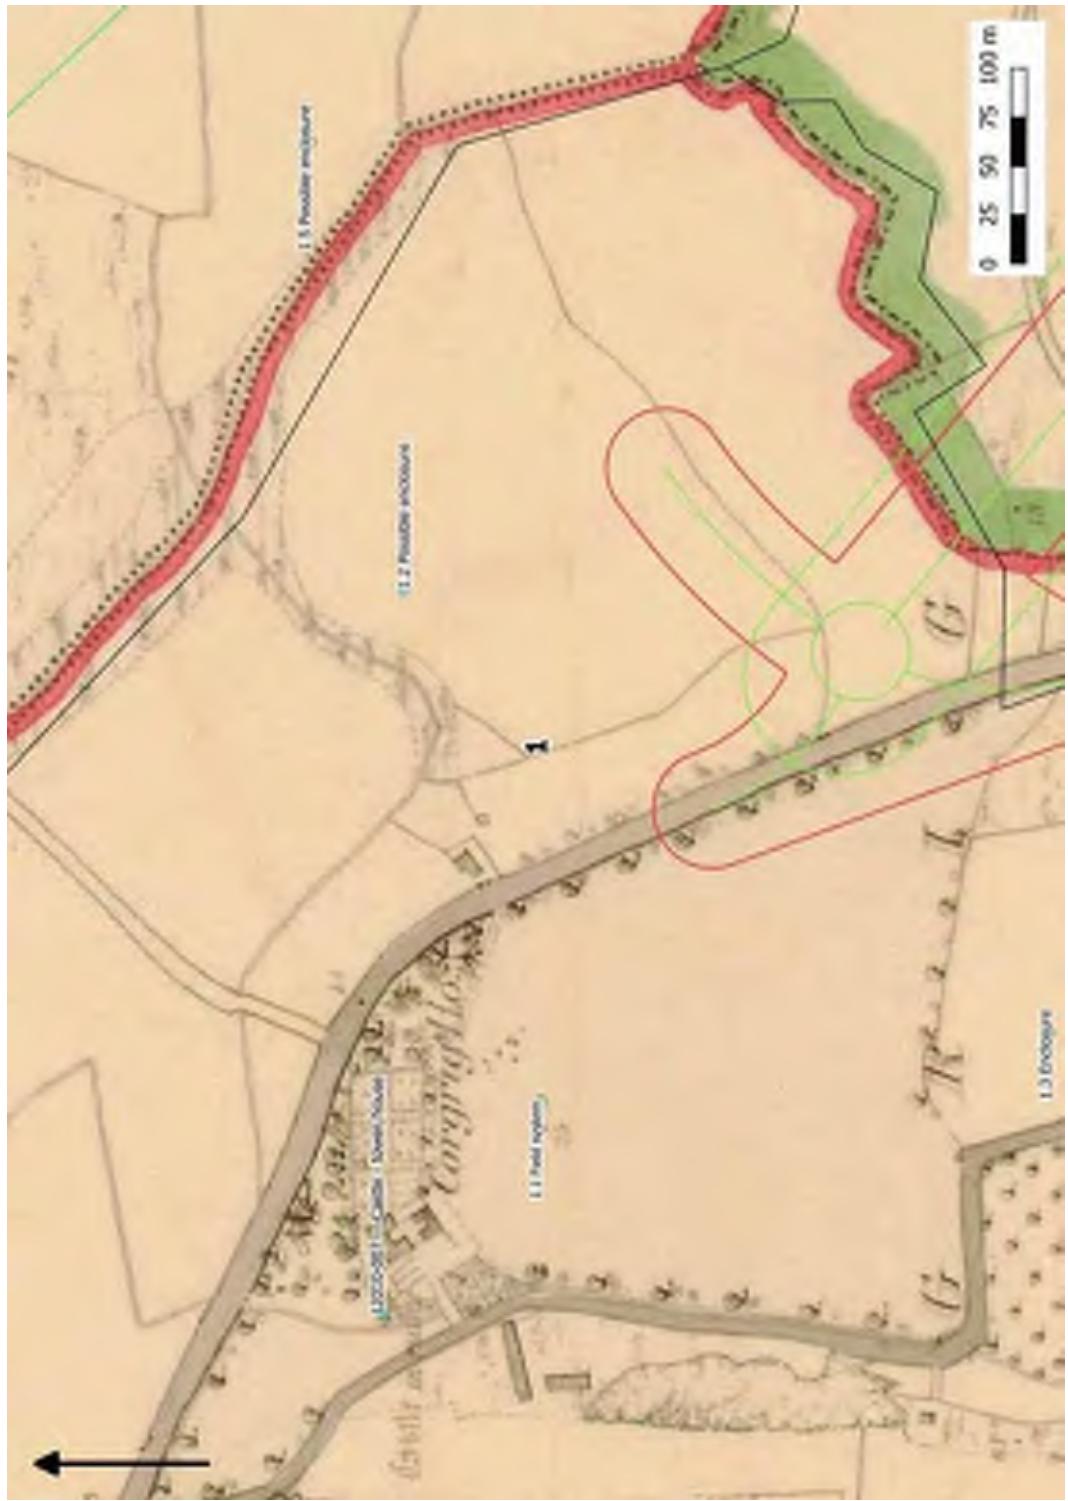

LJ010-007. Corrig Castle. Heavily wooded. Former landscaped grounds now covered by housing development to the east. LRM over SVF.

LI010-009. Heavily wooded univallate ringfort, 37 m diameter. Occupies prominent position on a bluff, with the land falling away to the west. Green line denotes boundary of 1km route corridor. Scheme orthophotography.

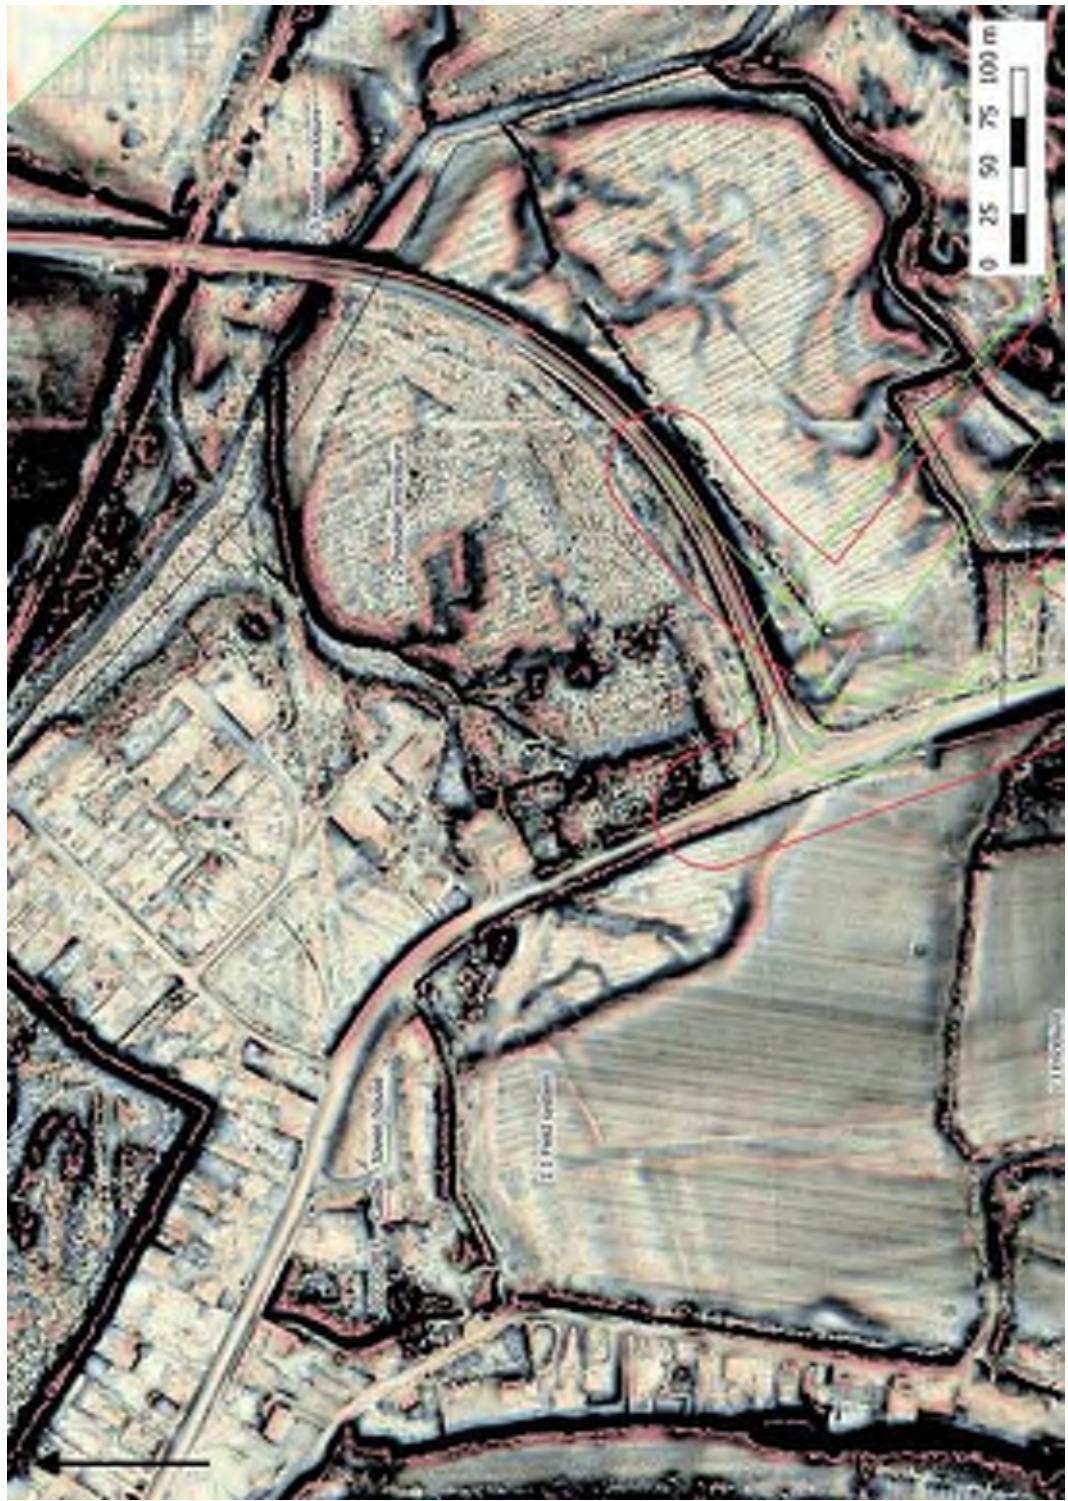

L1010-009. Heavily wooded univallate ringfort, 37 m diameter. Occupies prominent position on a bluff, with the land falling away to the west. Green line denotes boundary of 1km route corridor LRM over SVF image.

Feature 1.1. Probable field system associated with LI010-007. 148 x 85 m. 6-inch series.

Feature 1.2. Possible oval enclosure, 33.9 m NE-SW, 31.4 m NW-SE. No indications on early mapping.

Feature 1.1 Probable field system associated with LI010-007. 148 x 85 m.. 6-inch series.

Feature 1.2. Possible oval enclosure, 33.9 m NE-SW, 31.4 m NW-SE. No indications on early mapping. LRM over SVF image.

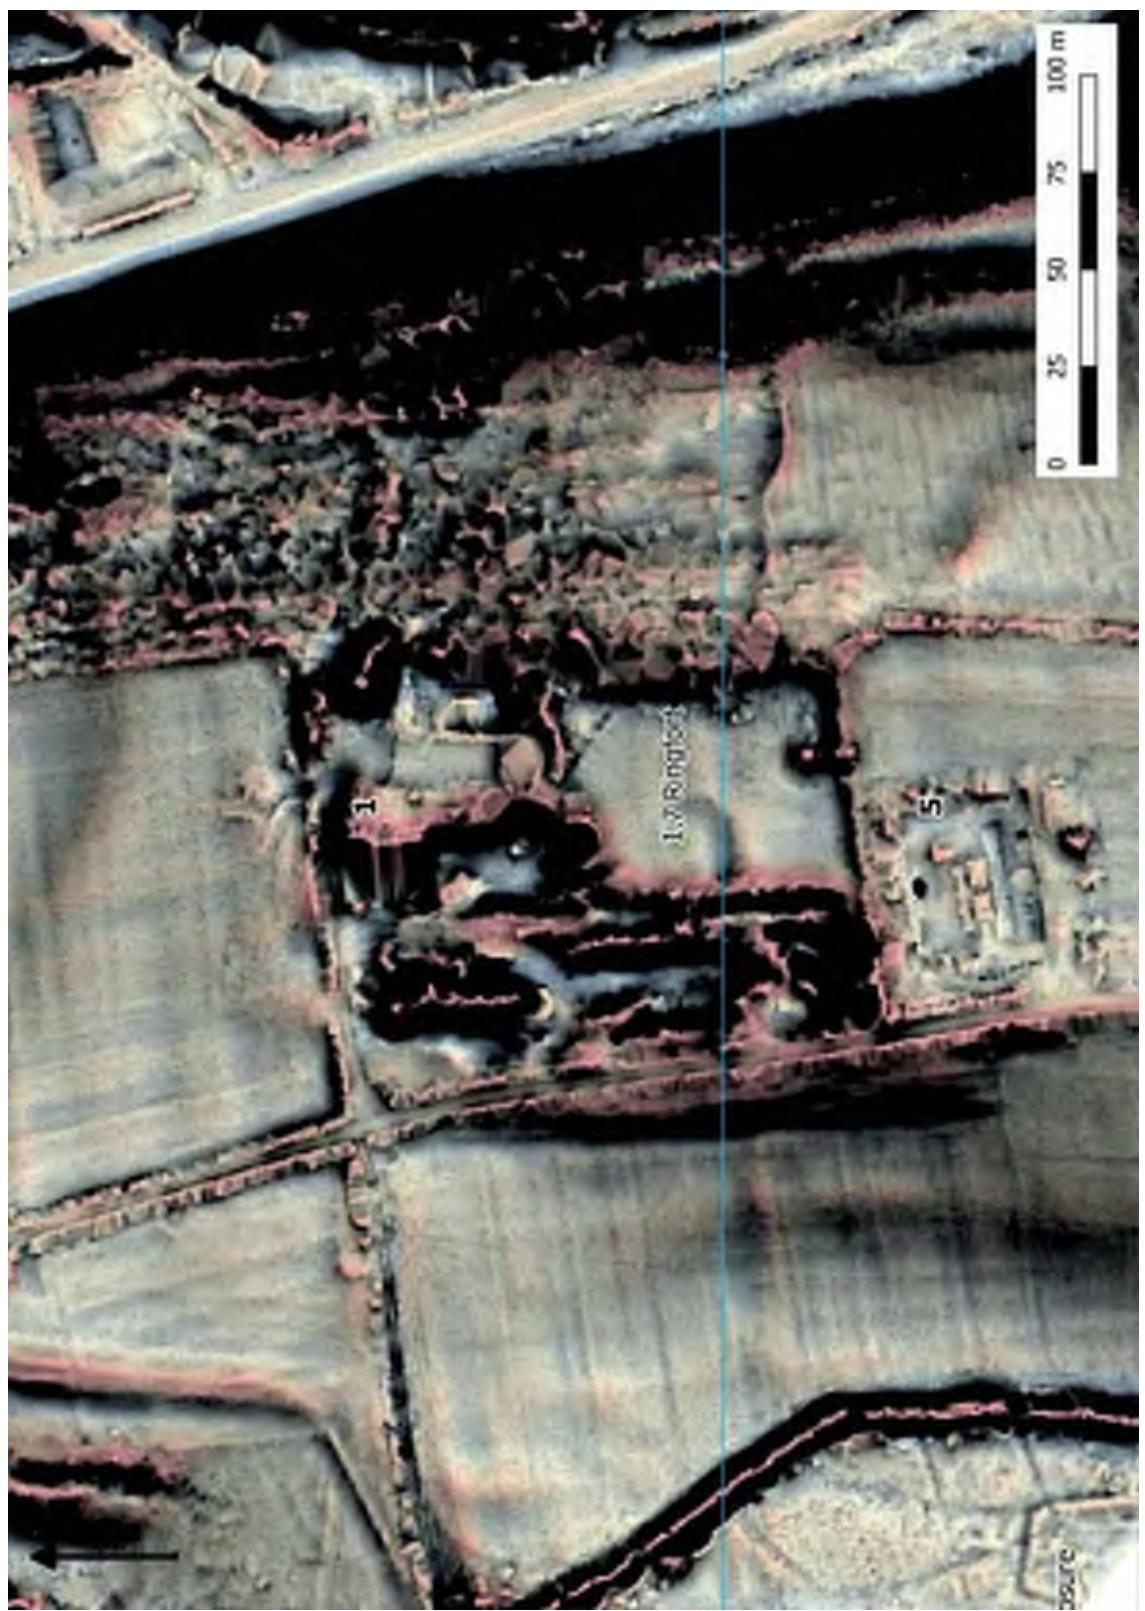

Feature 1.3. Very low profile circular enclosure, probable ringfort. 22.4 m diameter. Not visible in AP or 6-inch mapping. LRM over SVF image.

Feature 1.4. Rectangular field and raised linear bank, possibly associated with demesne of Corgrig Castle. 55 x 25 m. LRM over SVF image.

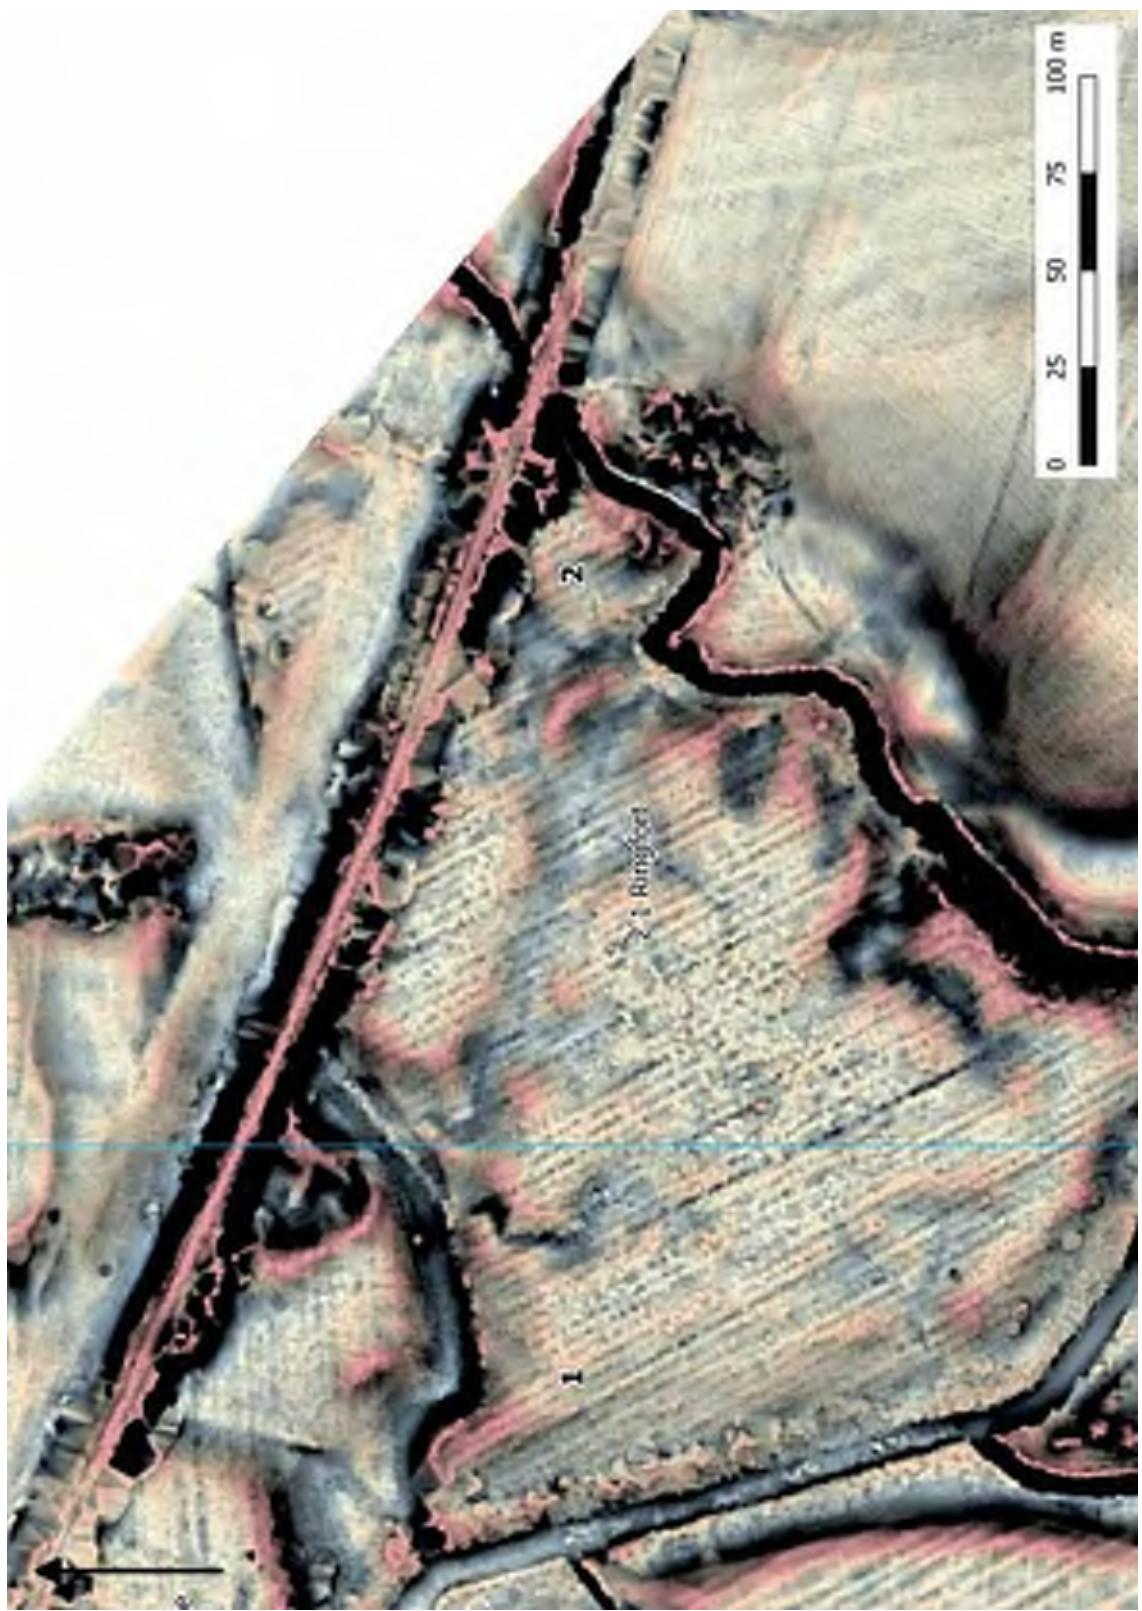

Feature 1.5. Oval raised area, possibly modified natural platform. Truncated to NE by railroad. Dimensions 56.4×41.5 m.
Feature 1.6. Long, curving bank, possible forming SW portion of a large enclosure. LRM over SVF image.

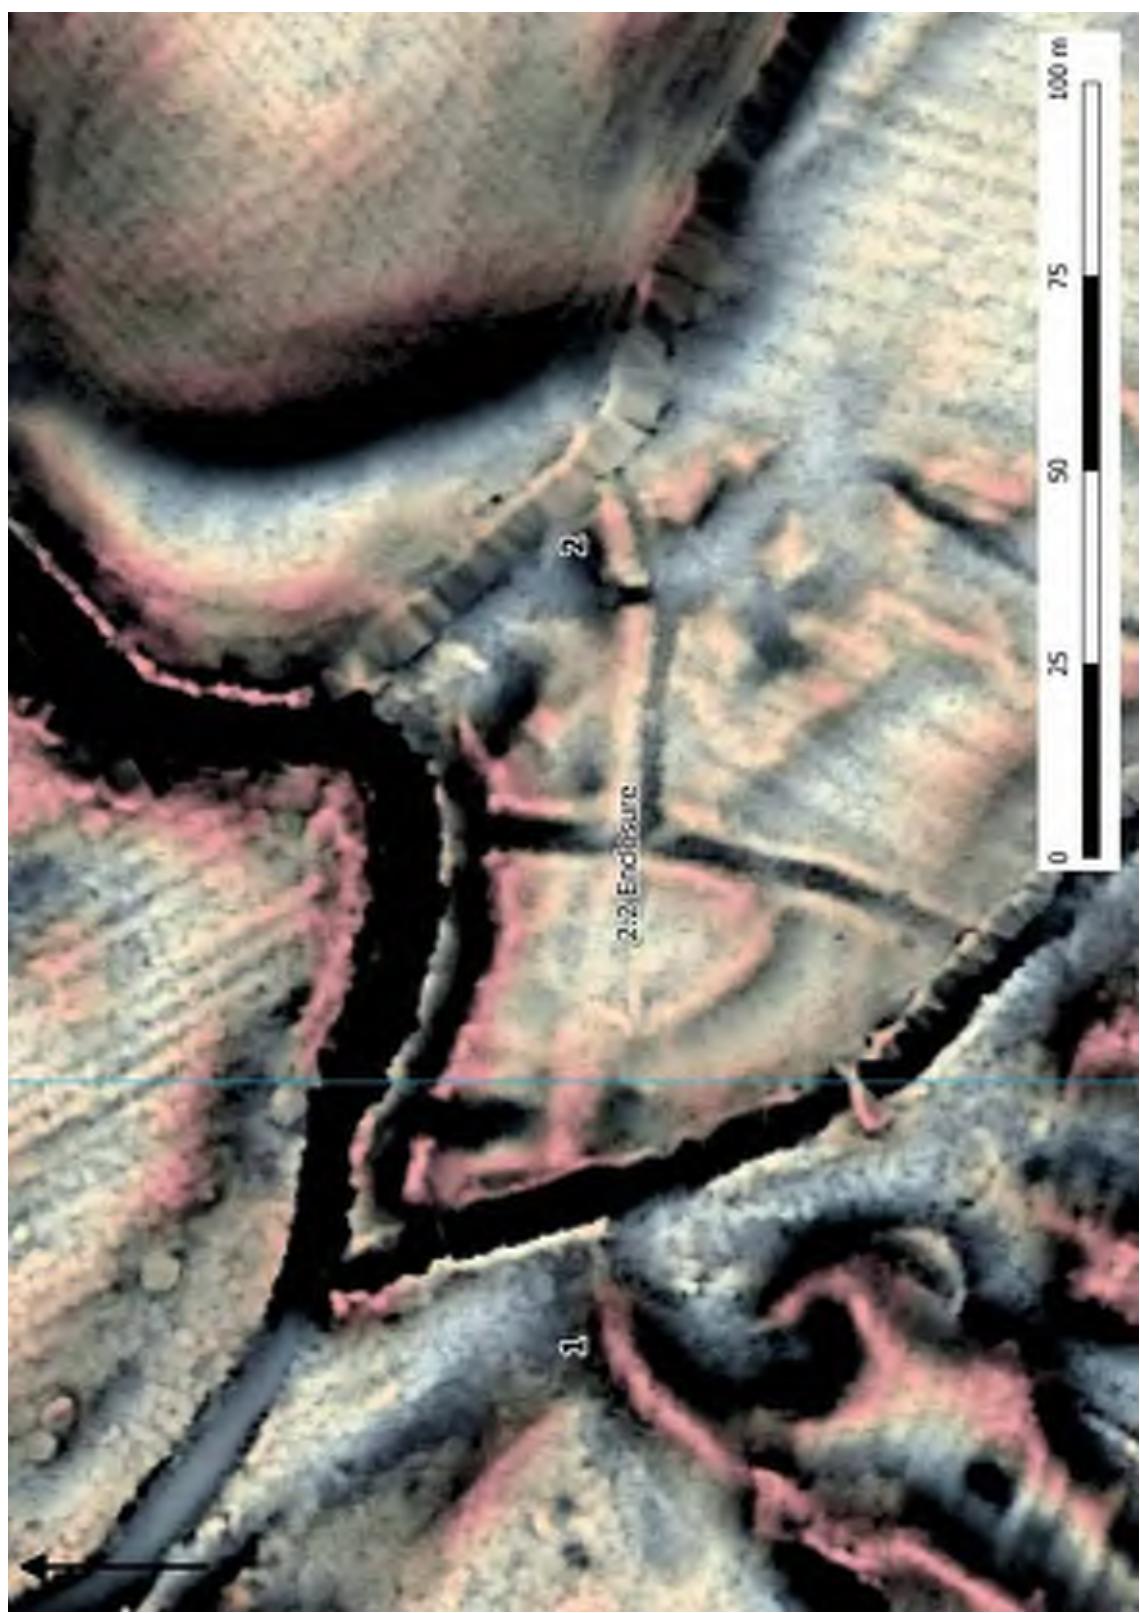

Feature 1.7. Small enclosure, truncated to west by modern farm buildings. 24 m diameter. Probable ringfort. LRM over SVF image.

Grid 2

Feature 2.1. Small, univallate ringfort, c. 34 m diameter. LRM over SVF image.

Feature 2.2. Possible ringfort. Oval, dimensions 22 m NE-SW, 29 m NW-SE. LRM over SVF image.

Feature 2.3. Settlement cluster, medieval or post-medieval. Comprising a well-defined rectangular enclosure (possible bawn), 70 m NE-SW, 50 m NW-SE, with a smaller enclosure to the SW, 21 m NE-SW, 29 m NW-SE. Suggestions of hollow-ways connecting site to the NW. LRM over SVF image. See also Fig. 9.

Feature 2.4. Apparent settlement cluster aligned along roadway, comprising three rectangular plots with associated ridge and furrow cultivation. 79 x 27 m. Scheme orthophotography.

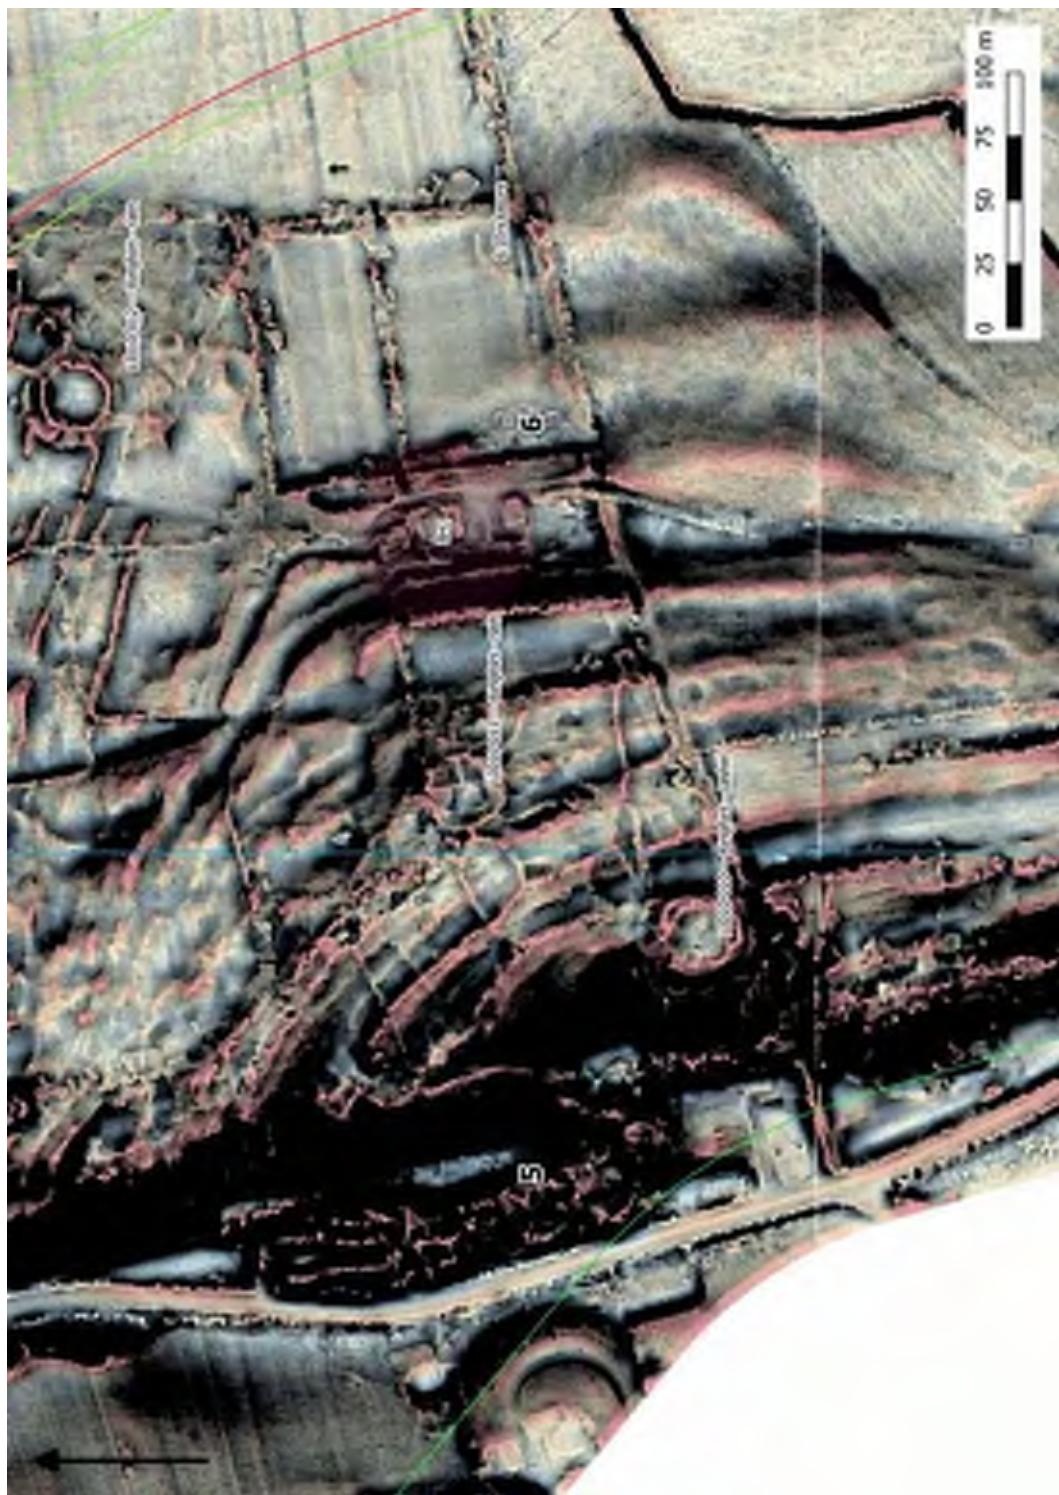

Feature 2.4. Apparent settlement cluster aligned along roadway, comprising three rectangular plots with associated ridge and furrow cultivation. 79 x 27 m. LRM over SVF image.

Grid 5

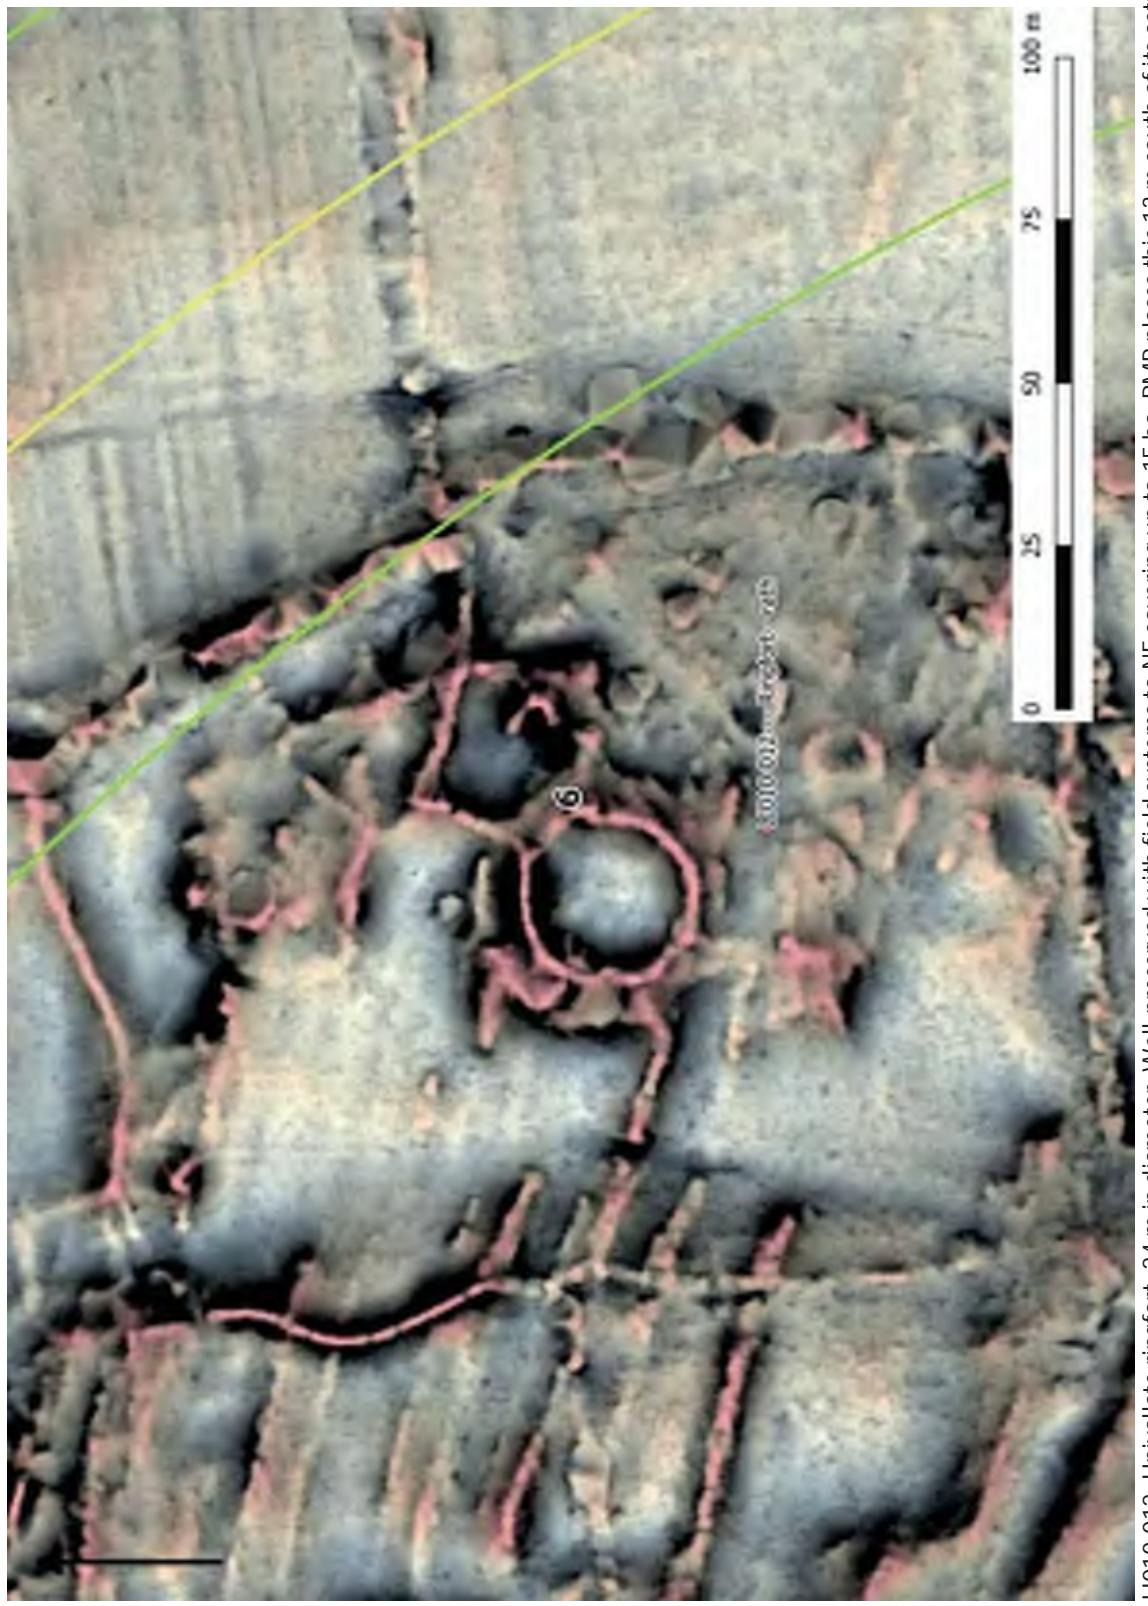

L010-010. Ringfort, 27.5 x 21 m diameter, under heavy woodland. Possibly bivallate.

L010-011. Univallate ringfort, 27 m in diameter. Well-preserved with field systems on all sides. Part of potentially an important complex of enclosures covering c. 15 ha. 6 inch series, showing previously identified Built Heritage asset BH1.

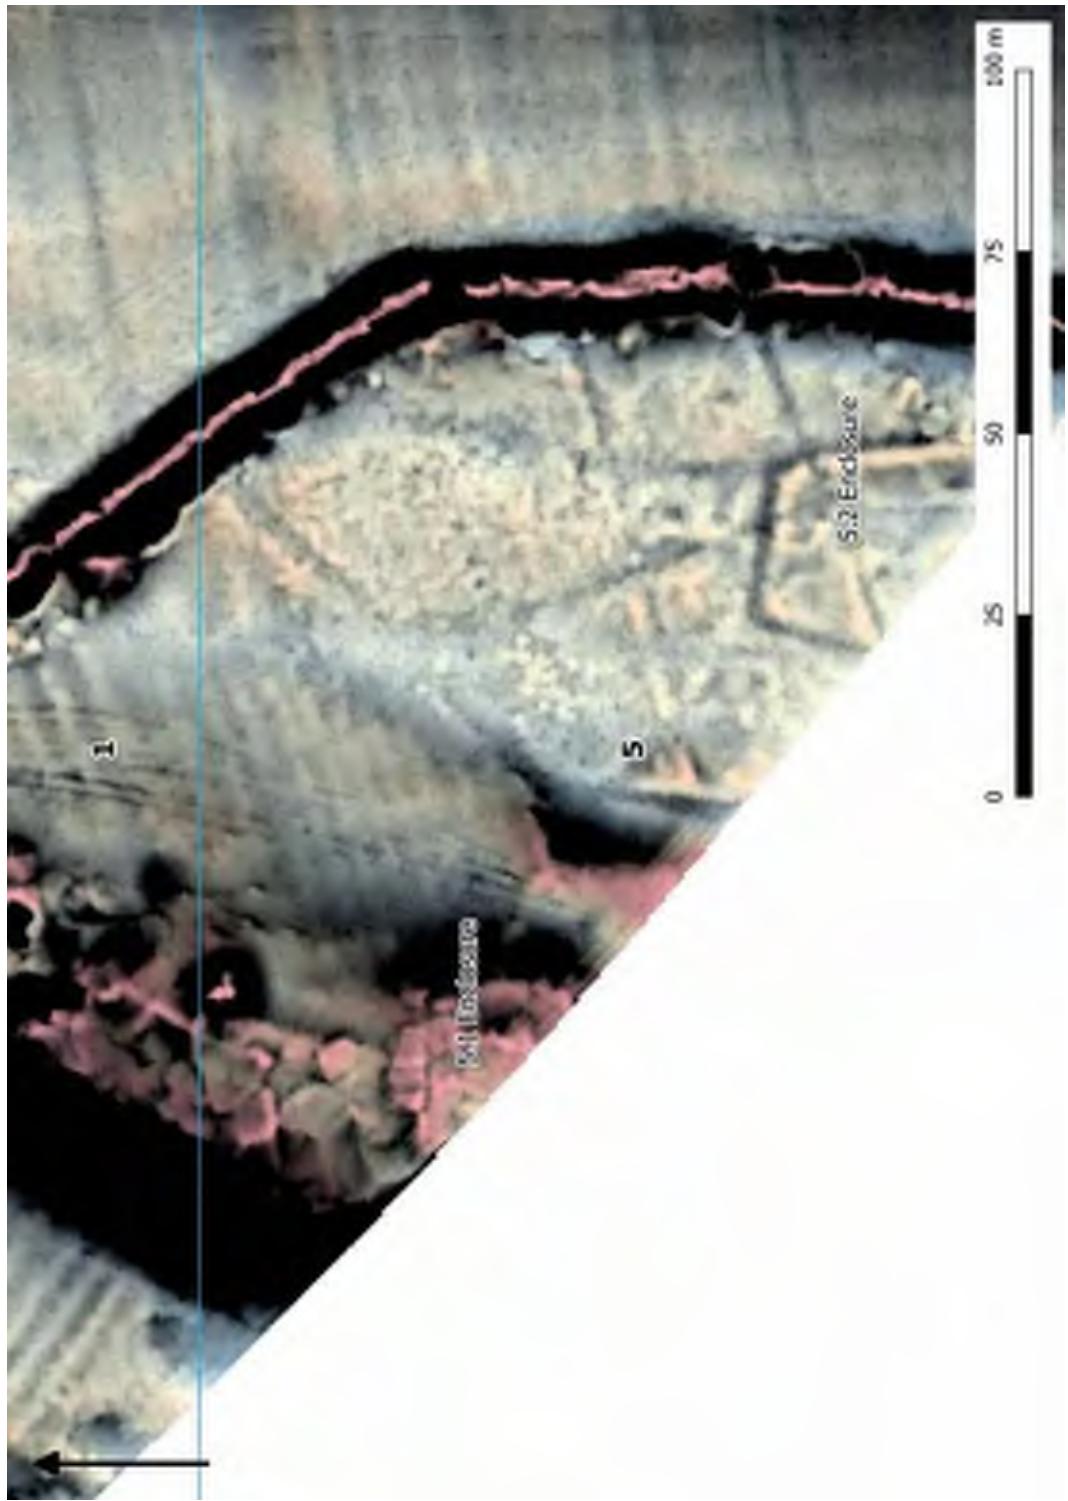

L1010-010. Ringfort, 27.5 x 21 m diameter, under heavy woodland. Possibly bivallate.
L1010-011. Univallate ringfort, 27 m in diameter. Well-preserved with field systems on all sides. Part of potentially an important complex of enclosures. LRM over SVF

L1010-012. Univallate ringfort, 24 m in diameter. Well-preserved with field systems to NE covering up to 15 ha. RMP places this 13 m south of its actual location. ITM: 526436 650290. LRM over SVF image.

Feature 5.1. Probable ringfort at edge of dataset, 27 m diameter. Visible in AP, possibly a landscape feature.
Feature 5.2. Small trapezoidal ditched enclosure, c. 27 x 29 m. Possible moated site. Scheme orthophotography.

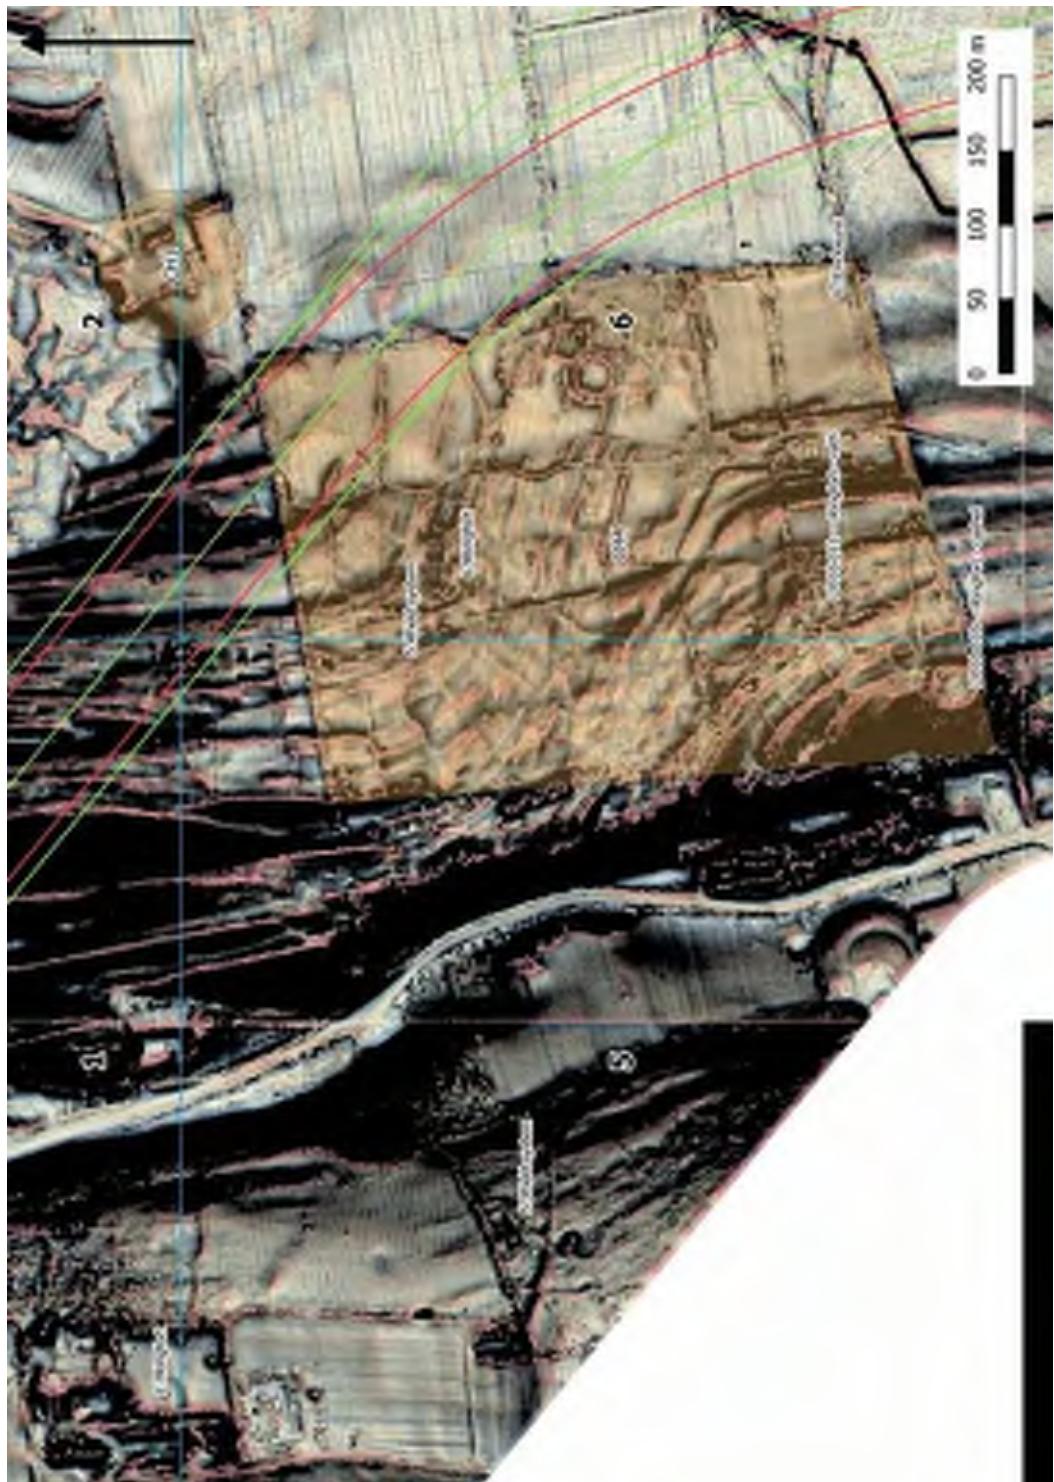

Feature 5.1. Probable ringfort at edge of dataset, 27 m diameter. Visible in AP, possibly a landscape feature.
Feature 5.2. Small trapezoidal ditched enclosure, c. 27 x 29 m. Possible moated site. LRM over SVF image.

Feature 5.3. Field system, defined by multiple walls, some visible in AP.

Feature 5.4. Extensive and potentially significant field system, perhaps associated with LI010-012 and extending as far as LI010-010 and LI010-011. LRM over 16-direction hillshade. Green line to SW denotes border of 1km road corridor. Scheme orthophotography.

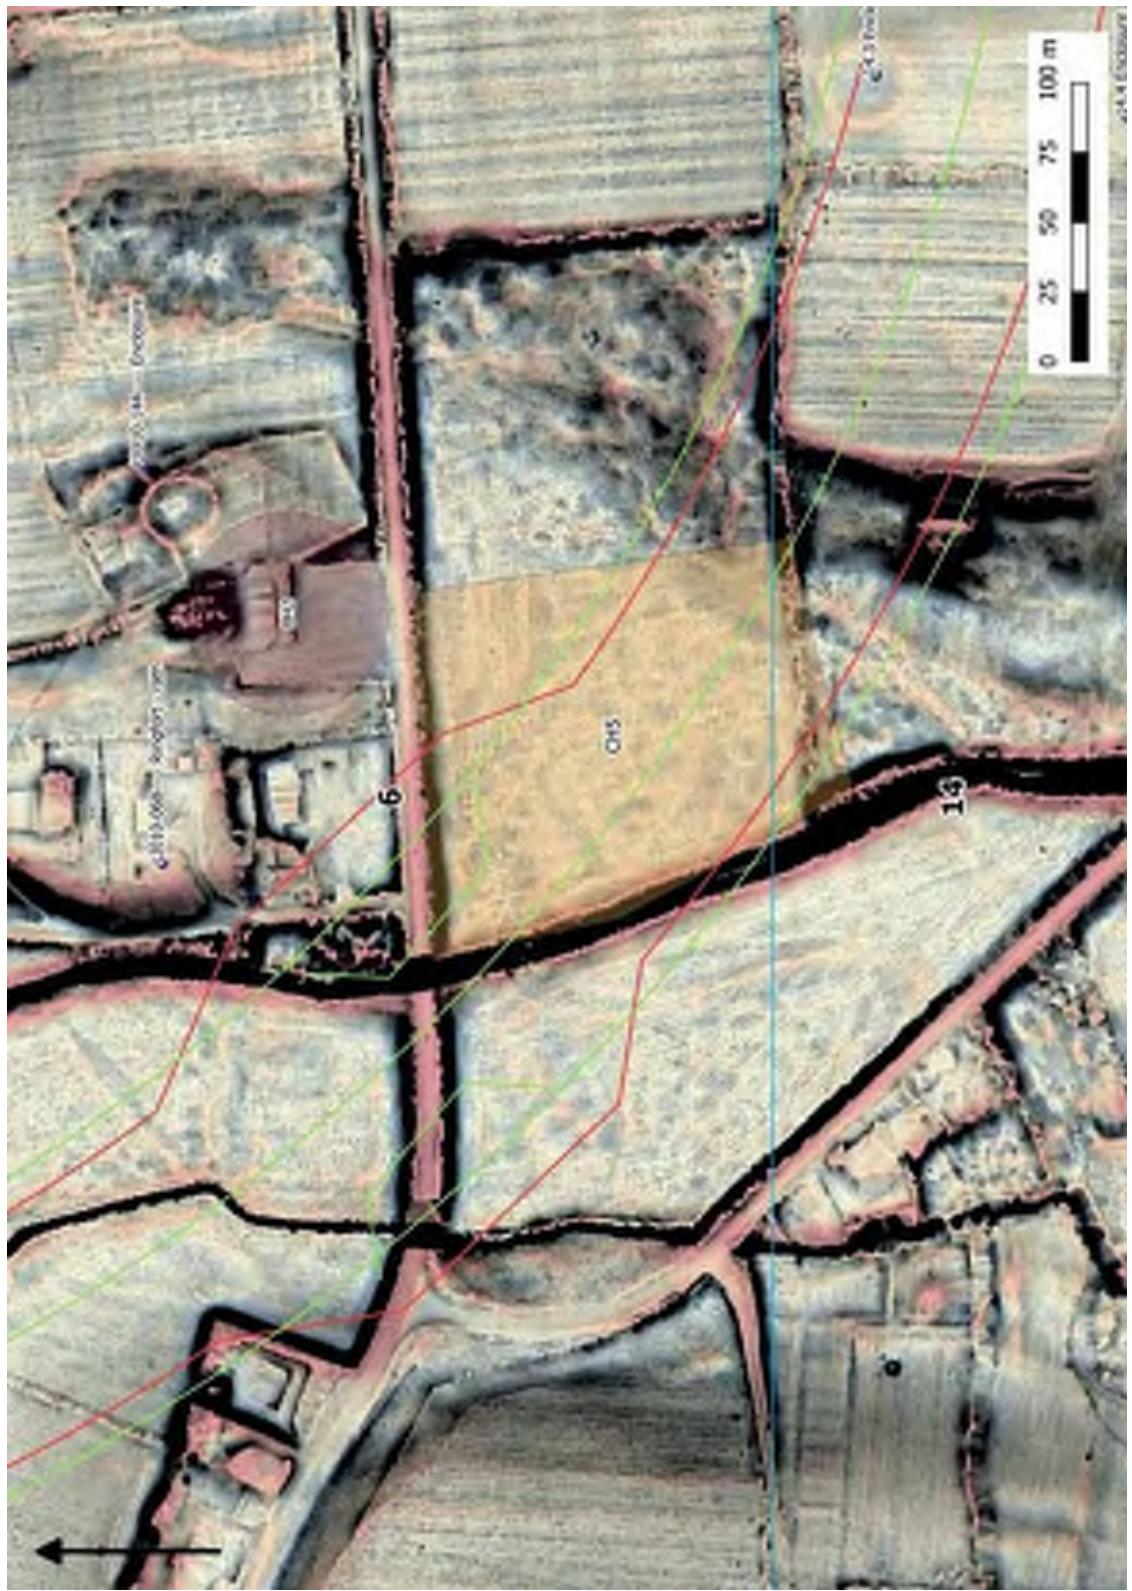

Feature 5.3. Field system, defined by multiple walls, some visible in AP.

Feature 5.4. Extensive and potentially significant field system, perhaps associated with LI010-012 and extending as far as LI010-010 and LI010-011. LRM over 16-direction hillshade. See also Fig. 10.

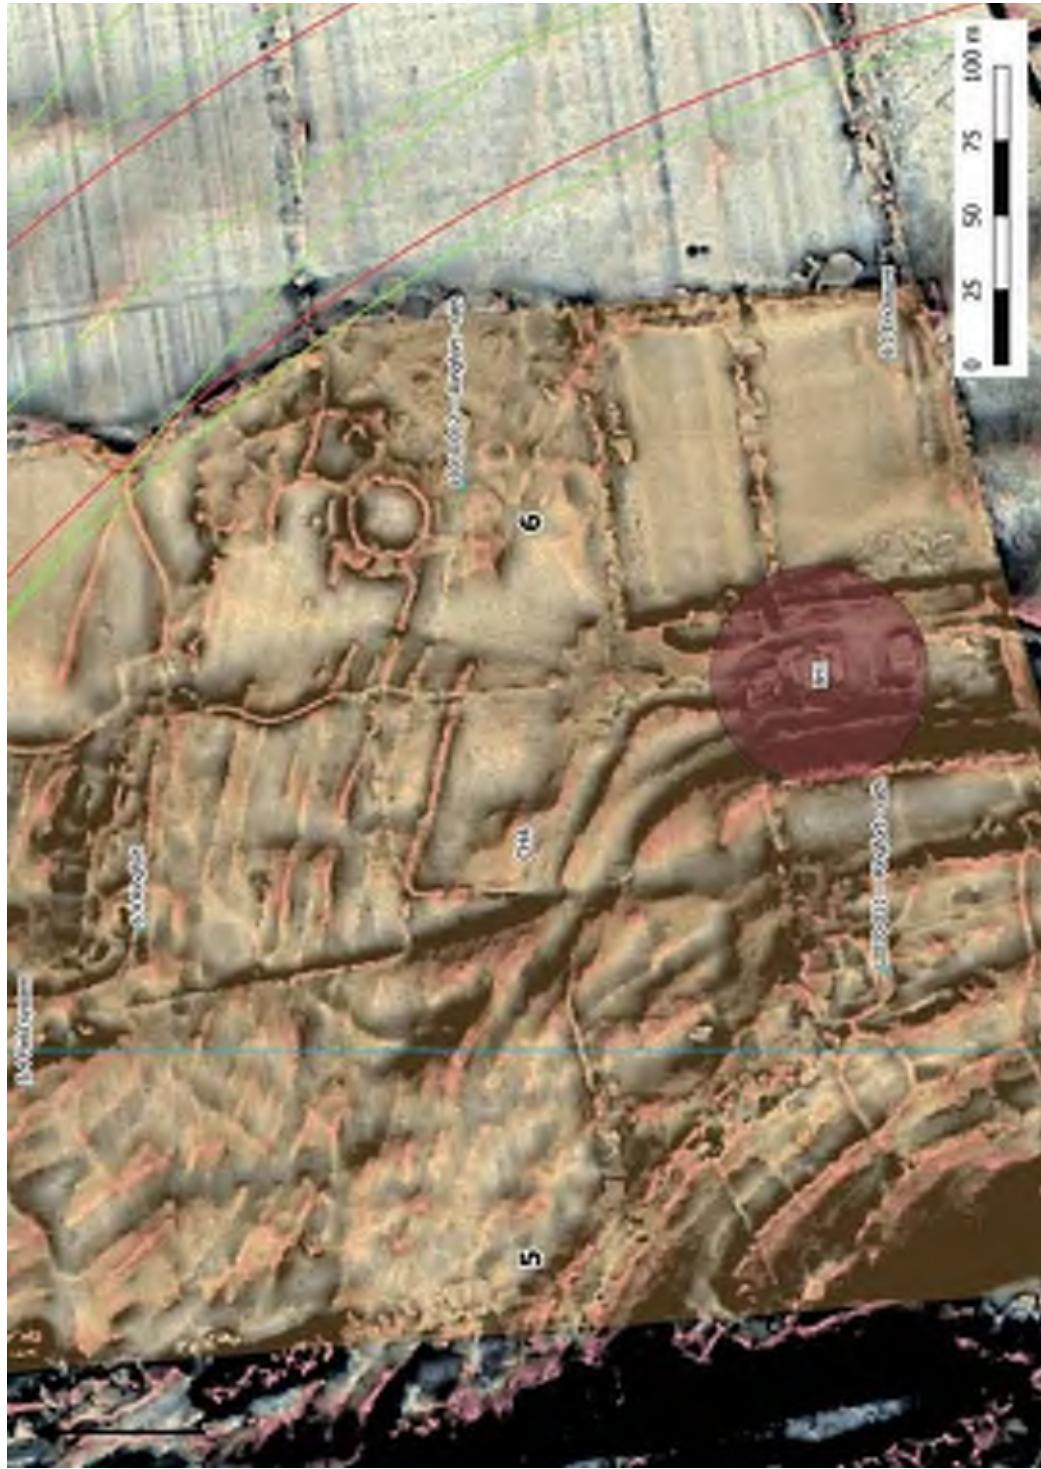

Grid 6

Grid 6, constraint CH5. No trace of above ground features. Scheme orthophotography.

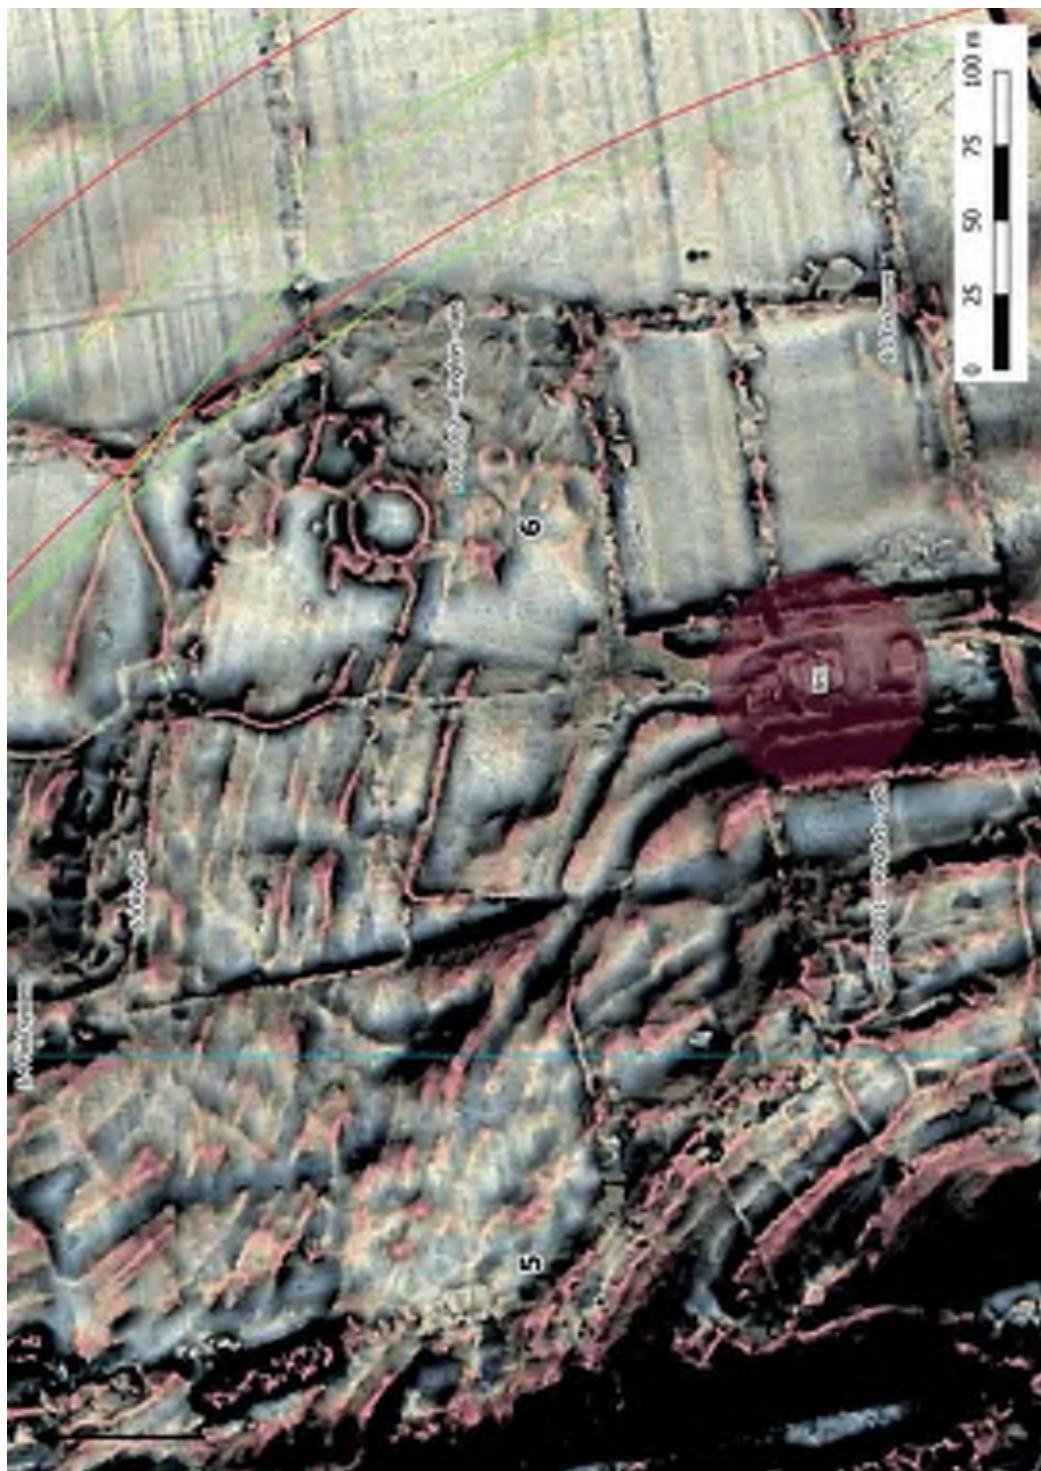

Grid 6, constraint CH5. No trace of above ground features. LRM over SVF.

L1010-010. Ringfort, 27.5 x 21 m diameter, under heavy woodland. Possibly bivallate.

L1010-011. Univallate ringfort, 27 m in diameter. Well-preserved with field systems on all sides. Part of potentially an important complex of enclosures.

L1010-012 (AH1). Univallate ringfort, 24 m in diameter. Well-preserved with field systems to NE. RMP places this 13 m south of its actual location. LRM over SVF image showing previously identified CH asset CH4 and BH1.

L1010-010. Ringfort, 27.5 x 21 m diameter, under heavy woodland. Possibly bivallate.
L1010-011. Univallate ringfort, 27 m in diameter. Well-preserved with field systems on all sides. Part of potentially an important complex of enclosures.
L1010-012 (AH1). Univallate ringfort, 24 m in diameter. Well-preserved with field systems to NE. RMP places this 13 m south of its actual location. LRM over SVF image showing previously identified BH1.

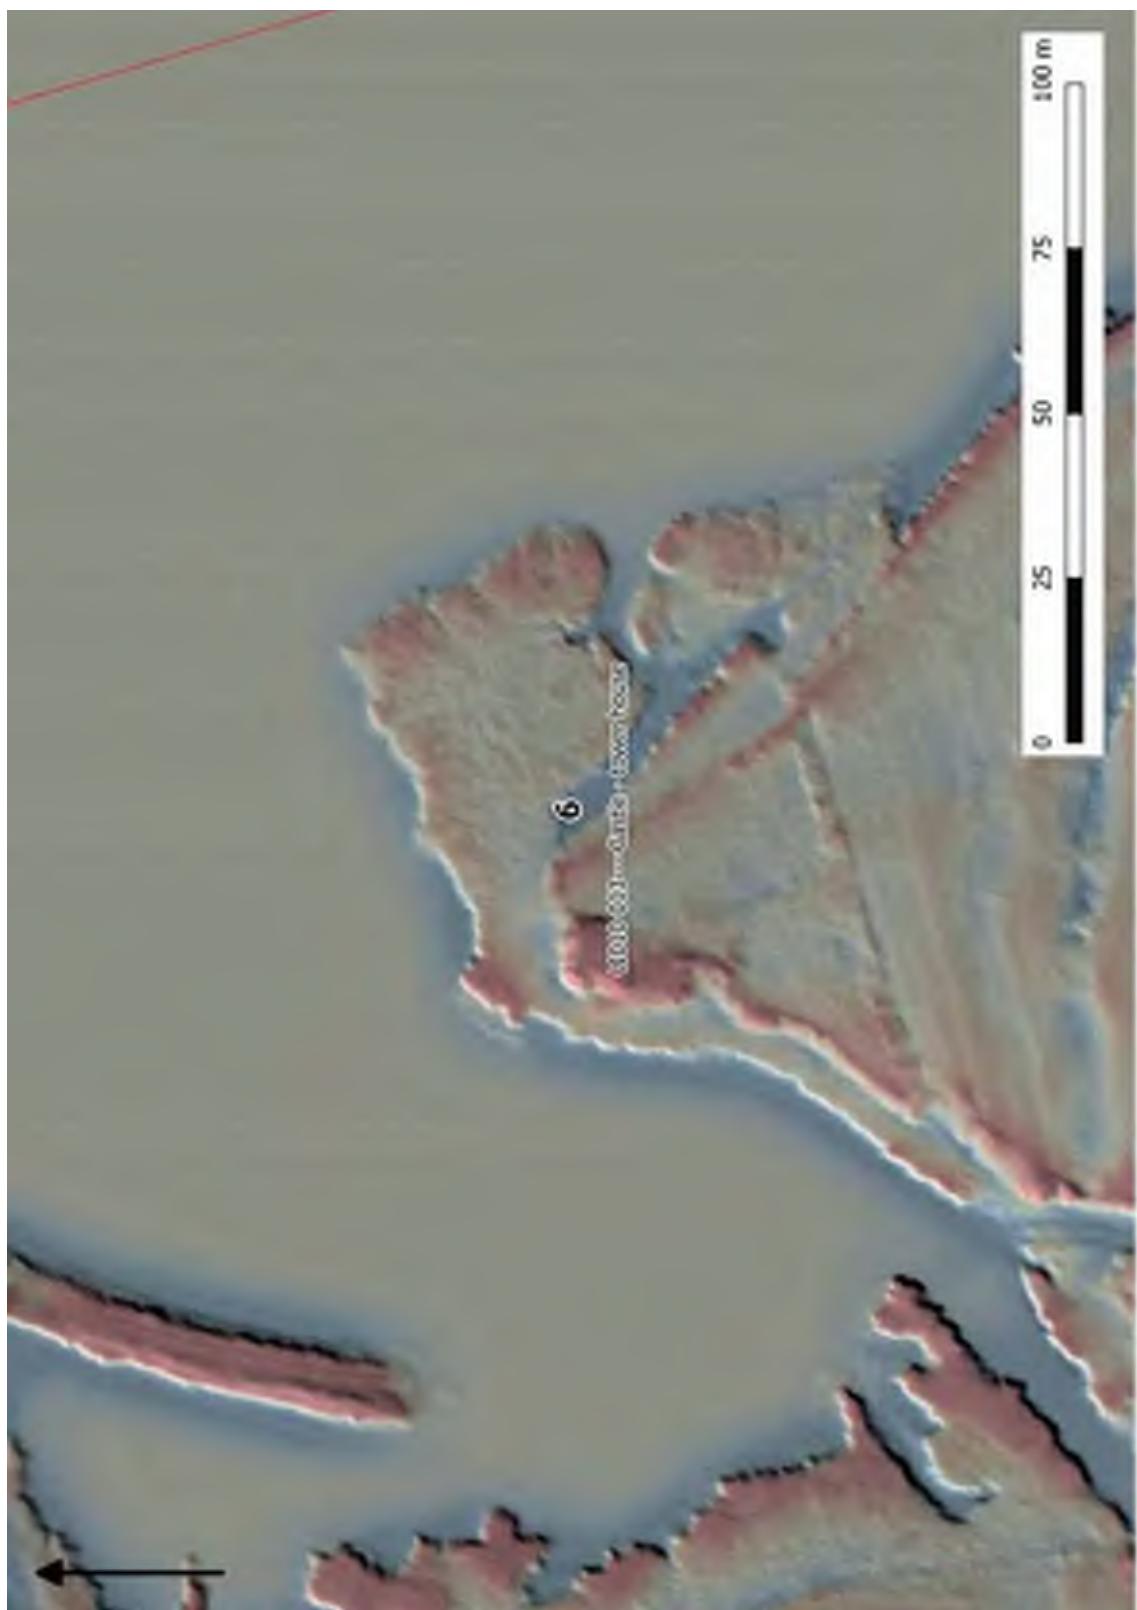

LJ010-012 (AH1). Univallate ringfort, 24 m in diameter. Well-preserved with field systems to NE. RMP places this 13 m south of its actual location. LRM over SVF image.

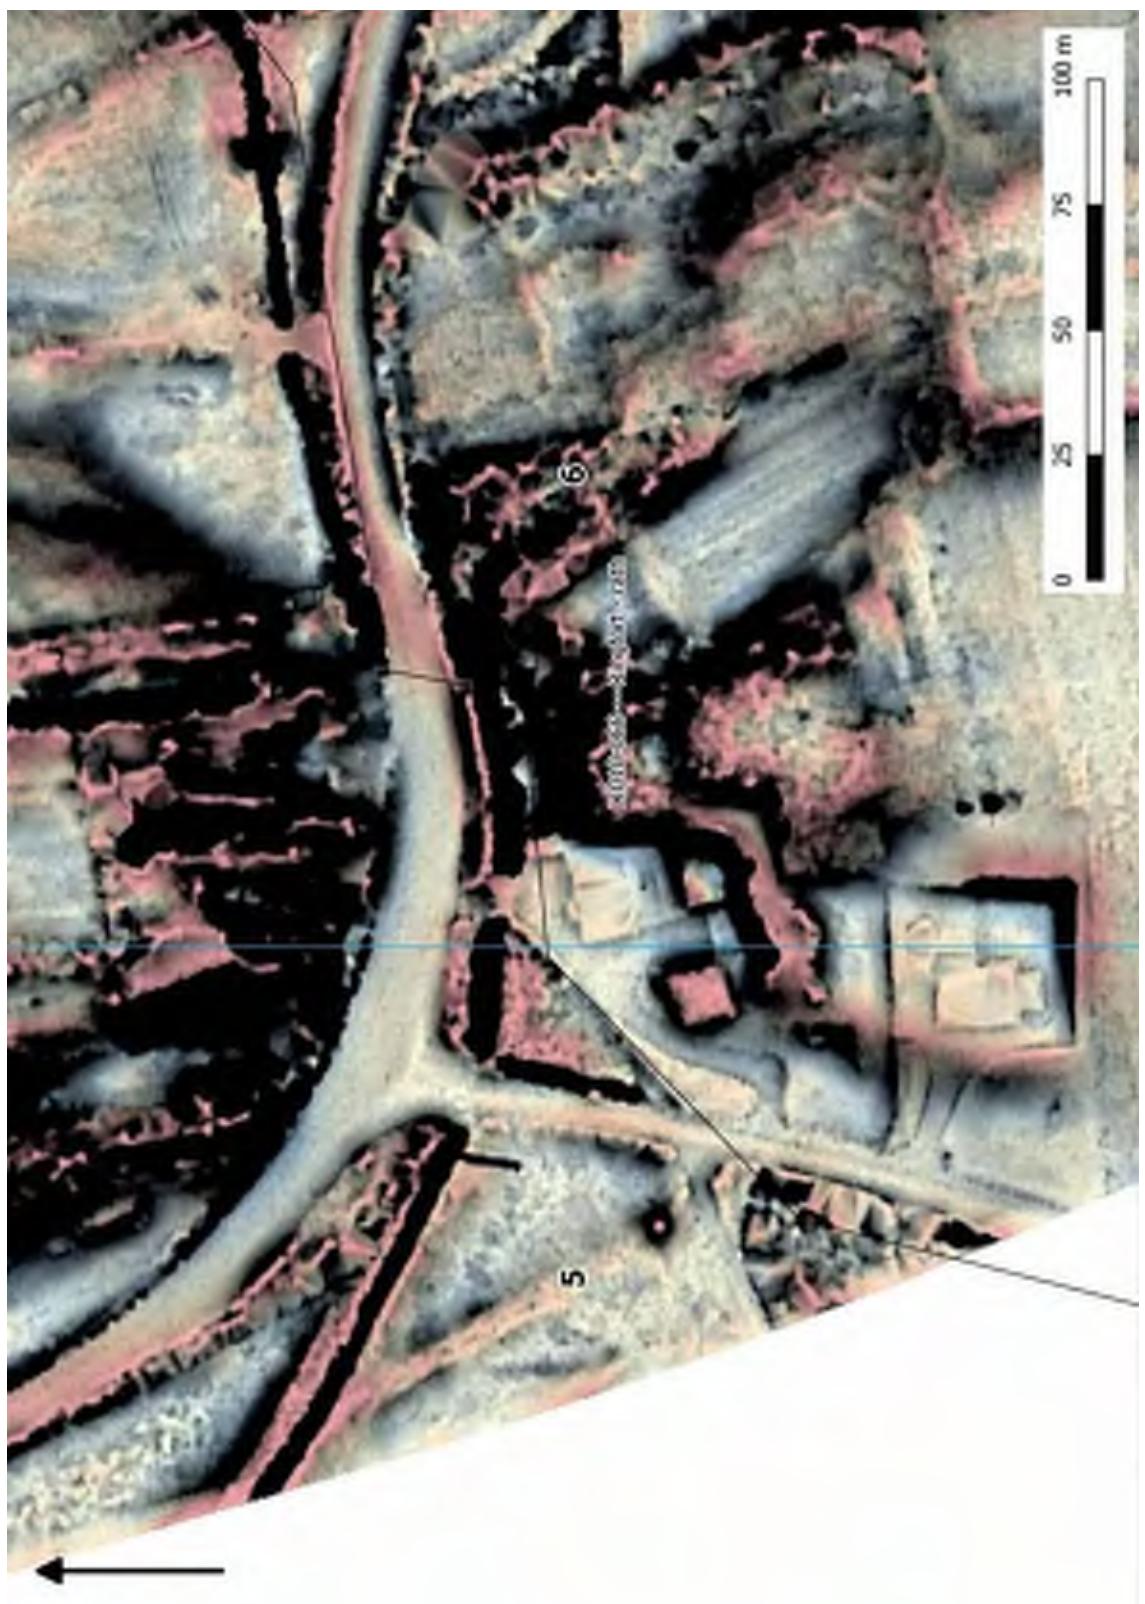

LJ010-013. Robertstown Castle. Very little visible in lidar or APs.

LJ010-013. Robertstown Castle. Very little visible in lidar or APs. Scheme orthophotography.

LJ010-013. Robertstown Castle. Very little visible in lidar or APs. LRM over 16-direction hillshade.

L10-066. Modern house at this location. No visible trace remains of monument. LRM over SVF image

L10-066. Modern house at this location. No visible trace remains of monument. Scheme orthophotography..

LJ010-068 (AH3). Modern house at this location. No visible trace remains of monument. 6-inch mapping.

LJ010-068 (AH3). Modern house at this location. No visible trace remains of monument. Scheme orthophotography.

LJ010-069001 (AH121). Within LJ010-069002. Little of note visible beyond modern graveyard use. Scheme orthophotography.
LJ010-069002 (AH121). Walled graveyard within sub-rectangular enclosure 54 x 47 m. Hollow-way access route visible to NW. Previously identified as BH41

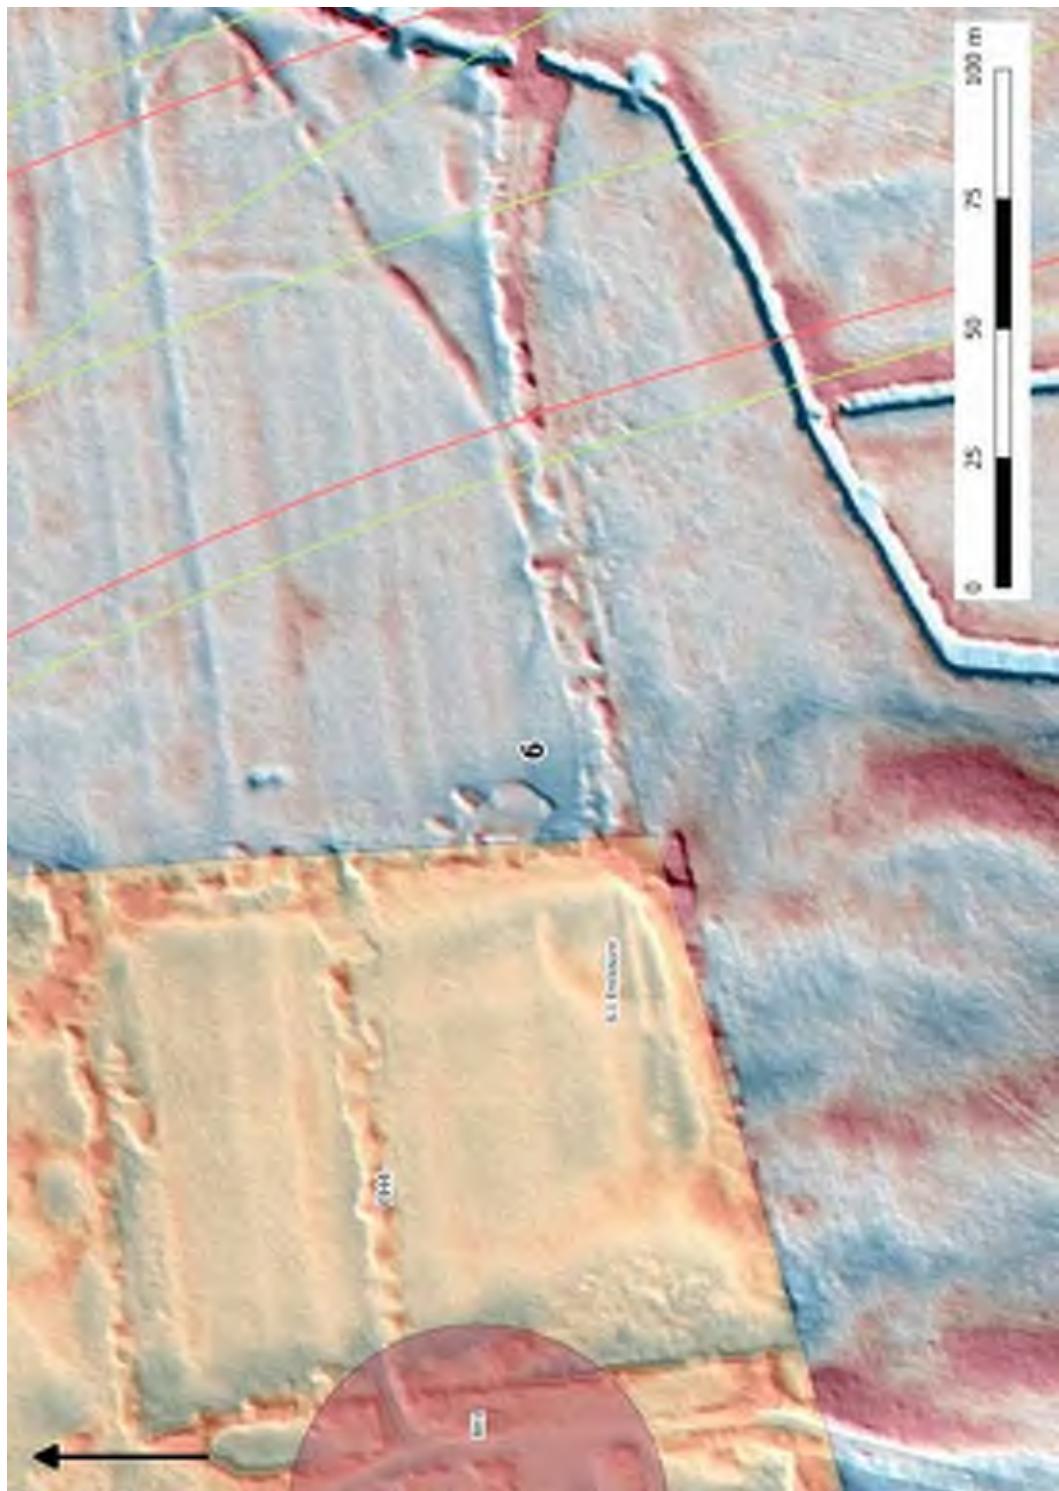

LJ010-069001 (AH121). Within LJ010-069002. Little of note visible beyond modern graveyard use.
LJ010-069002 (AH121). Walled graveyard within sub-rectangular enclosure 54 x 47 m. Hollow-way access route visible to NW. LRM over SY/F image. Previously identified as BH41

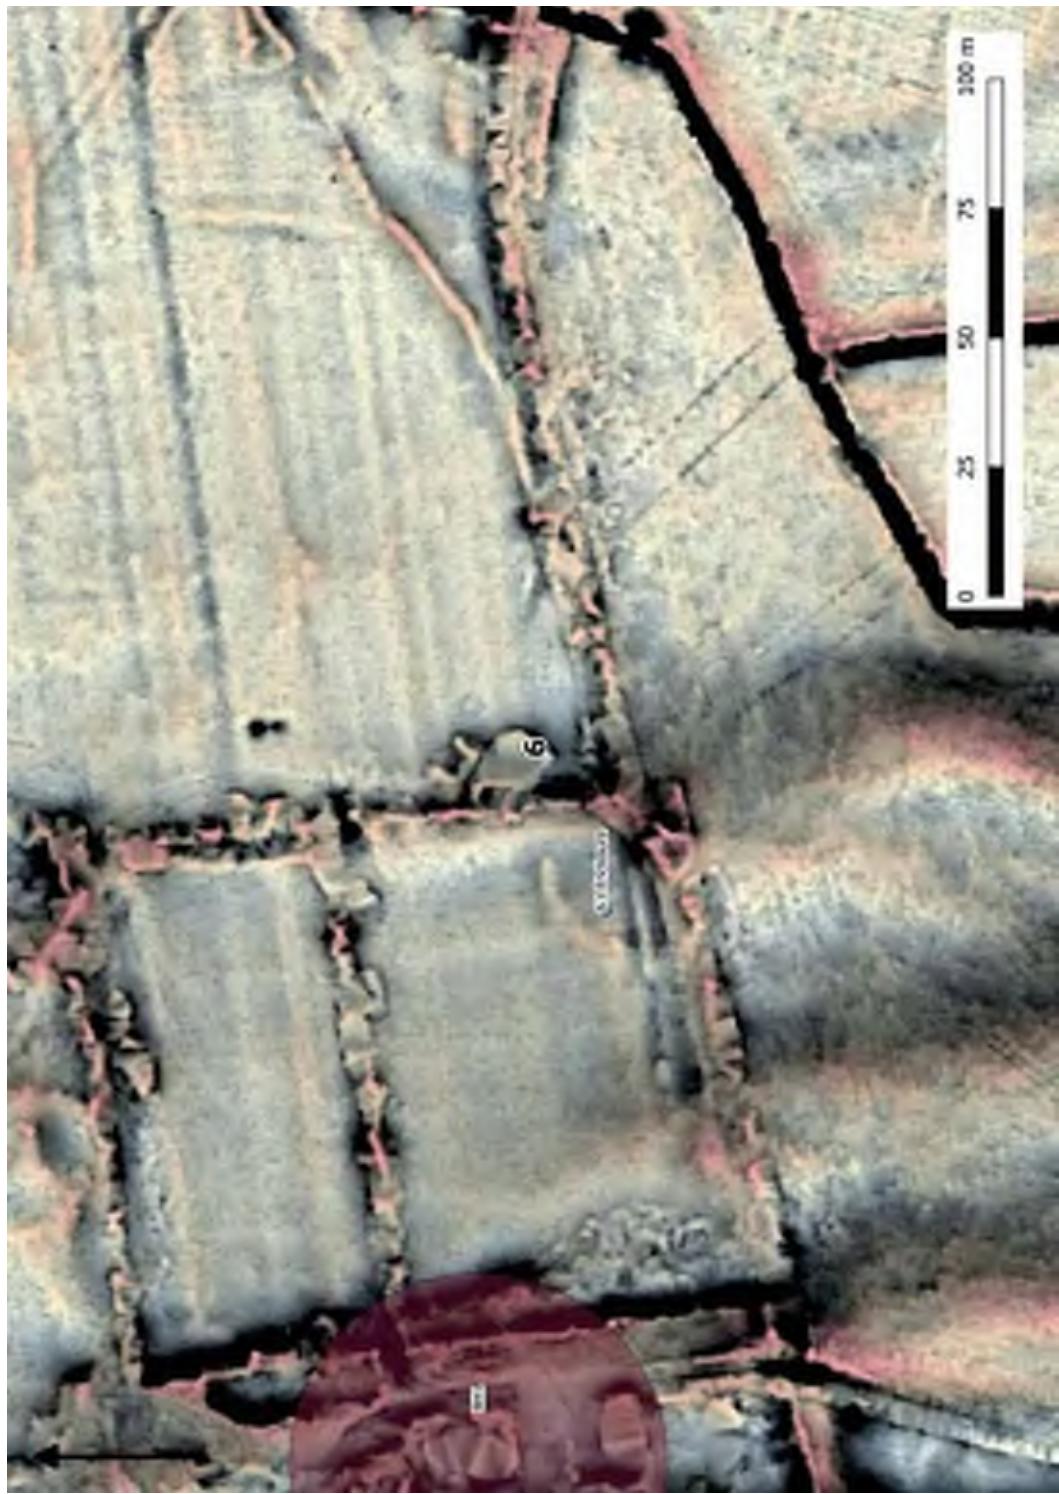

L1010-144 (AH4). Ringfort in pasture, with associated field system to north and possibly SW. 34 m diameter. Possible rectangular building within southern enclosure and conjoined enclosure to north, 24 m diameter. Located to SW of RMP location at ITM 527041 649784. Scheme orthophotography.

L1010-144 (AH4). Ringfort in pasture, with associated field system to north and possibly SW. 34 m diameter. Possible rectangular building within southern enclosure and conjoined enclosure to north, 24 m diameter. Located to SW of RMP location at ITM 527041 649784 LRM over SVF image.

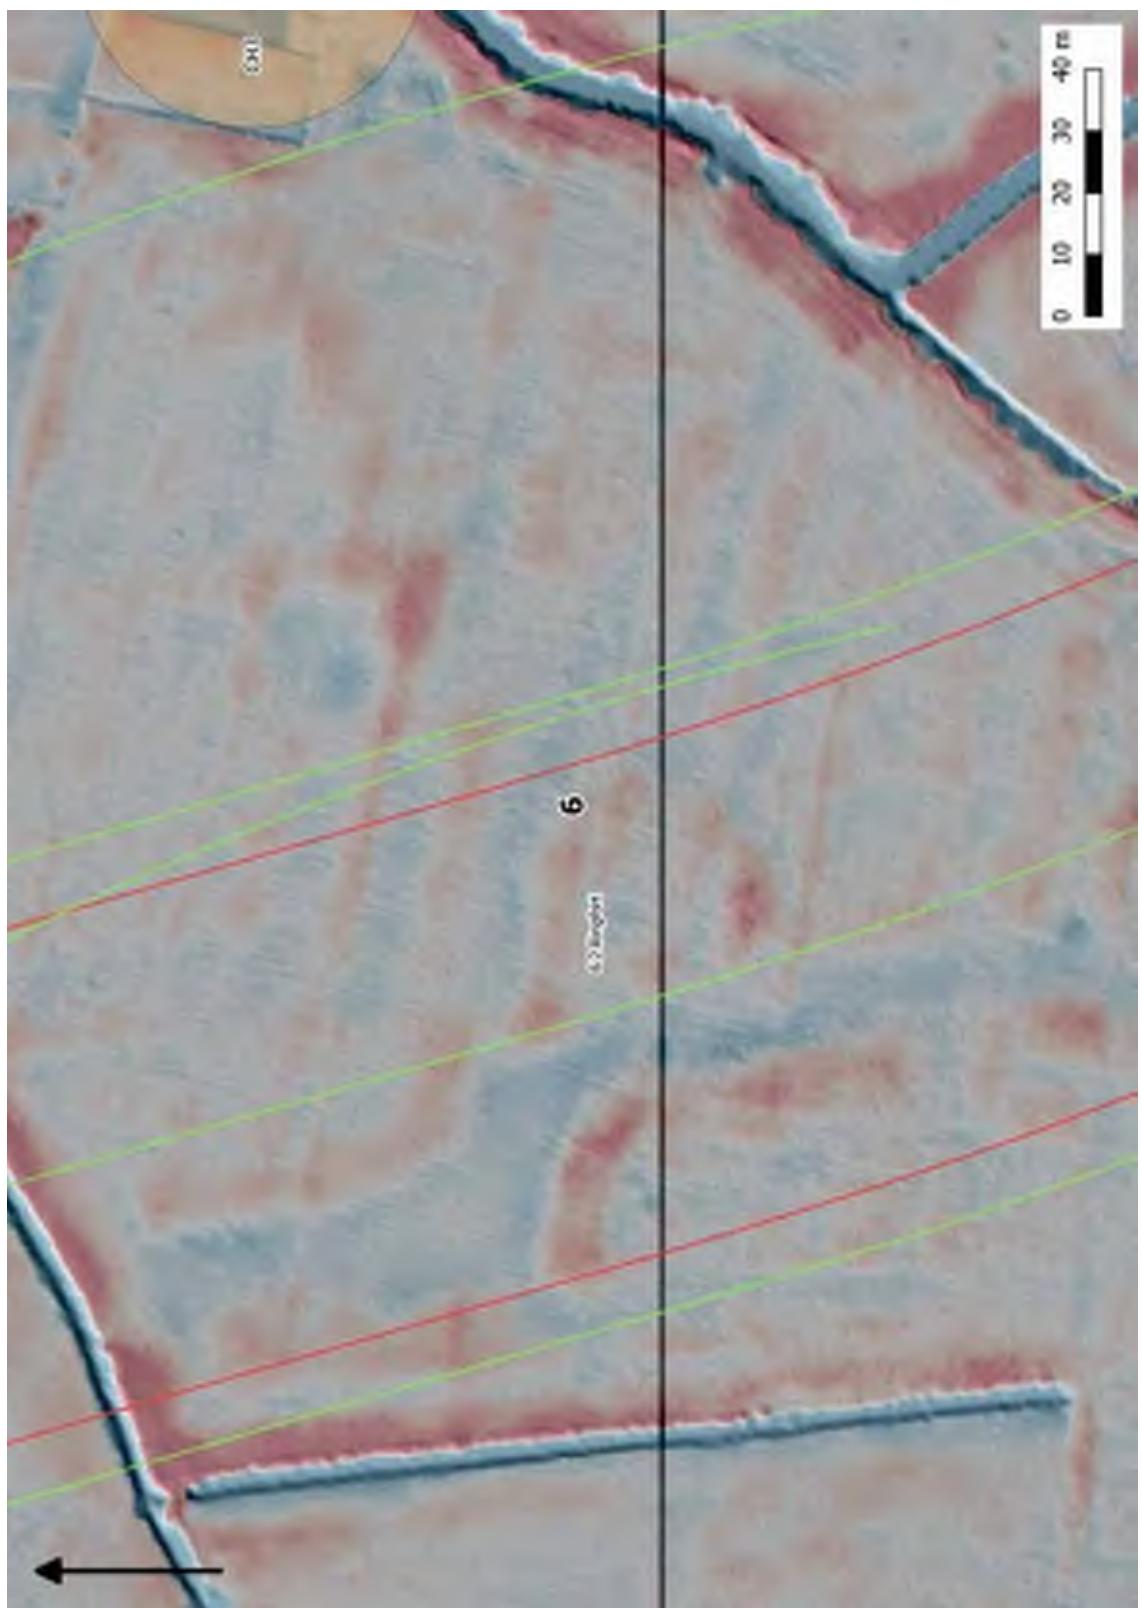

Feature 6.1. Possible ringfort, NW portion only. Defined by curving bank, describing an oval, 30 m along its long axis, showing previously identified assets CH4 and BH1.
LRM over 16-direction hillshade

Feature 6.1. Possible ringfort, NW portion only. Defined by curving bank, describing an oval, 30 m along its long axis. LRM over 16-direction hillshade

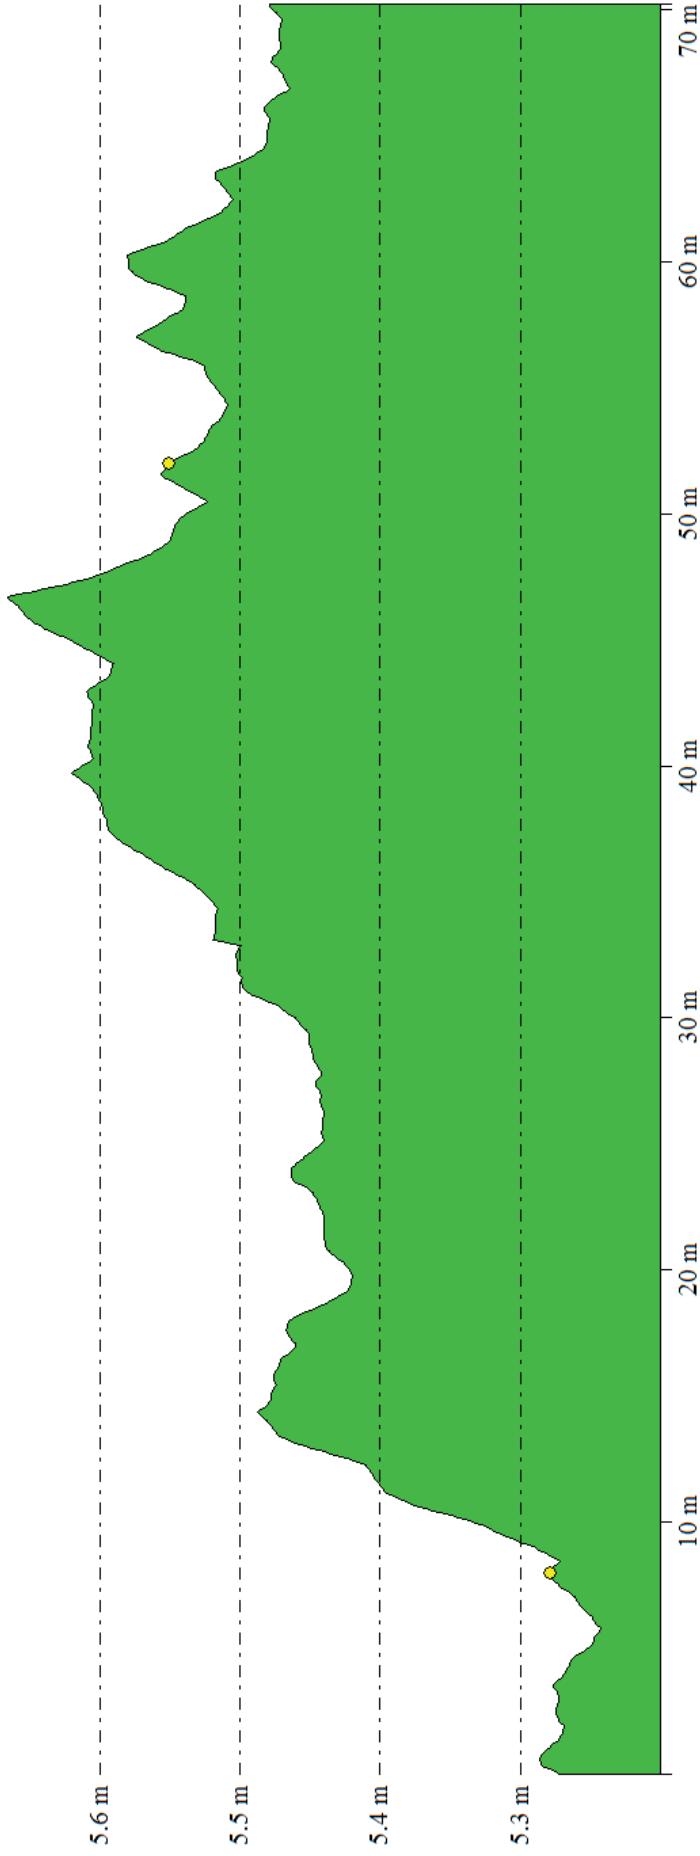

Feature 6.2. Low profile ringfort, apparently truncated to west, probably by field boundary evident in 6-inch mapping. Diameter c. 35.4 m. Scheme orthophotography.

Feature 6.2. Low profile ringfort, apparently truncated to west, probably by field boundary evident in 6-inch mapping. Diameter c. 35.4 m. LRM over 16-direction hillshade.

Feature 18.2. West-East profile of enclosure.

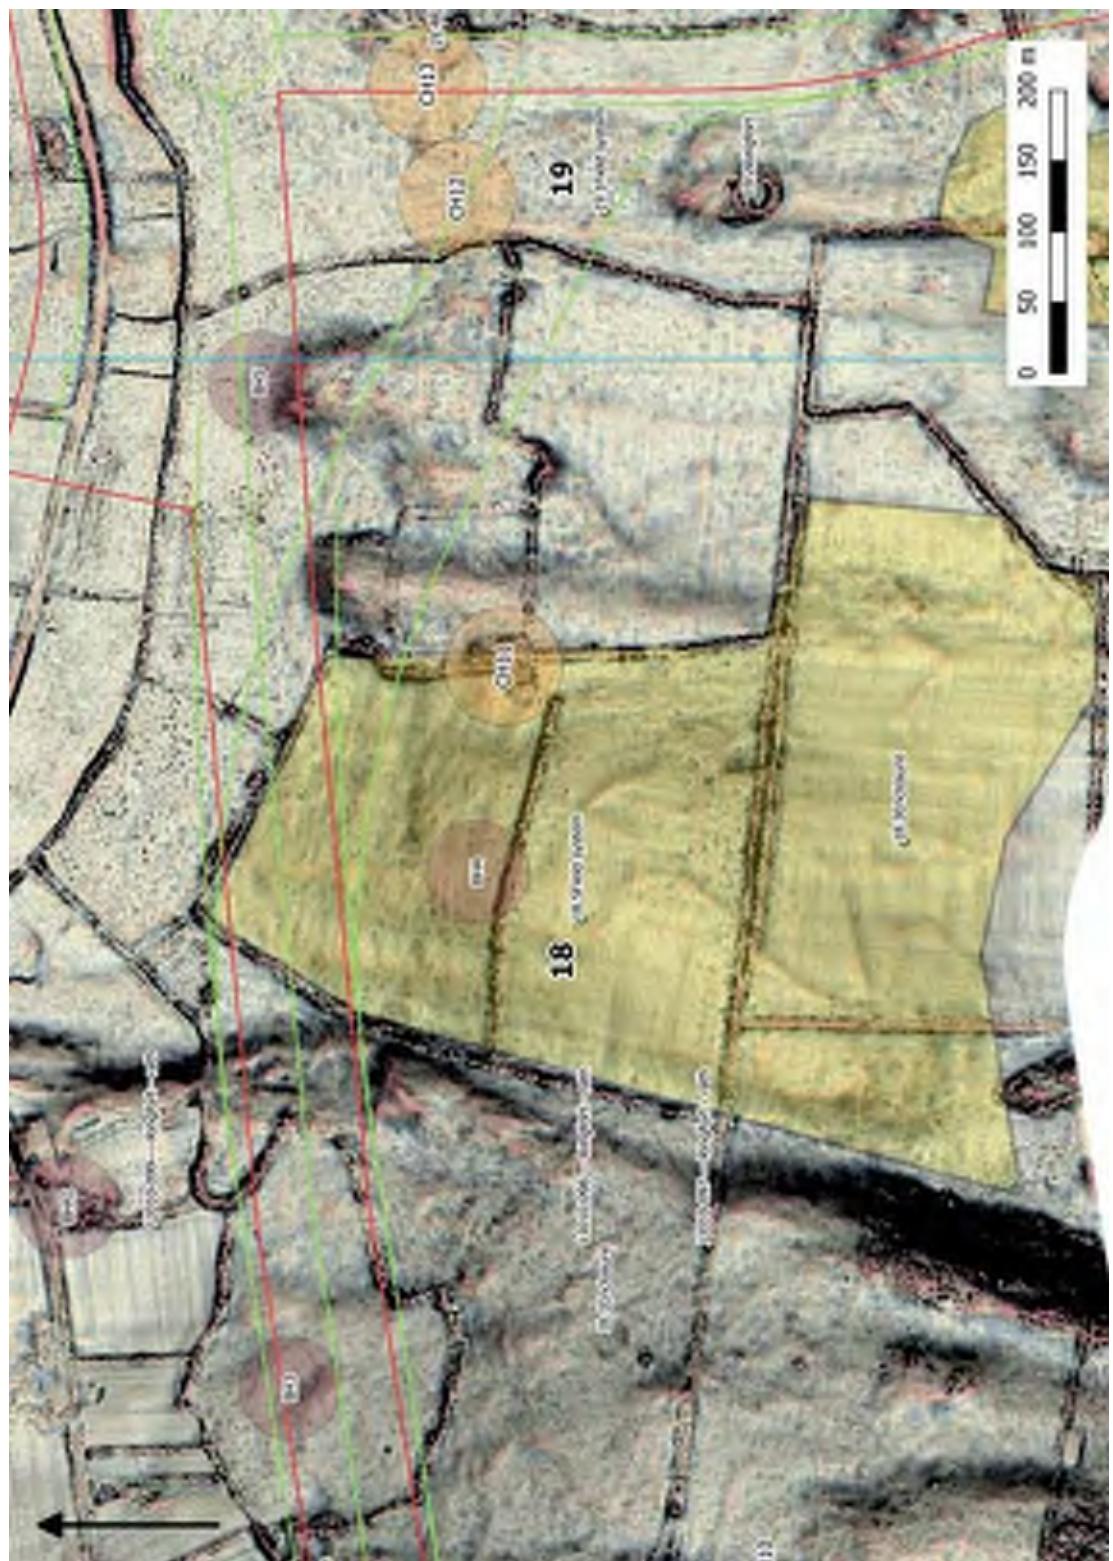

Feature 18.3. Probable ringfort, 37 x 18 m diameter. In context of broader field system. Located within DL1. LRM over SVF image. See Fig. 13.

Feature 18.4. Possible enclosure, 23 x 15 m diameter. Possible quarry. LRM over SVF image.

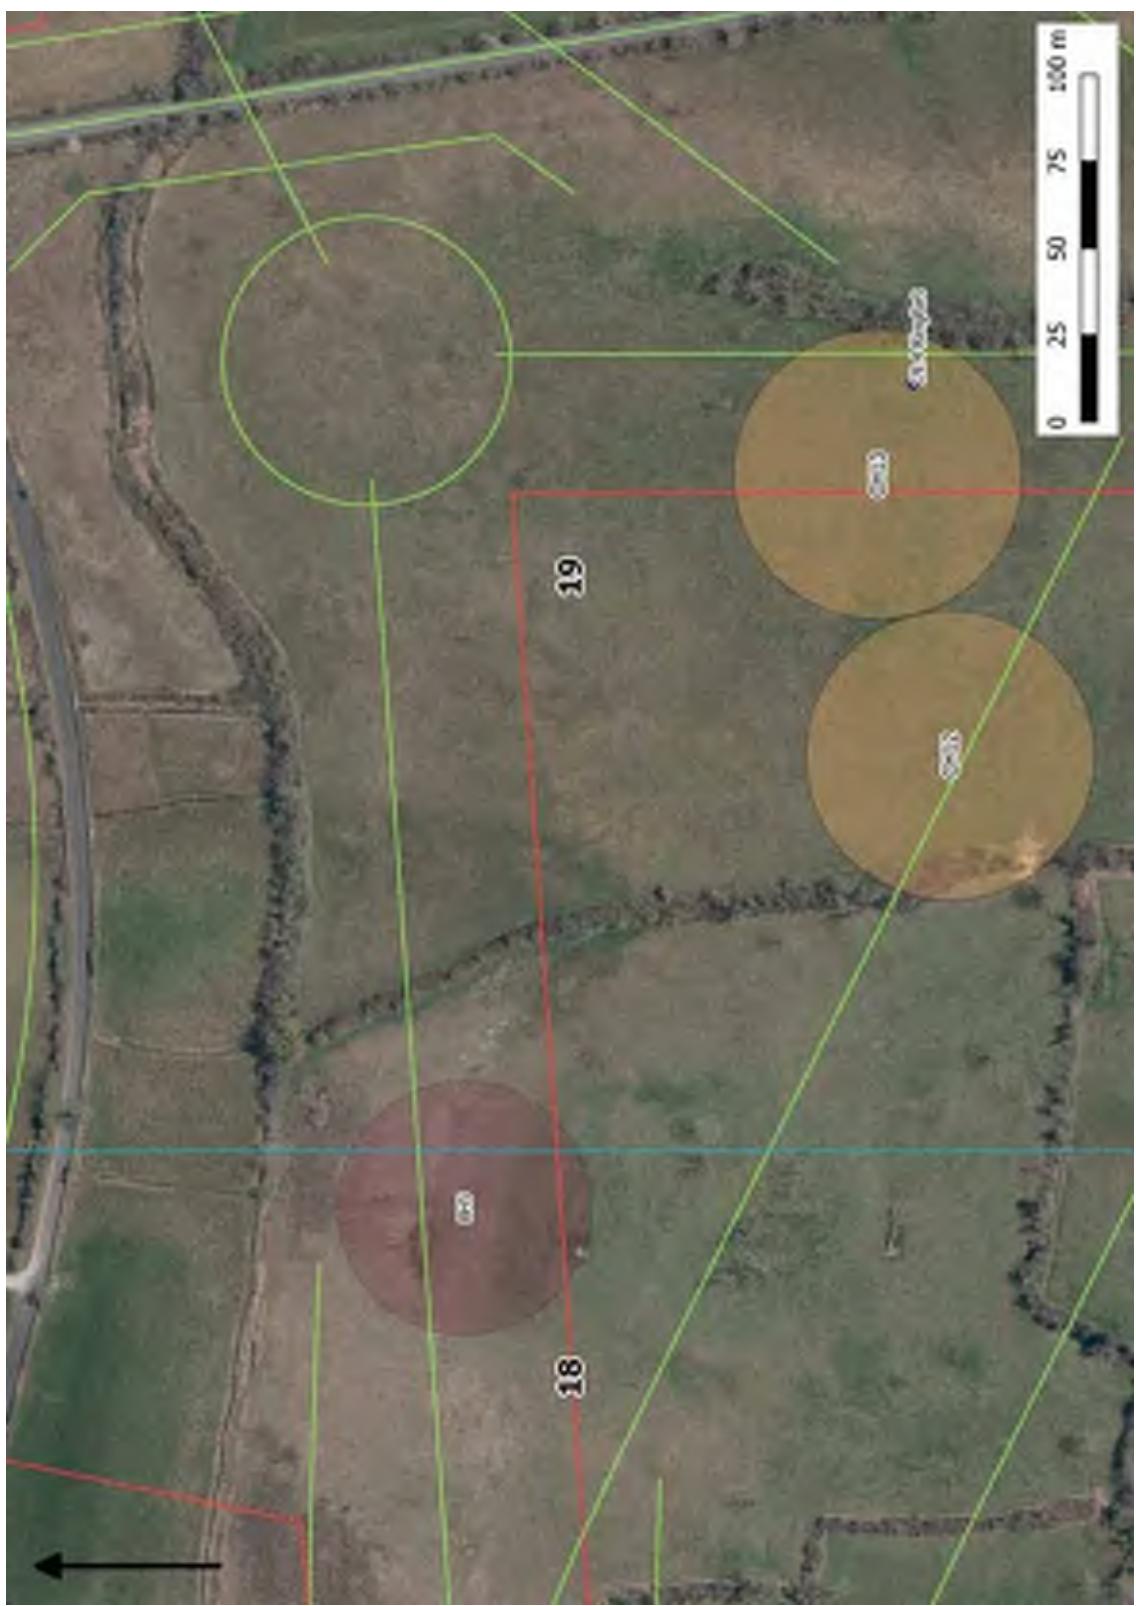

Feature 18.5. Extensive field system running north from 18.3 towards 18.4. 590 x 308 m.

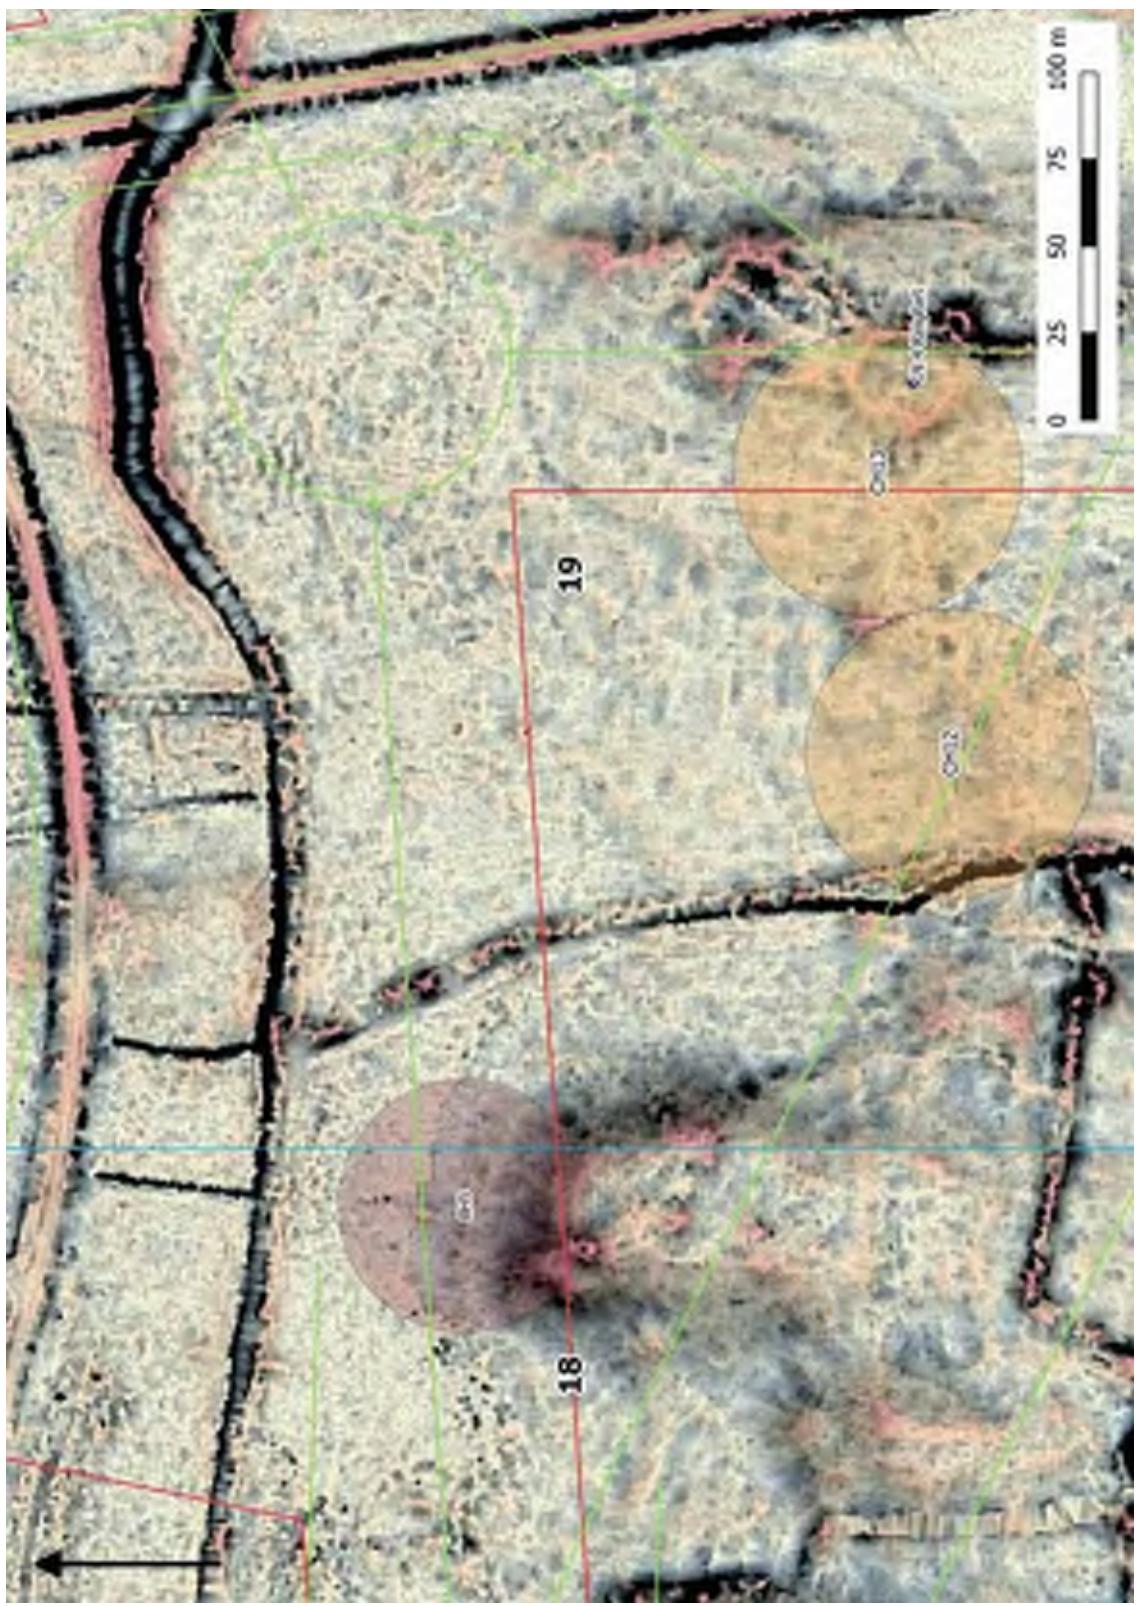

Feature 18.5. Showing full extent of field system.

Grid 19

Grid 19 showing constraints BH5, CH12 and CH13. Scheme orthophotography.

Grid 19 showing constraints BH5, CH12 and CH13. Scheme orthophotography. LRM over SVF.

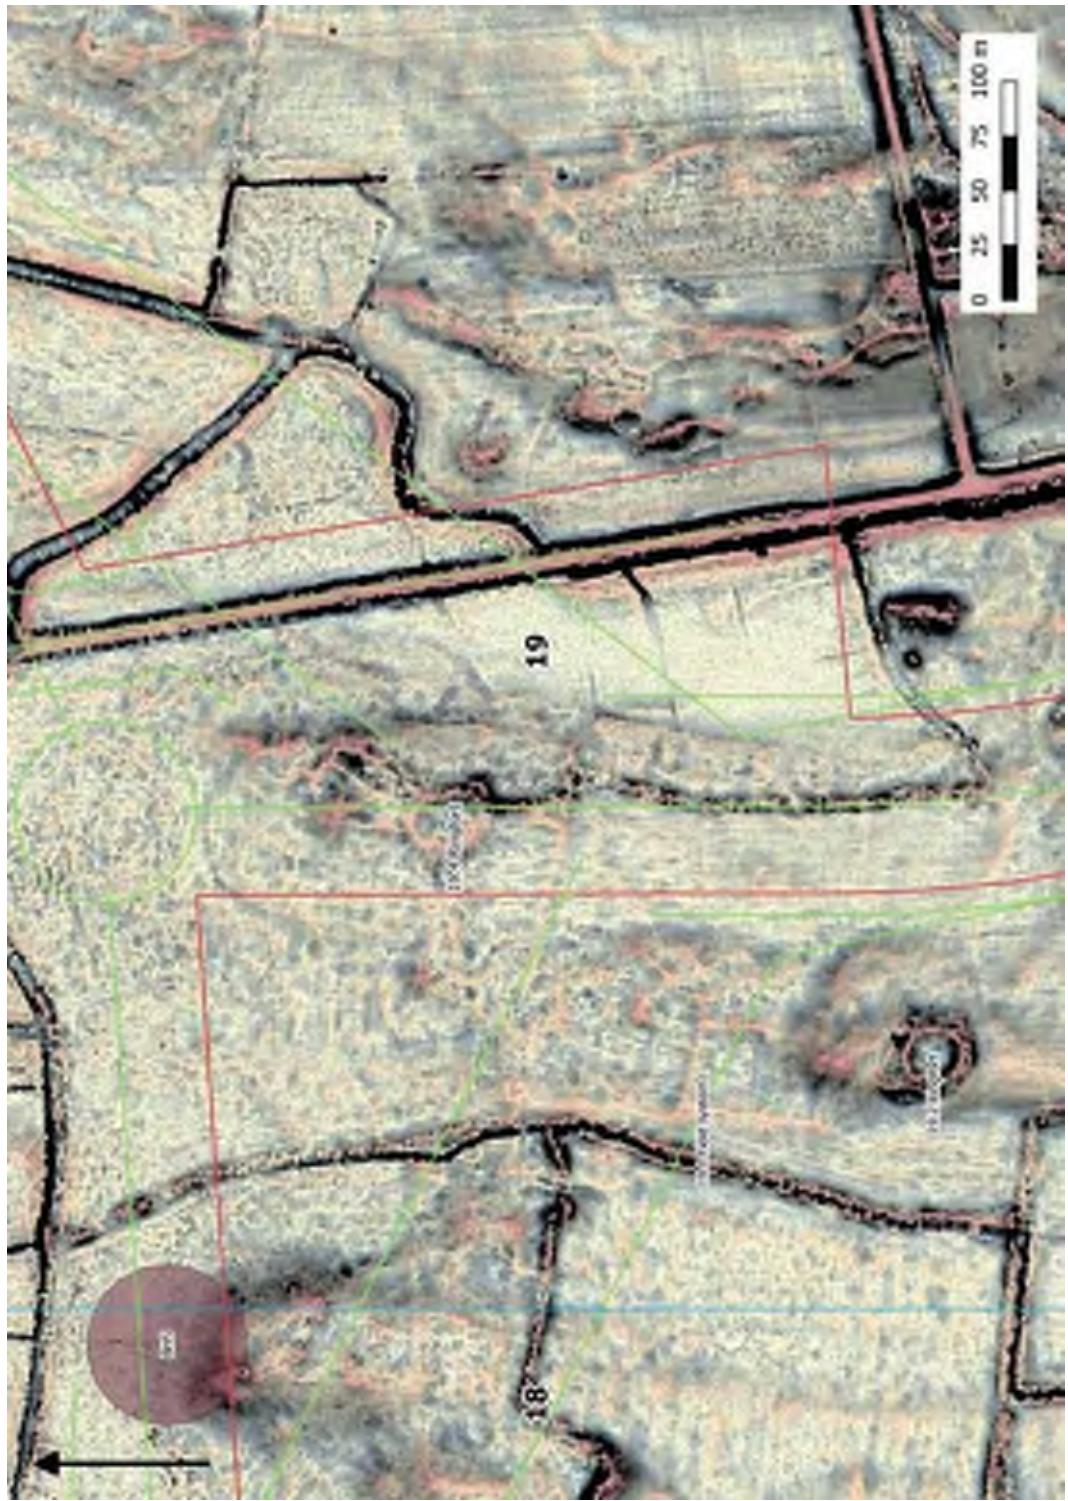

Feature 19.1. Series of rectangular plots along road; possible deserted medieval settlement. 101 x 39 m

Feature 19.2. Ringfort (or possibly demesne feature), heavily wooded. 24 m diameter.

Feature 19.4. Small enclosure, probable ringfort associated with 19.1 and 19.2, c. 26.5 x 25.5 m diameter. Scheme orthophotography.

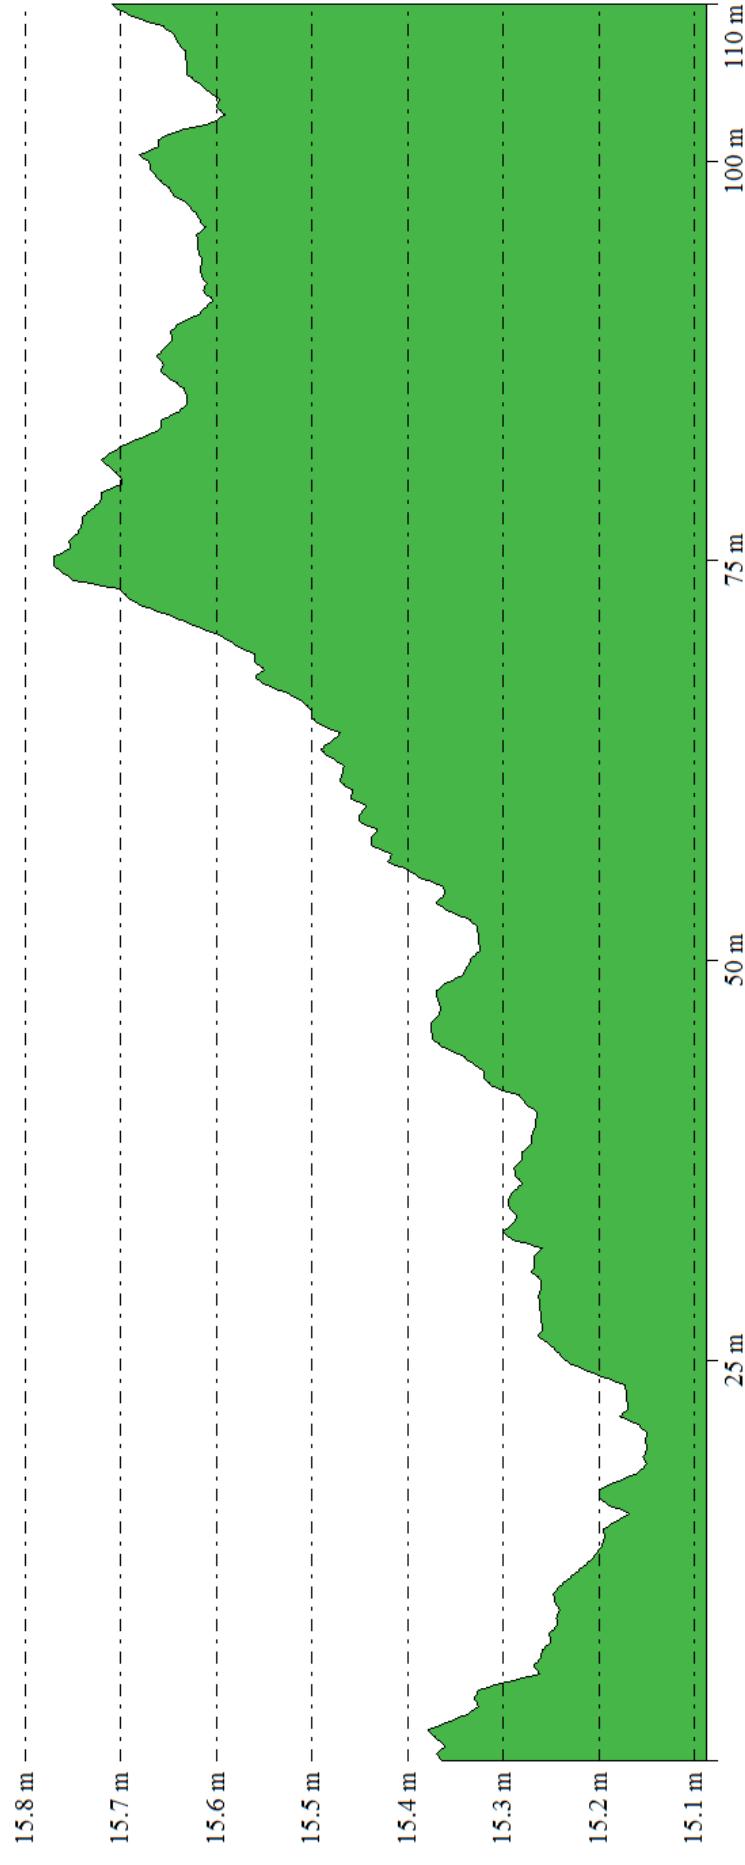

Feature 19.1. Series of rectangular plots along road; possible deserted medieval settlement. 101 x 39 m.

Feature 19.2. Ringfort (or possibly demesne feature), heavily wooded. 24 m diameter.

Feature 19.4. Small enclosure, probable ringfort associated with 19.1 and 19.2. c. 26.5 x 25.5 m diameter. LRM over SVF image.

To Pos: 531363.847, 649017.369

From Pos: 531374.380, 649126.651

Feature 19.1. N-S profile across plots.

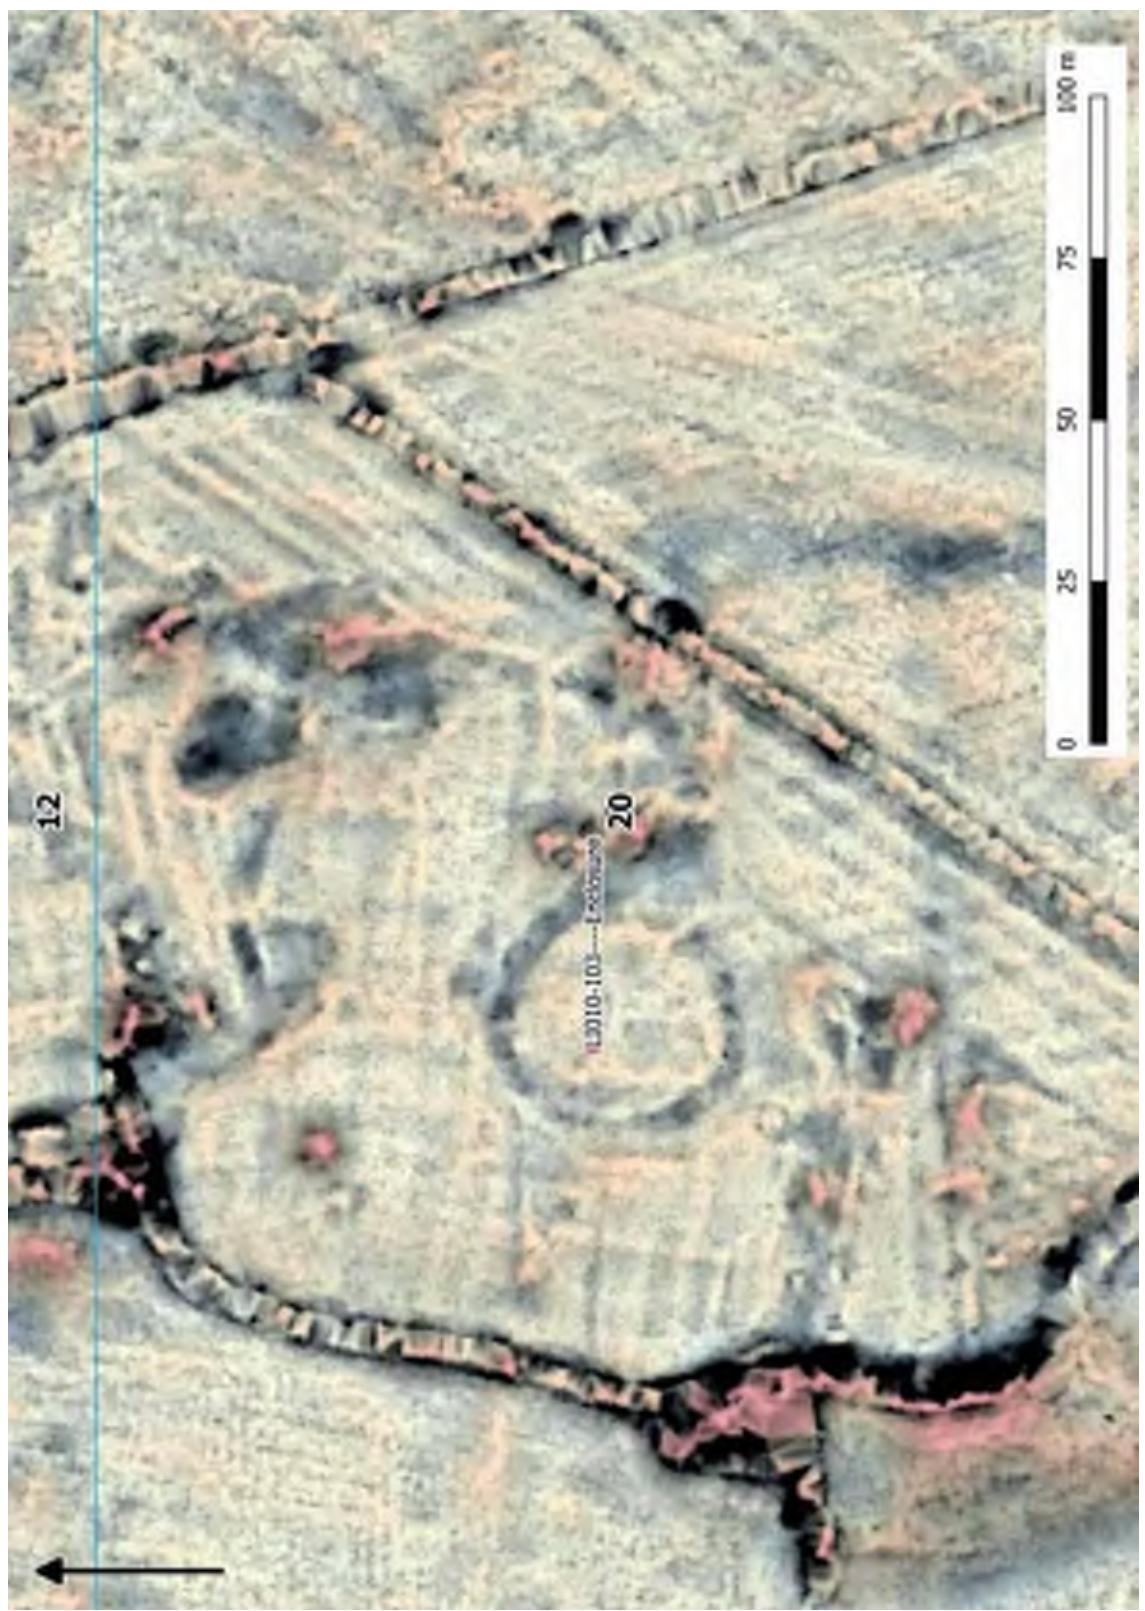

Feature 19.3. Field system including possible enclosure, 40 m diameter. Within DL1. LRM over SVF. See Fig. 14.

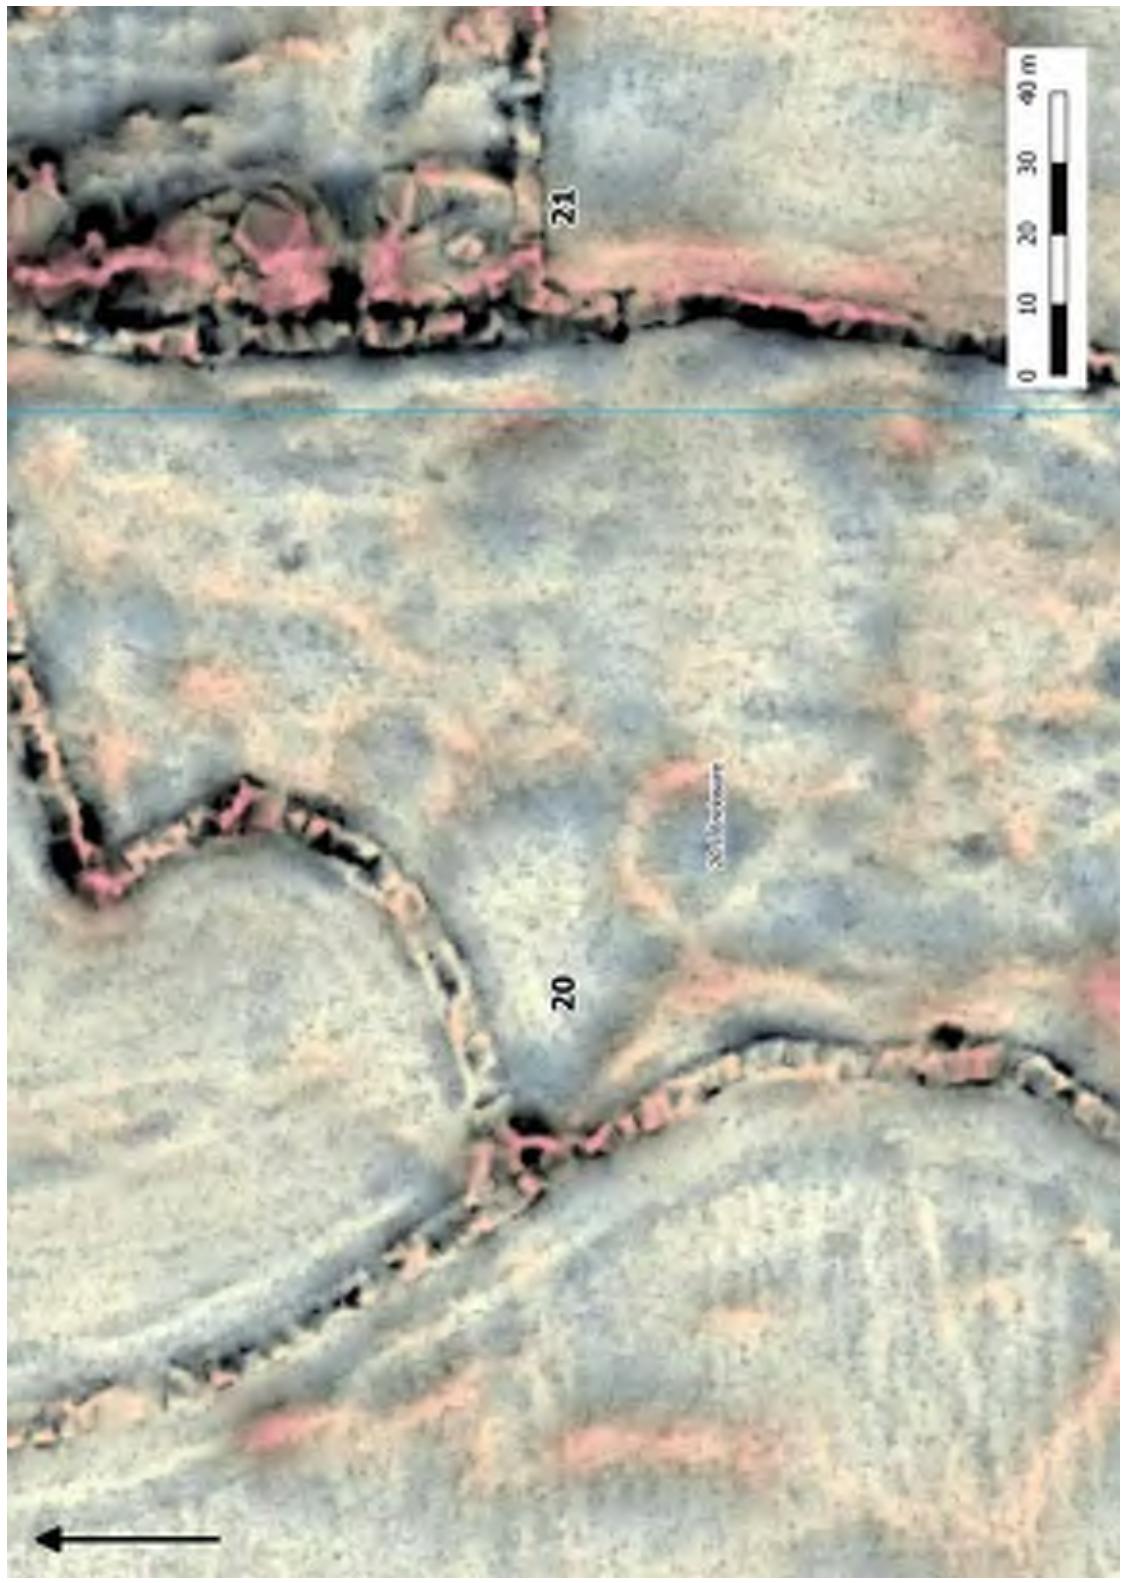

Grid 20

LJ010-103. Ditched enclosure, 32 m diameter defined by U-shaped fosse, 4 m across. Visible in AP. Scheme orthophotography.

LJ010-103. Ditched enclosure, 32 m diameter, defined by U-shaped fosse, 4 m across. Visible in AP.LRM over SVF image.

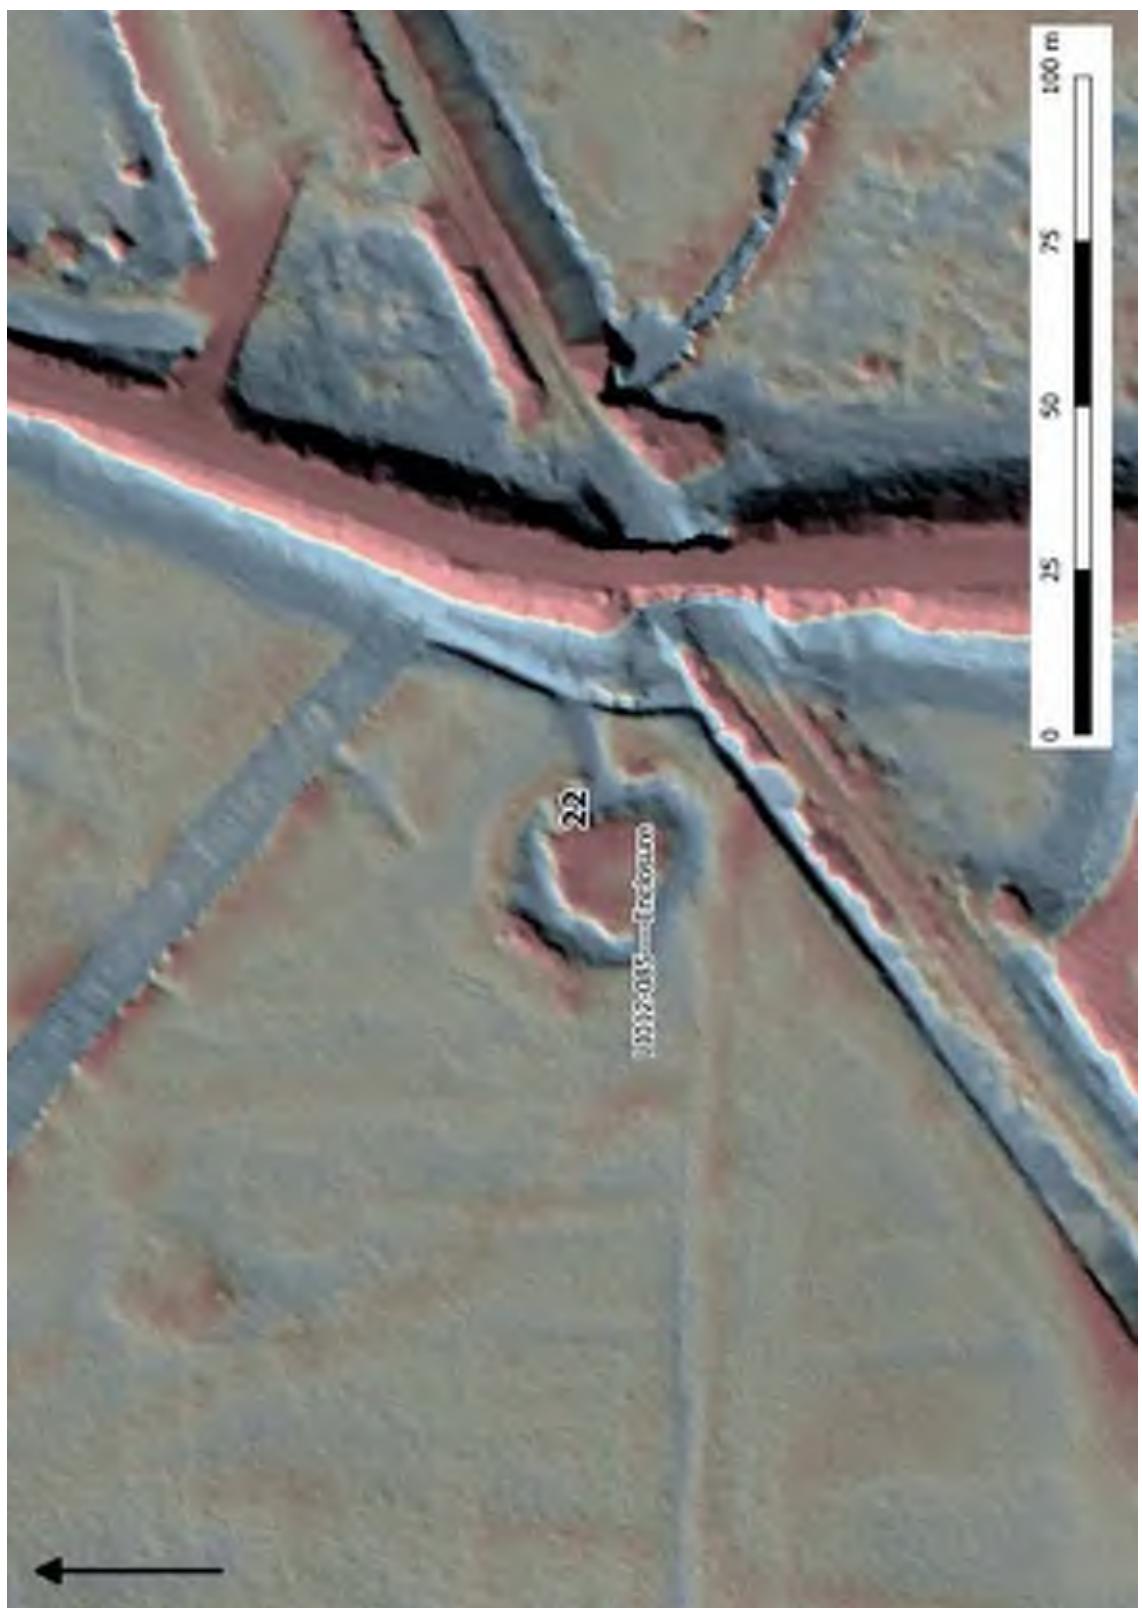

Feature 20.1. Small, D-shaped enclosure, 21 x 19 m.

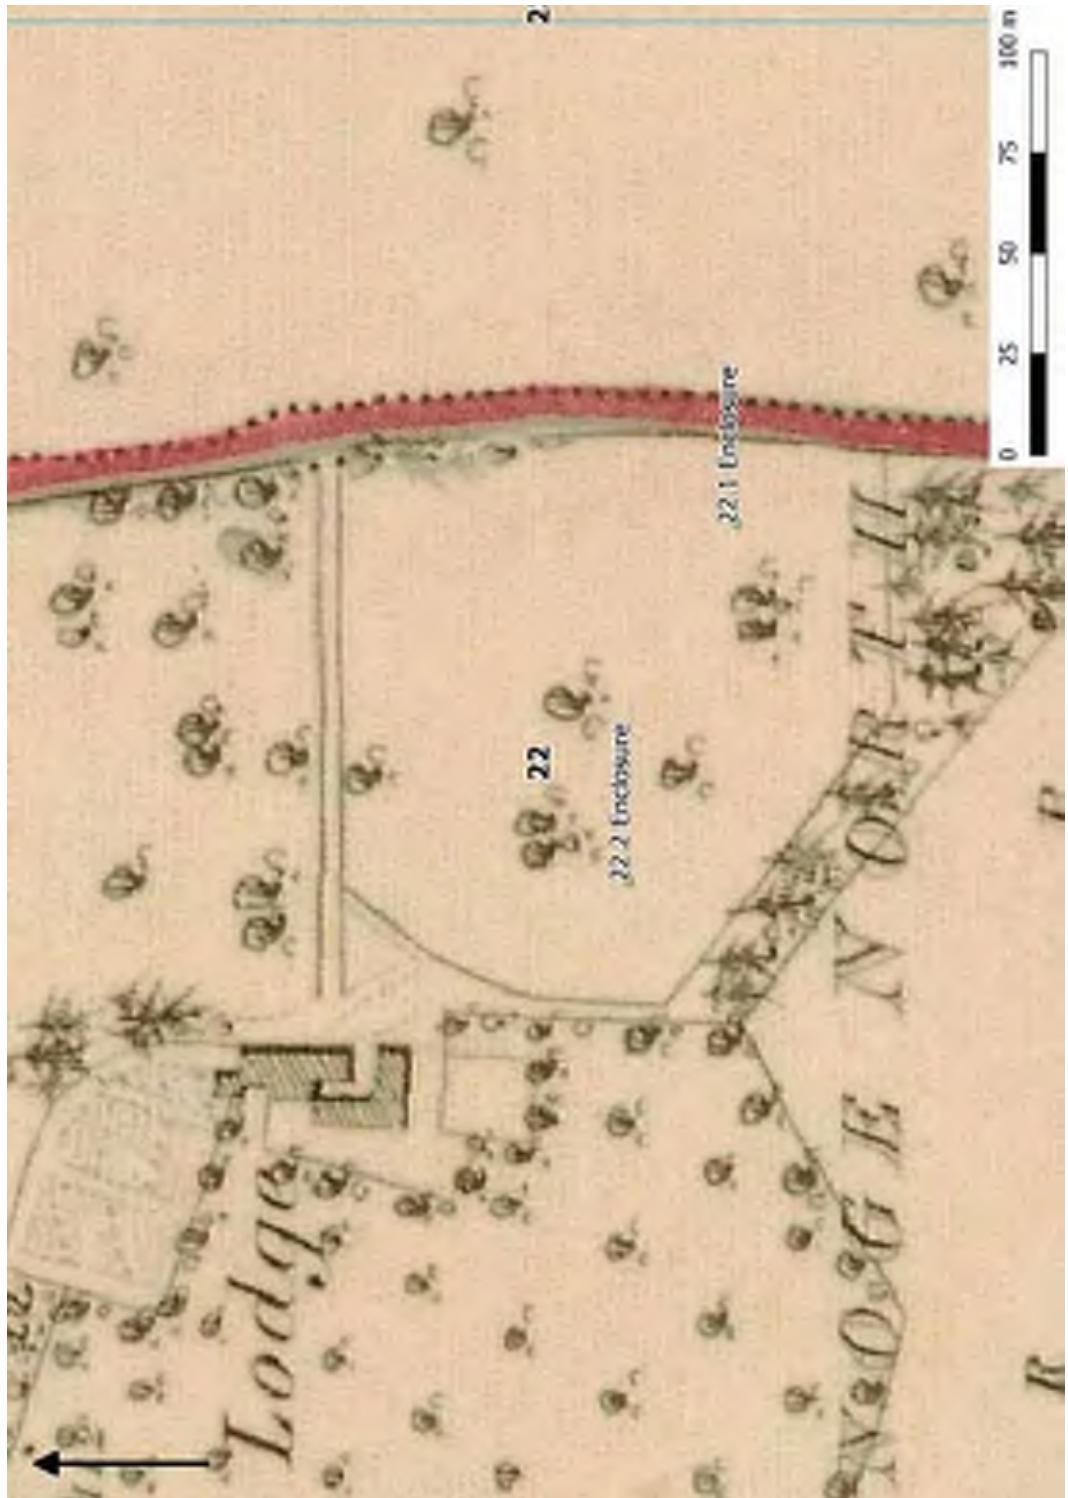

Grid 22

LJ012-085. Probable ringfort. Central platform c. 19 m diameter, surrounded by fosse, c. 3.8 m across. Possibly open to the east. Scheme orthophotography.

LJ012-085. Probable ringfort. Central platform c. 19 m diameter, surrounded by fosse, c. 3.8 m across. Possibly open to the east. LRM over 16-direction hillshade.

Feature 22.1. Small, circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge.

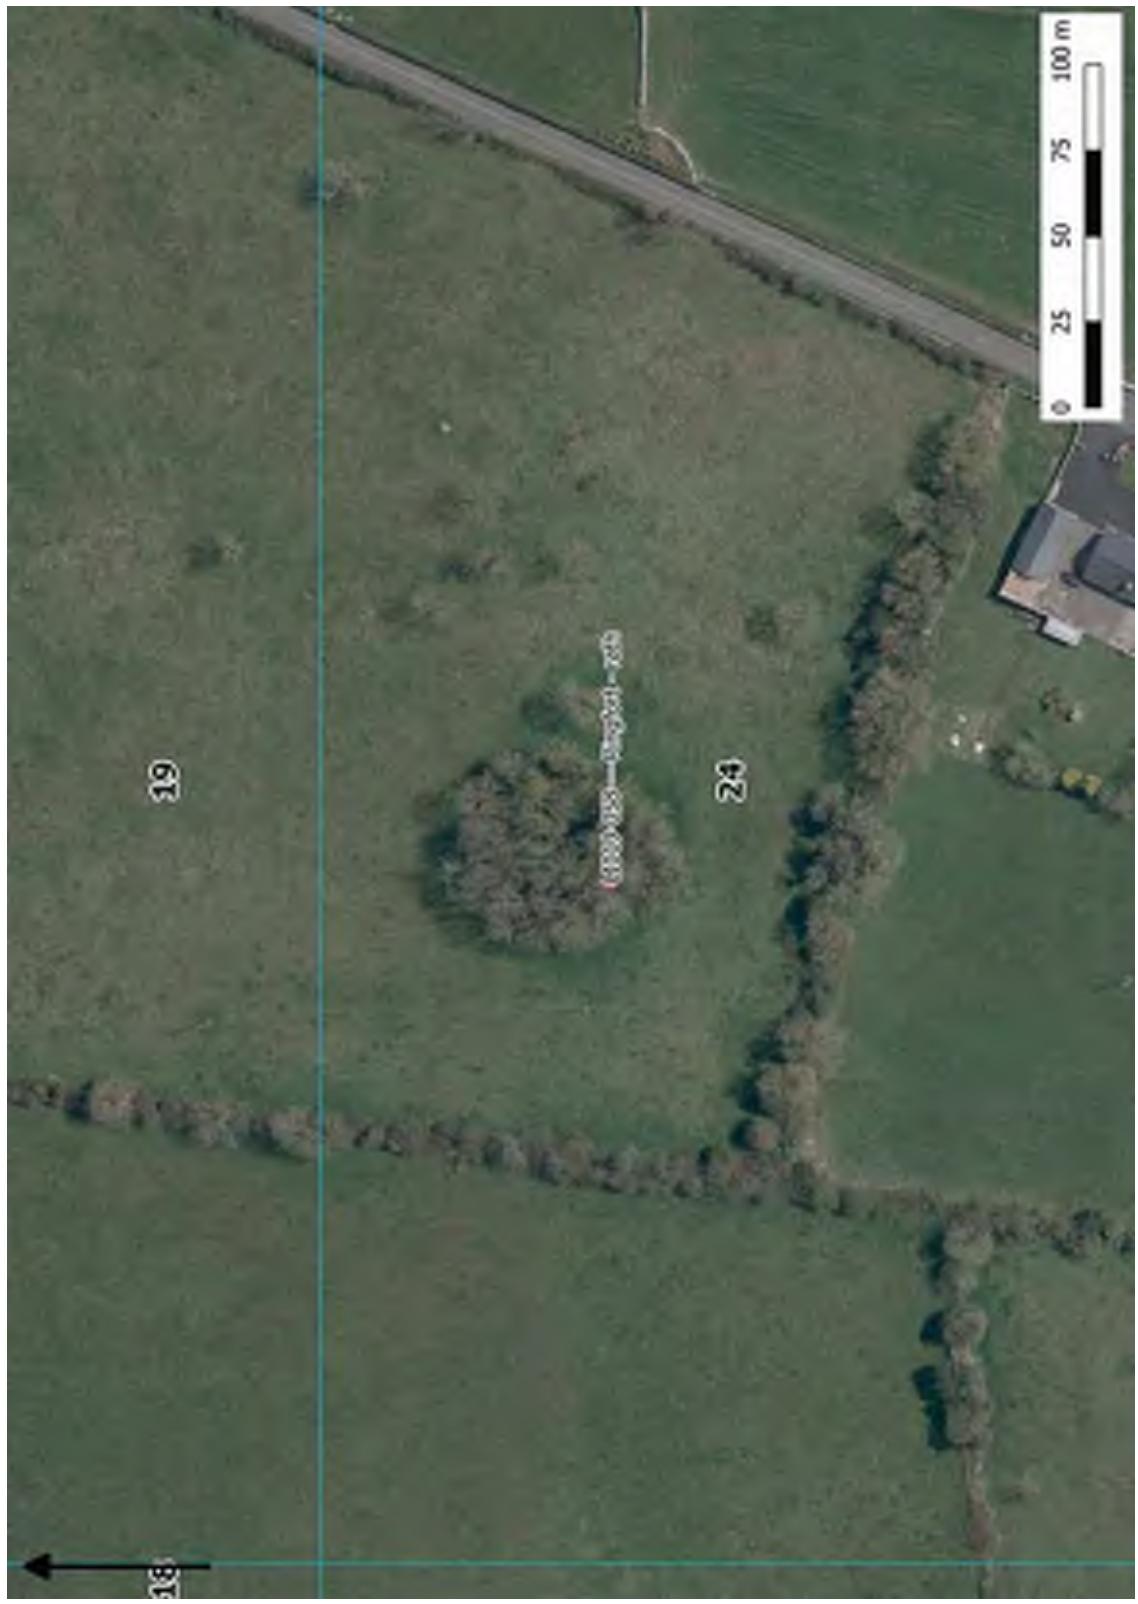

Feature 22.2. Small, circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge. 6 inch mapping.

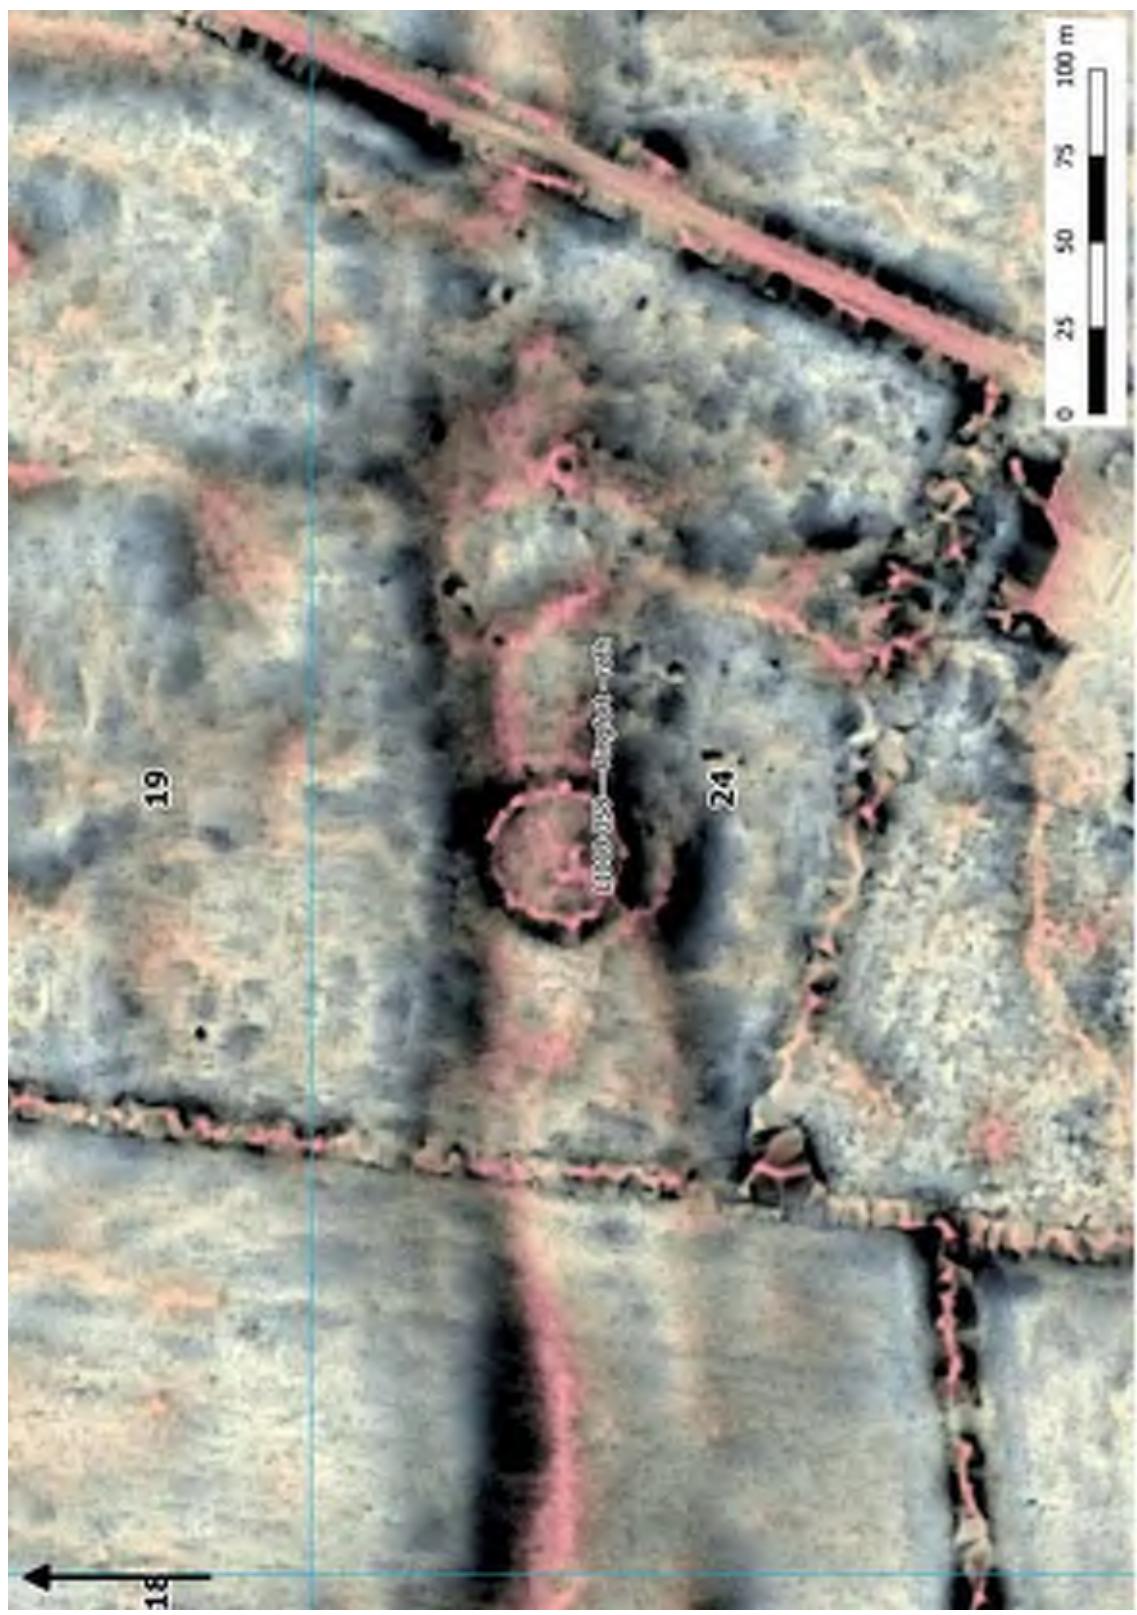

Feature 22.1. Small, circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge.

Feature 22.2. Small, circular enclosure, 16 m diameter. Associated with field system. Probable landscape feature associated with Spring Lodge. LRM over SVF image.

Grid 24

L19-058. Well-preserved ringfort under heavy woodland. Field systems to east. 23 m diameter. Small, circular structure in southern part. Scheme orthophotography.

LJ019-058. Well-preserved ringfort under heavy woodland. Field systems to east, 23 m diameter. Small, circular structure in southern part. LRM over SVF image.

Feature 24.1. Field system with some enclosure elements. LRM over SVF image. See Fig. 14.

Grid 25

L1019-064. Large, bivallate or possibly trivallate ringfort. Outer vallation largely destroyed but remains to north and southeast, with traces to southwest. Overall diameter to 2nd vallation is 67 m, but this is surrounded by an outer ditch suggesting a possible third vallation. Central slightly depressed circular area, 20 m diameter. Rectangular enclosed area to east. 6-inch mapping. See also Fig. 15.

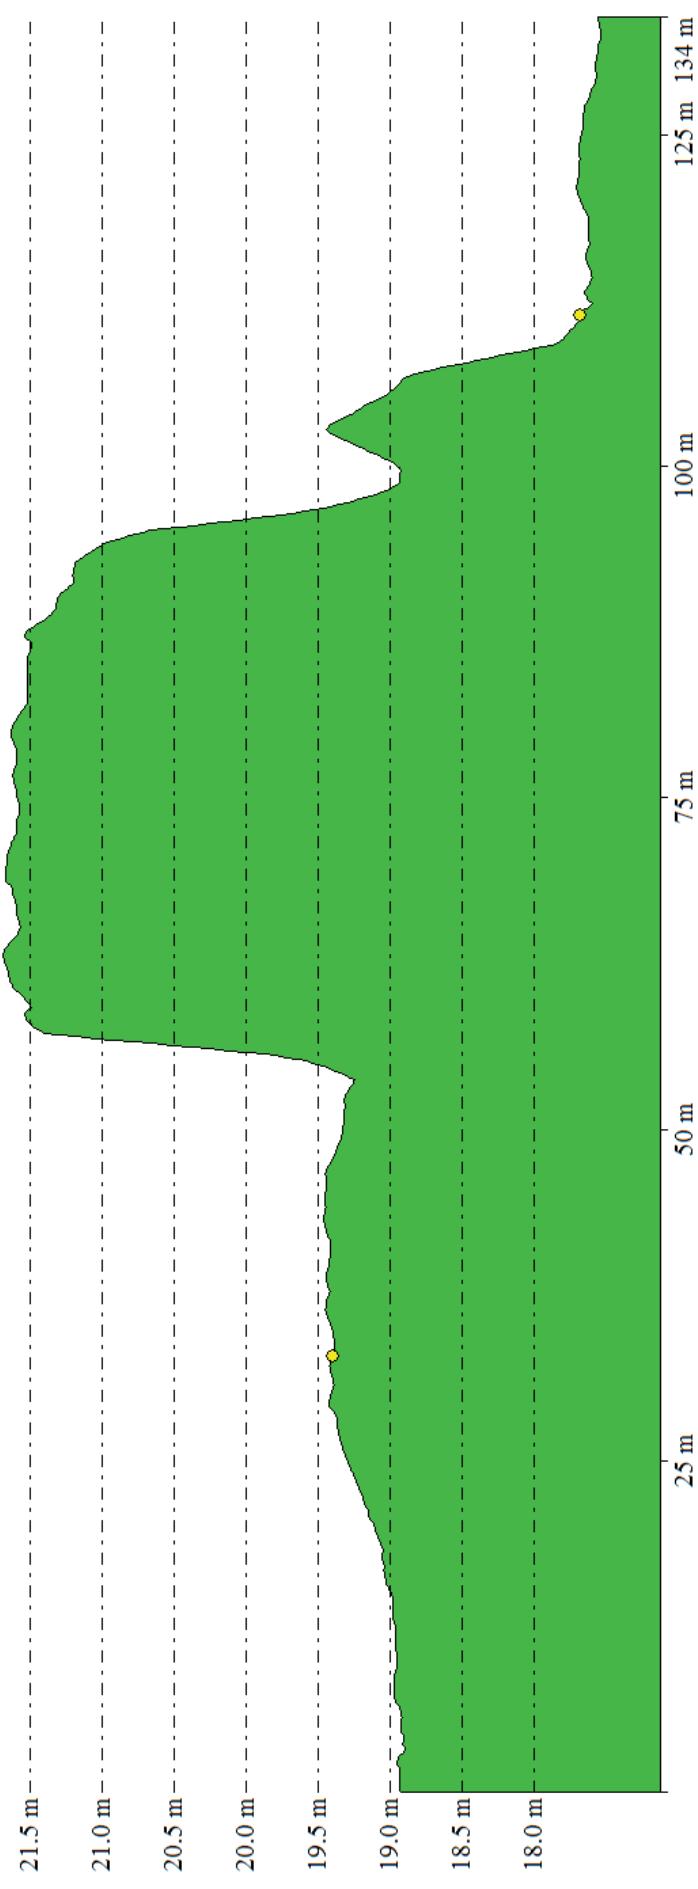

LI019-064. Large, bivallate or possibly trivallate ringfort. Outer vallation largely destroyed but remains to north and southeast, with traces to southwest. Overall diameter to 2nd vallation is 67 m, but this is surrounded by an outer ditch suggesting a possible third vallation. Central slightly depressed circular area, 20 m diameter. Rectangular enclosed area to east. Scheme orthophotography. See also Fig. 15.

LJ019-064. Large, bivallate or possibly trivallate ringfort. Outer vallation largely destroyed but remains to north and southeast, with traces to southwest. Feature 33.2. Deserted settlement. Continuation of L1021-025001 to the east of road. 65×26 m. LRM over SVF image. See also Fig. 23.

Feature 33.1. Possible deserted settlement in grounds of Attyflin House. May include designed landscape features. LRM over SVF image. See also Fig. 23.

Feature 33.3. Rectangular enclosure as part of field system, c. 26 x 26 m but partially obscured by road. Possibly continuation of L021-025001. LRM over SVF image. See also Fig. 23.

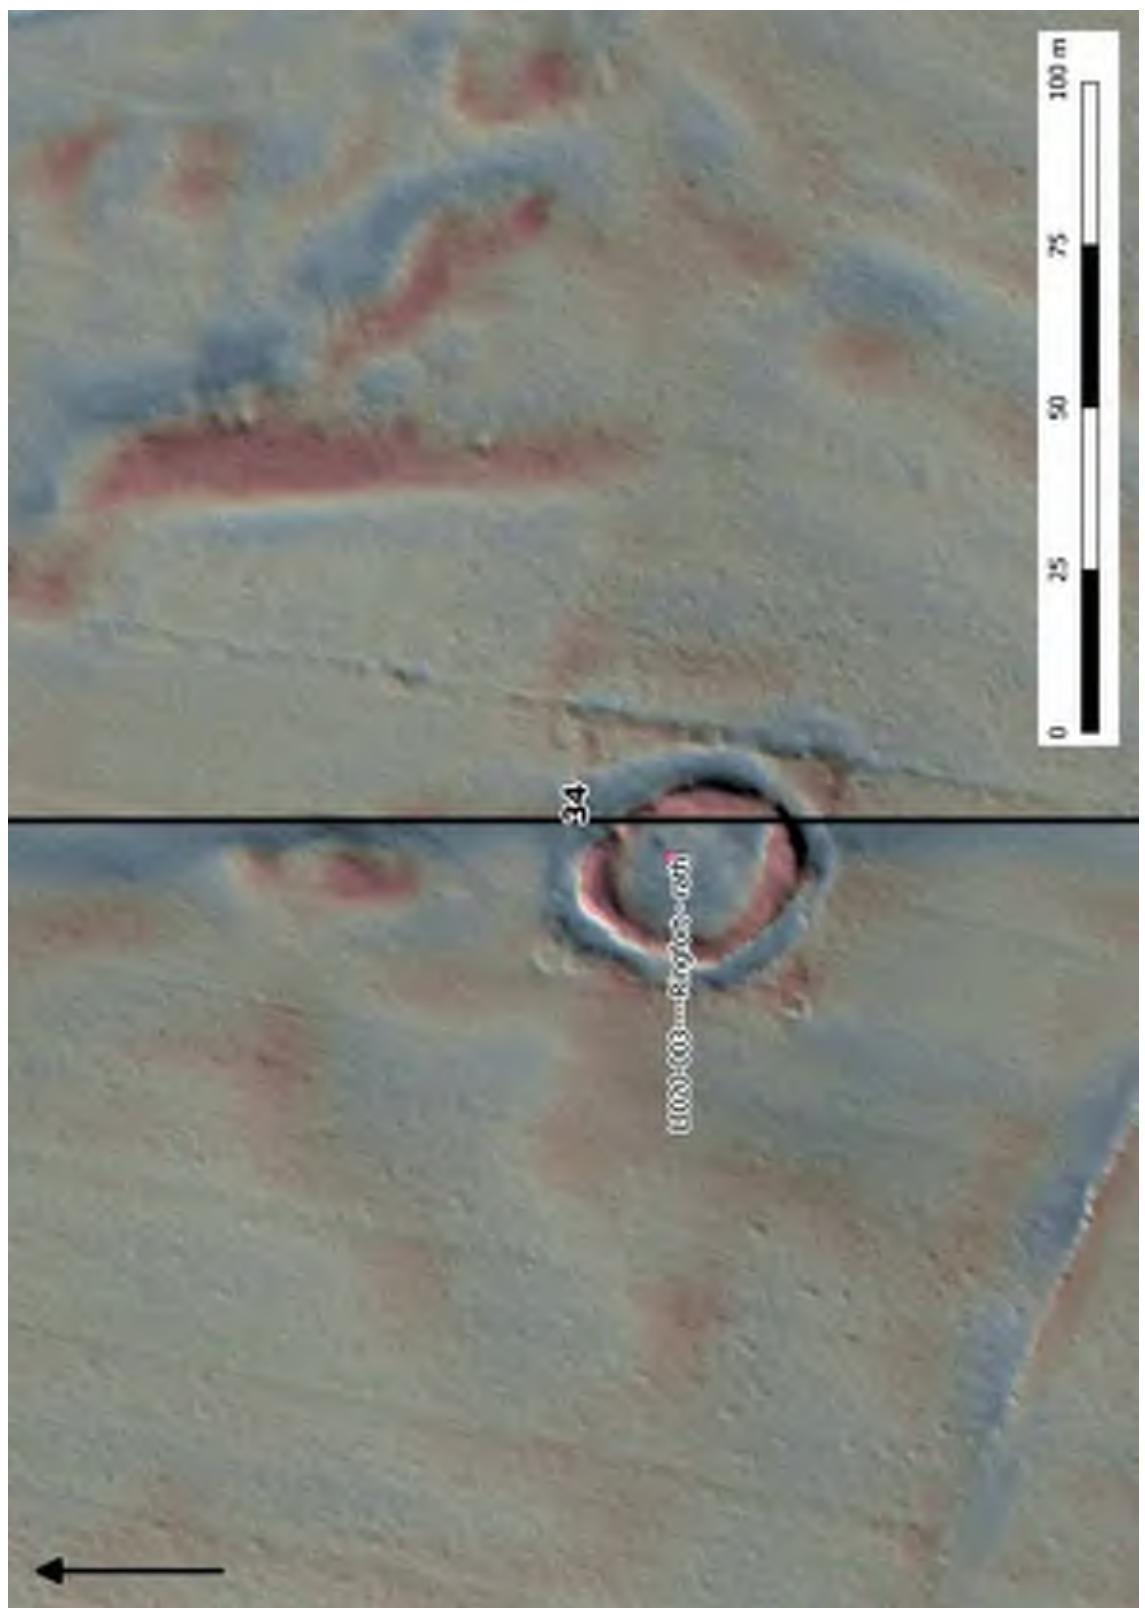

Feature 33.4. Ringfort adjacent to LI021-027. Diameter 41 m. LRM over SVF image.

Grid 34

L1020-003. Well-preserved ringfort, 29 x 34 m diameter with substantial outer fosse. Scheme orthophotography.

L1020-003. Well-preserved ringfort, 29 x 34 m diameter with substantial outer ditch. LRM over 16-direction hillshade.

L1020-004001 (AH88). Substantial cashel, partially demolished to SE probably representing original entrance. Internal diameter 46.4 m, walls up to 4.5 m thick. Internal wall in NE of enclosure.

L1020-004002 (AH88). Slight trace of rectangular platform, but barely discernible

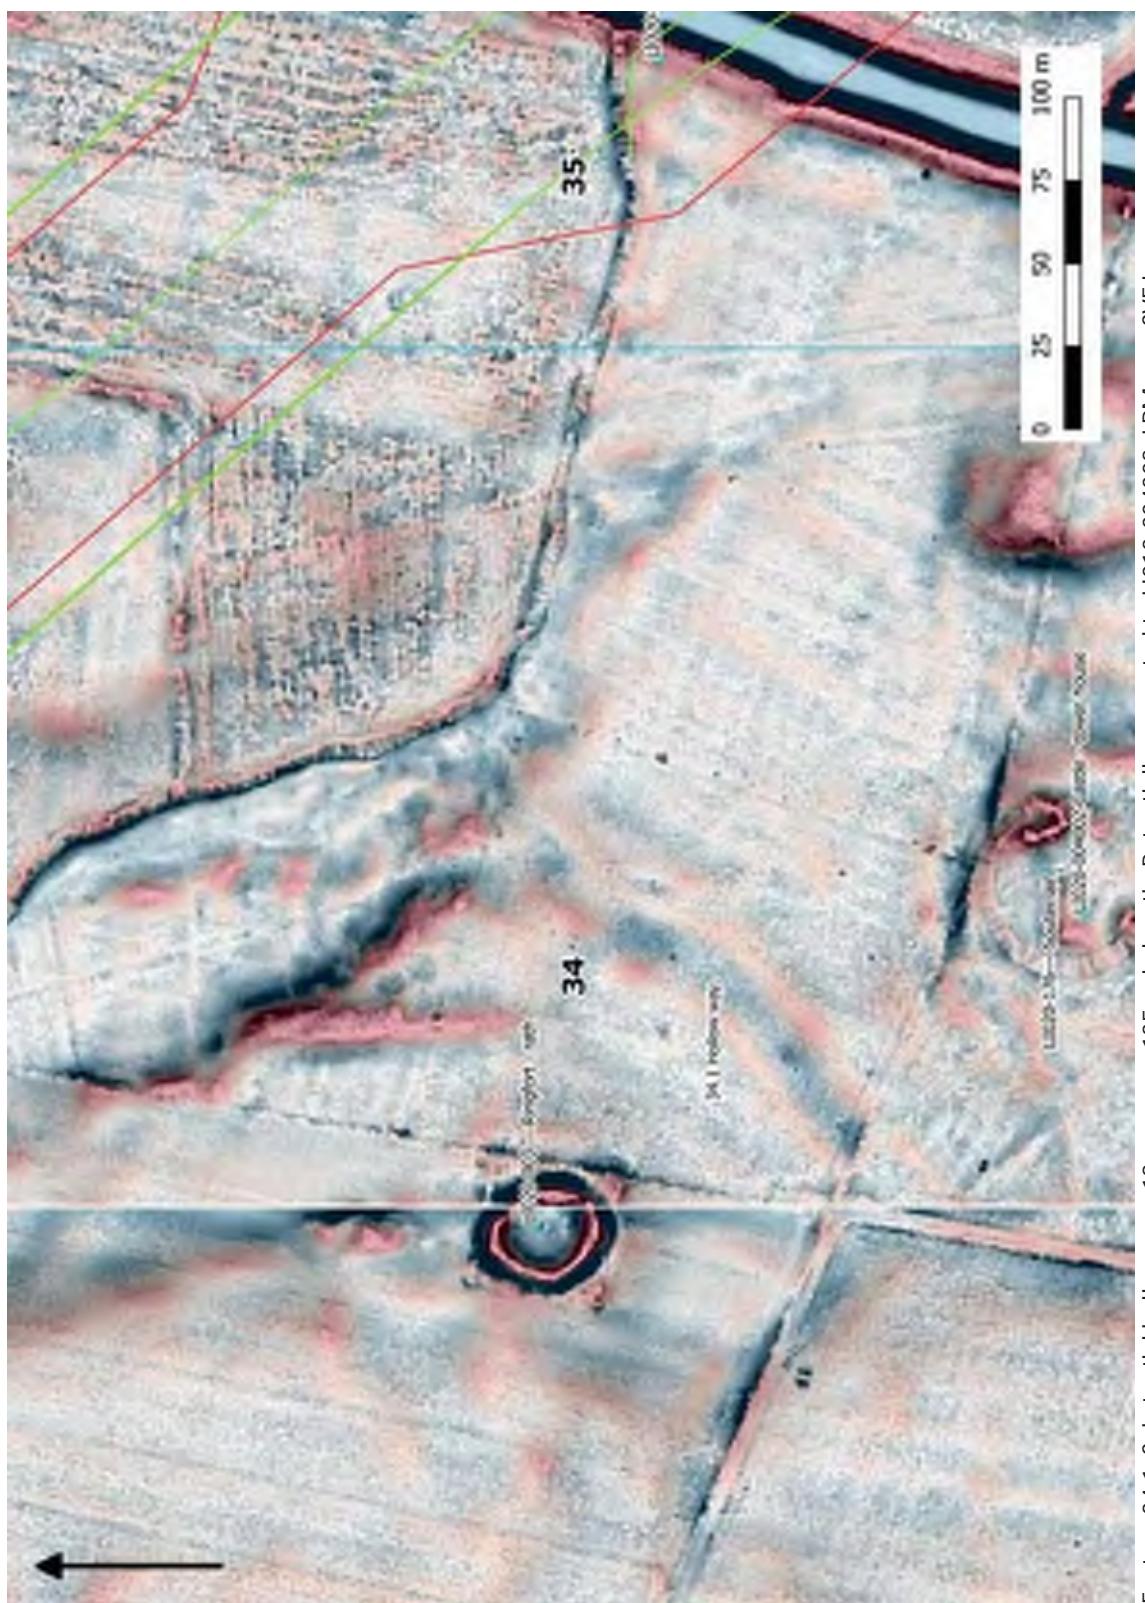

L1020-176 (AH88). Suggestion of sunken area possibly representing the infilled souterain. Scheme orthophotography.

L1020-004001 (AH88). Substantial cashel, partially demolished to SE probably representing original entrance. Internal diameter 46.4 m, walls up to 4.5 m thick. Internal wall in NE of enclosure. LRM over 16-direction hillshade.

L1020-004002 (AH88). Slight trace of rectangular platform, but barely discernible

L1020-176 (AH88). Suggestion of sunken area possibly representing the infilled souterrain.

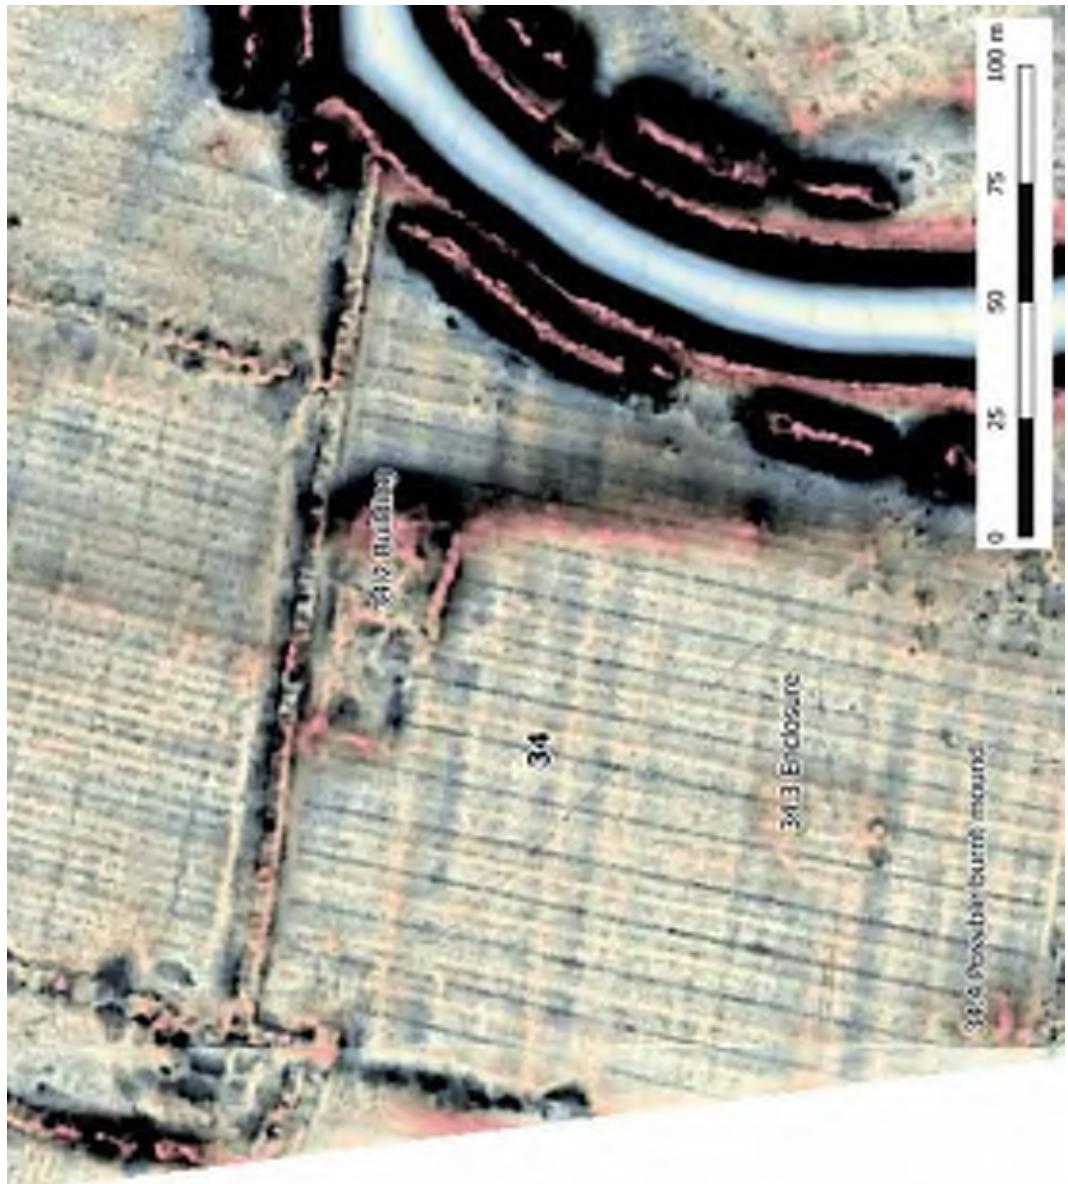

Feature 34.1. Substantial hollow-way, 18 m across, 135 m in length. Potentially connected to LI010-004002. LRM over SVF image.

Feature 34.2. Possible building/farmstead. 48 x 18 m. Not recorded on 6 inch mapping.

Feature 34.3. Possible ringfort. 30.3 x 22 m diameter.

Feature 34.4. Crescentic mound, 11.5 m diameter. Riverside location suggestive of burnt mound. Scheme orthophotography.

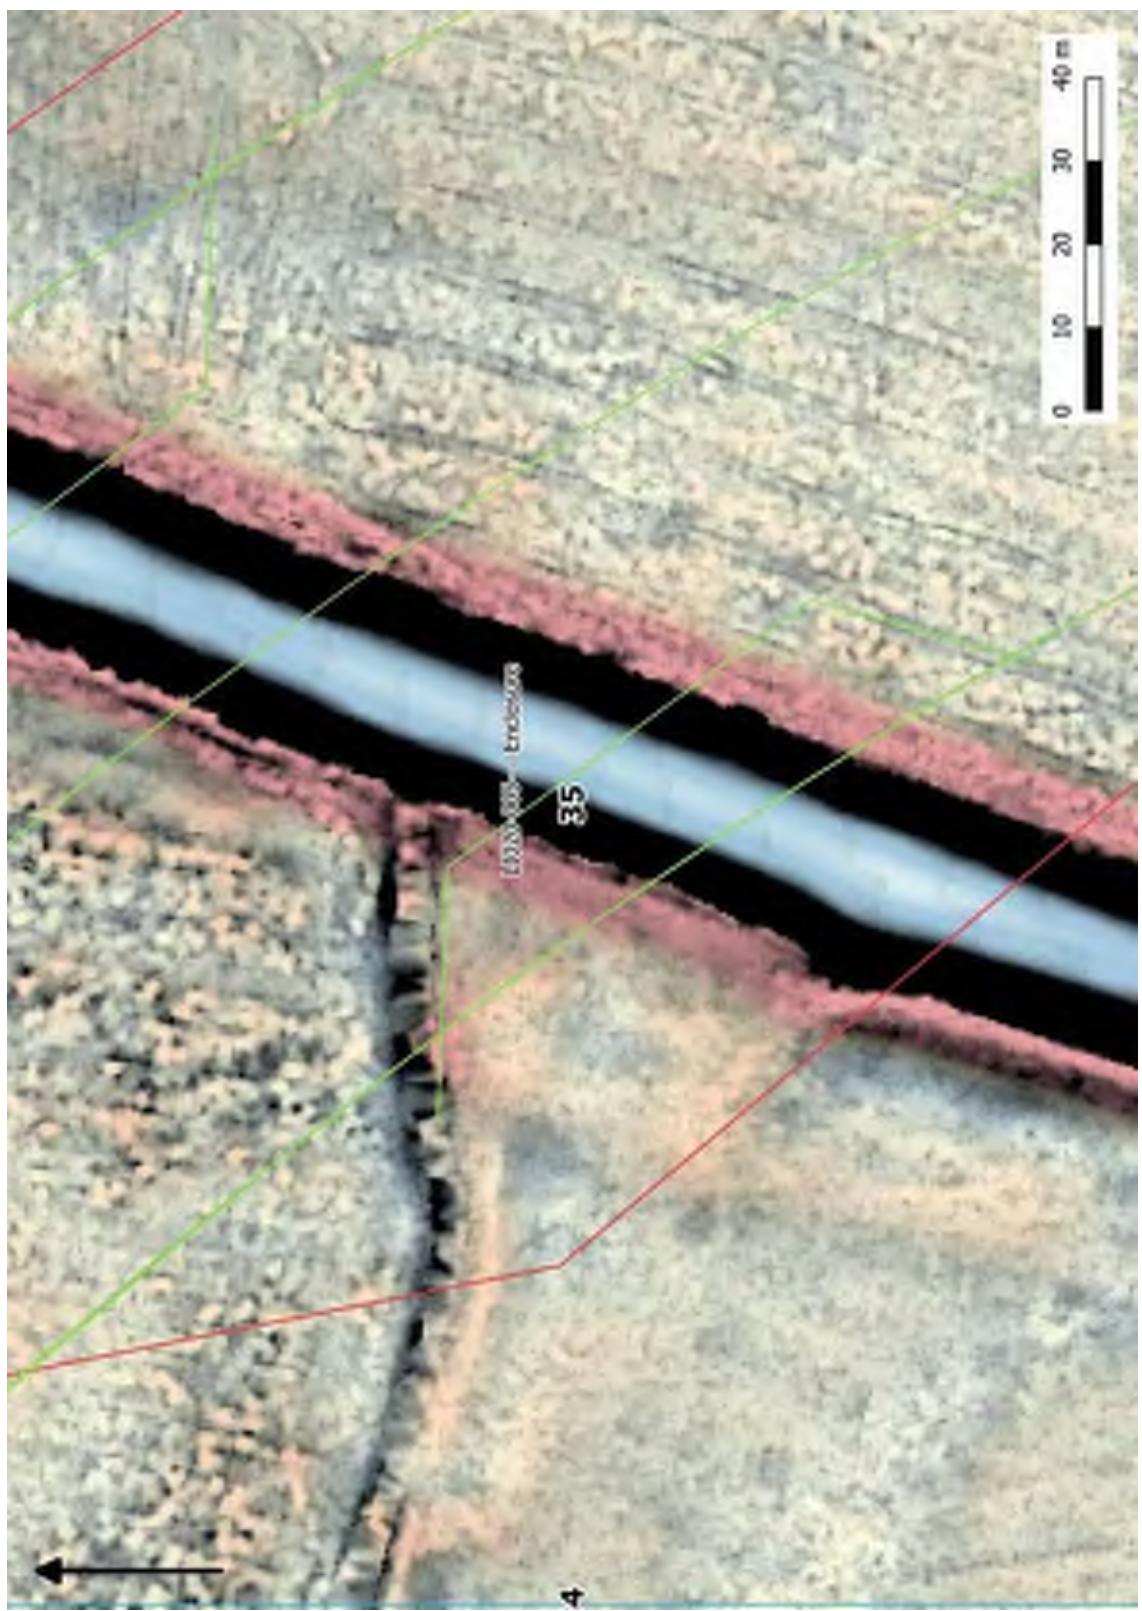

Feature 34.2. Possible building/farmstead. 48 x 18 m. Not recorded on 6 inch mapping.

Feature 34.3. Possible ringfort. 30.3 x 22 m diameter

Feature 34.4. Crescentic mound, 11.5 m diameter. Riverside location suggestive of burnt mound. LRM over SVF image.

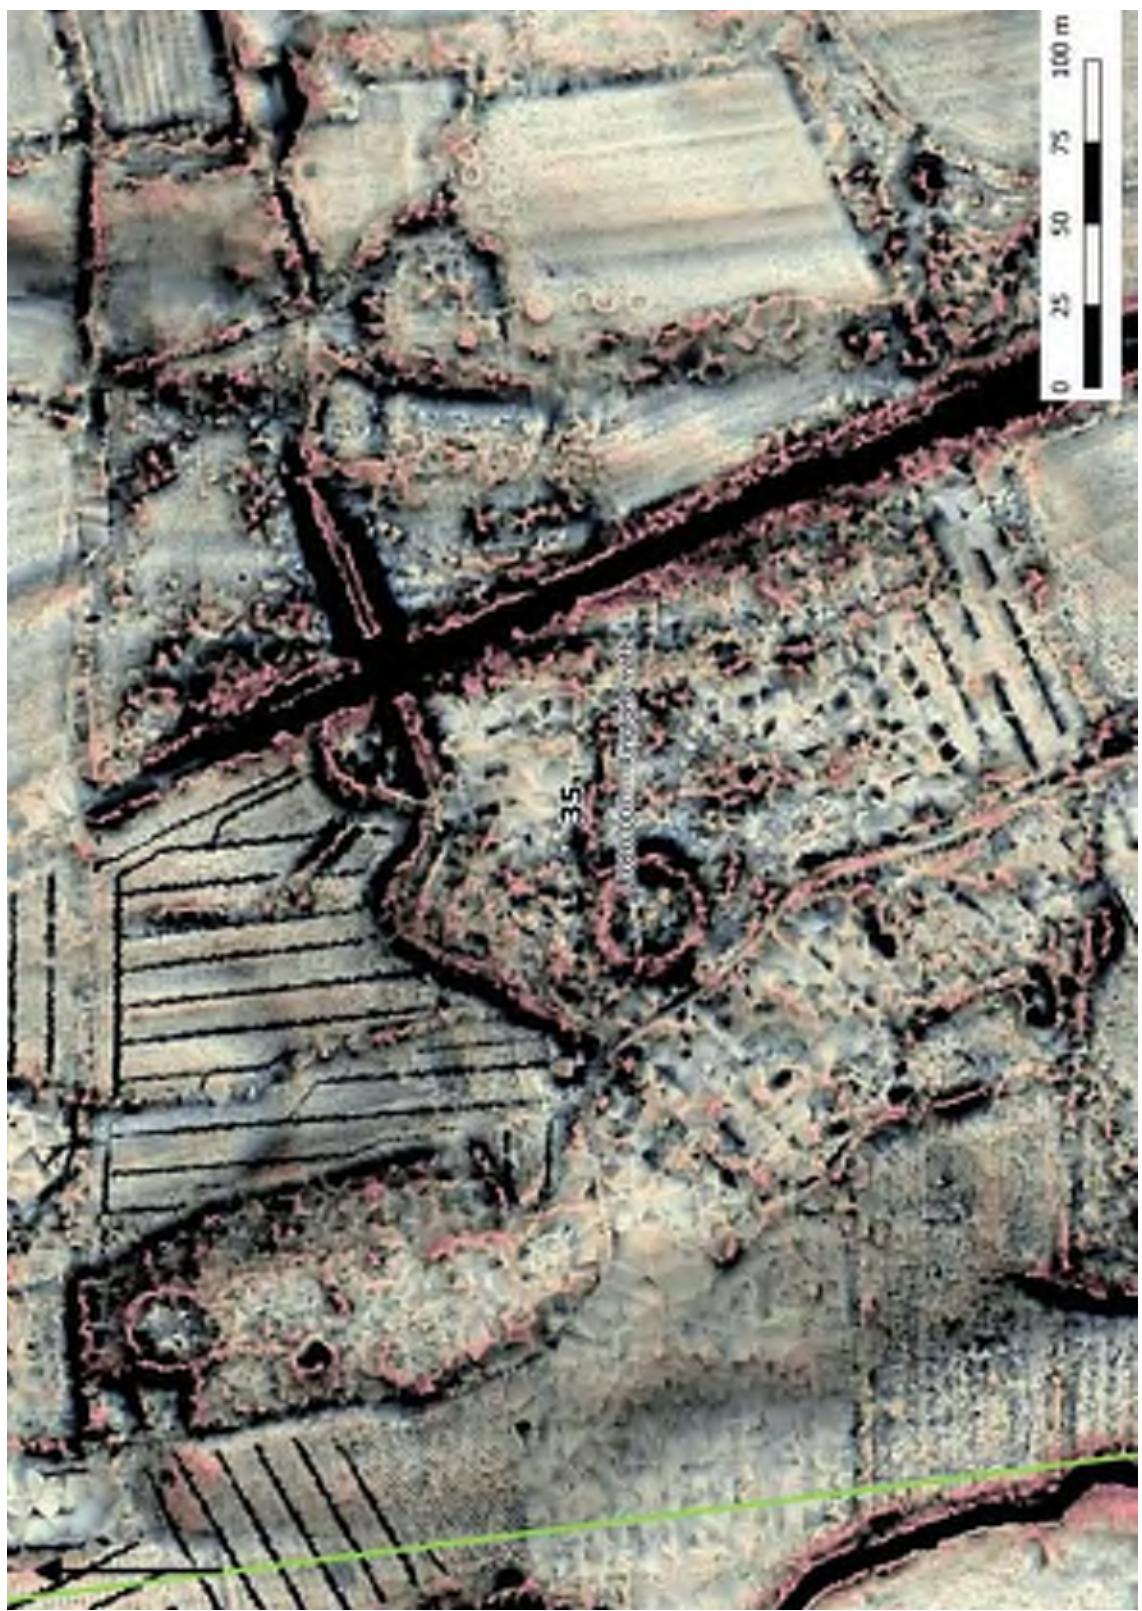

Grid 35

LJ020-005 (AH87). No visible trace remains. LRM over SVF image.

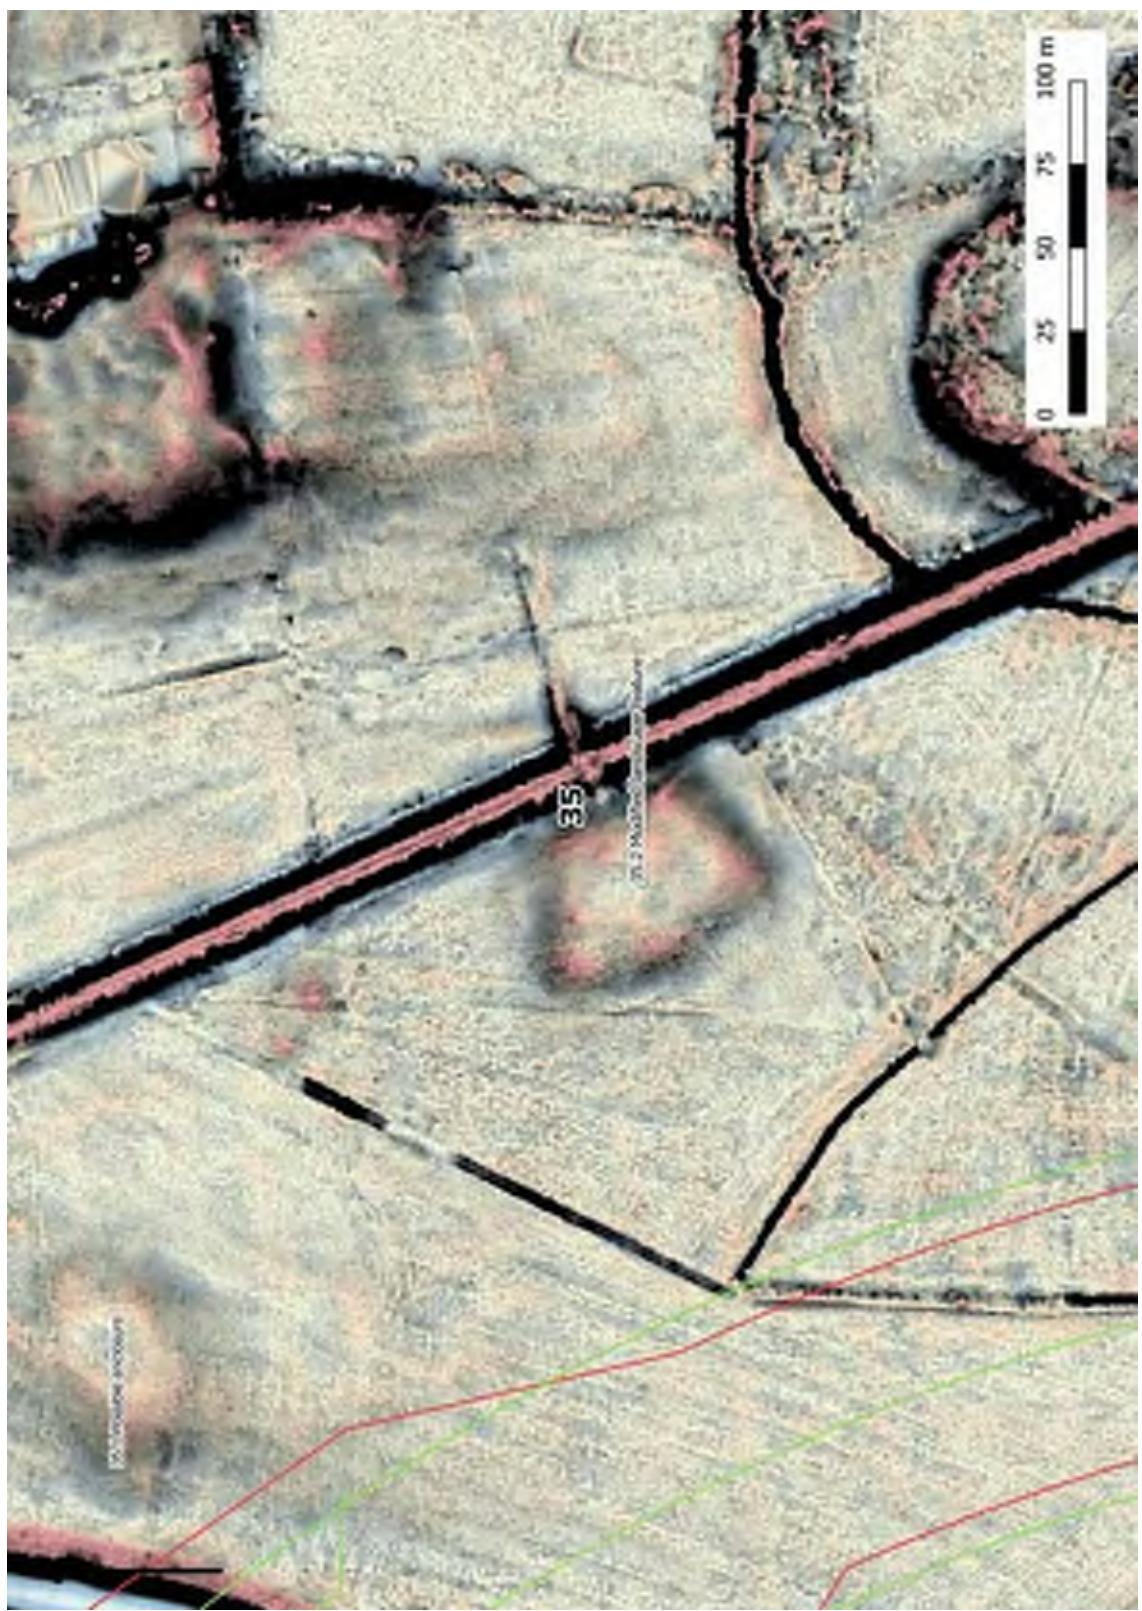

LJ020-007 (AH86). Ringfort under heavy woodland. 30 m diameter. Scheme orthophotography.

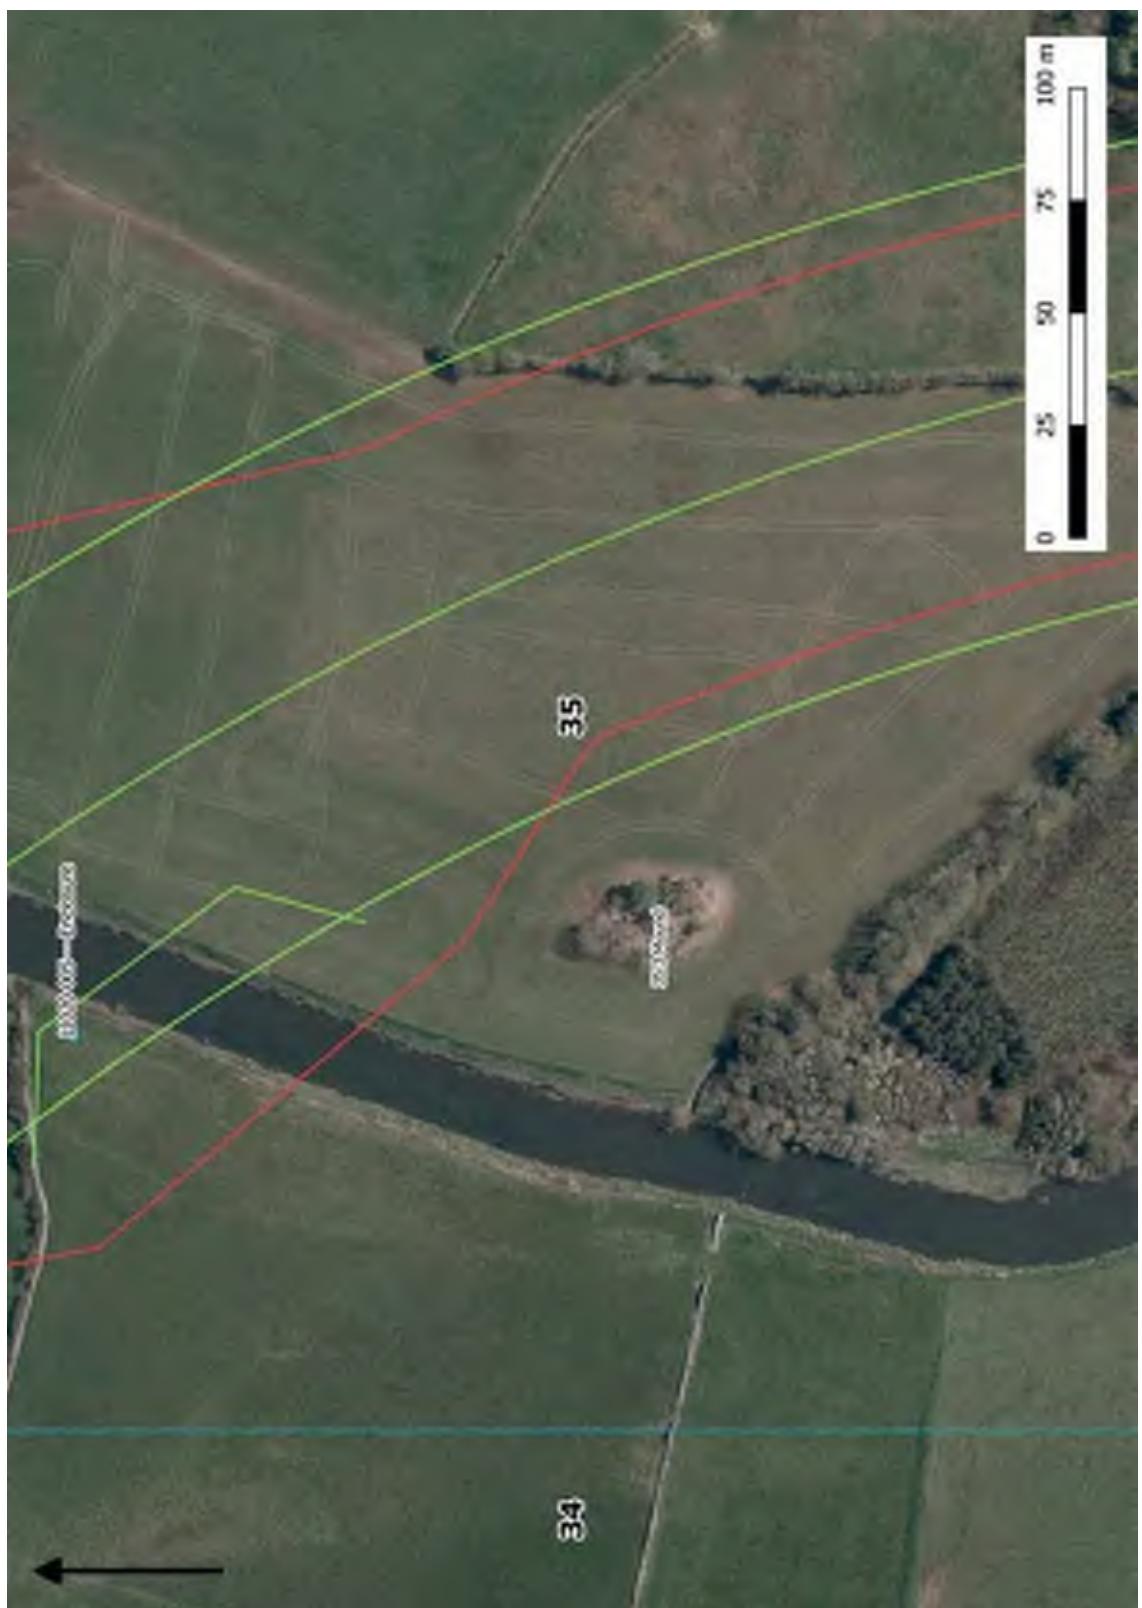

LJ020-007 (AH86). Ringfort under heavy woodland. 30 m diameter. LRM over SVF image.

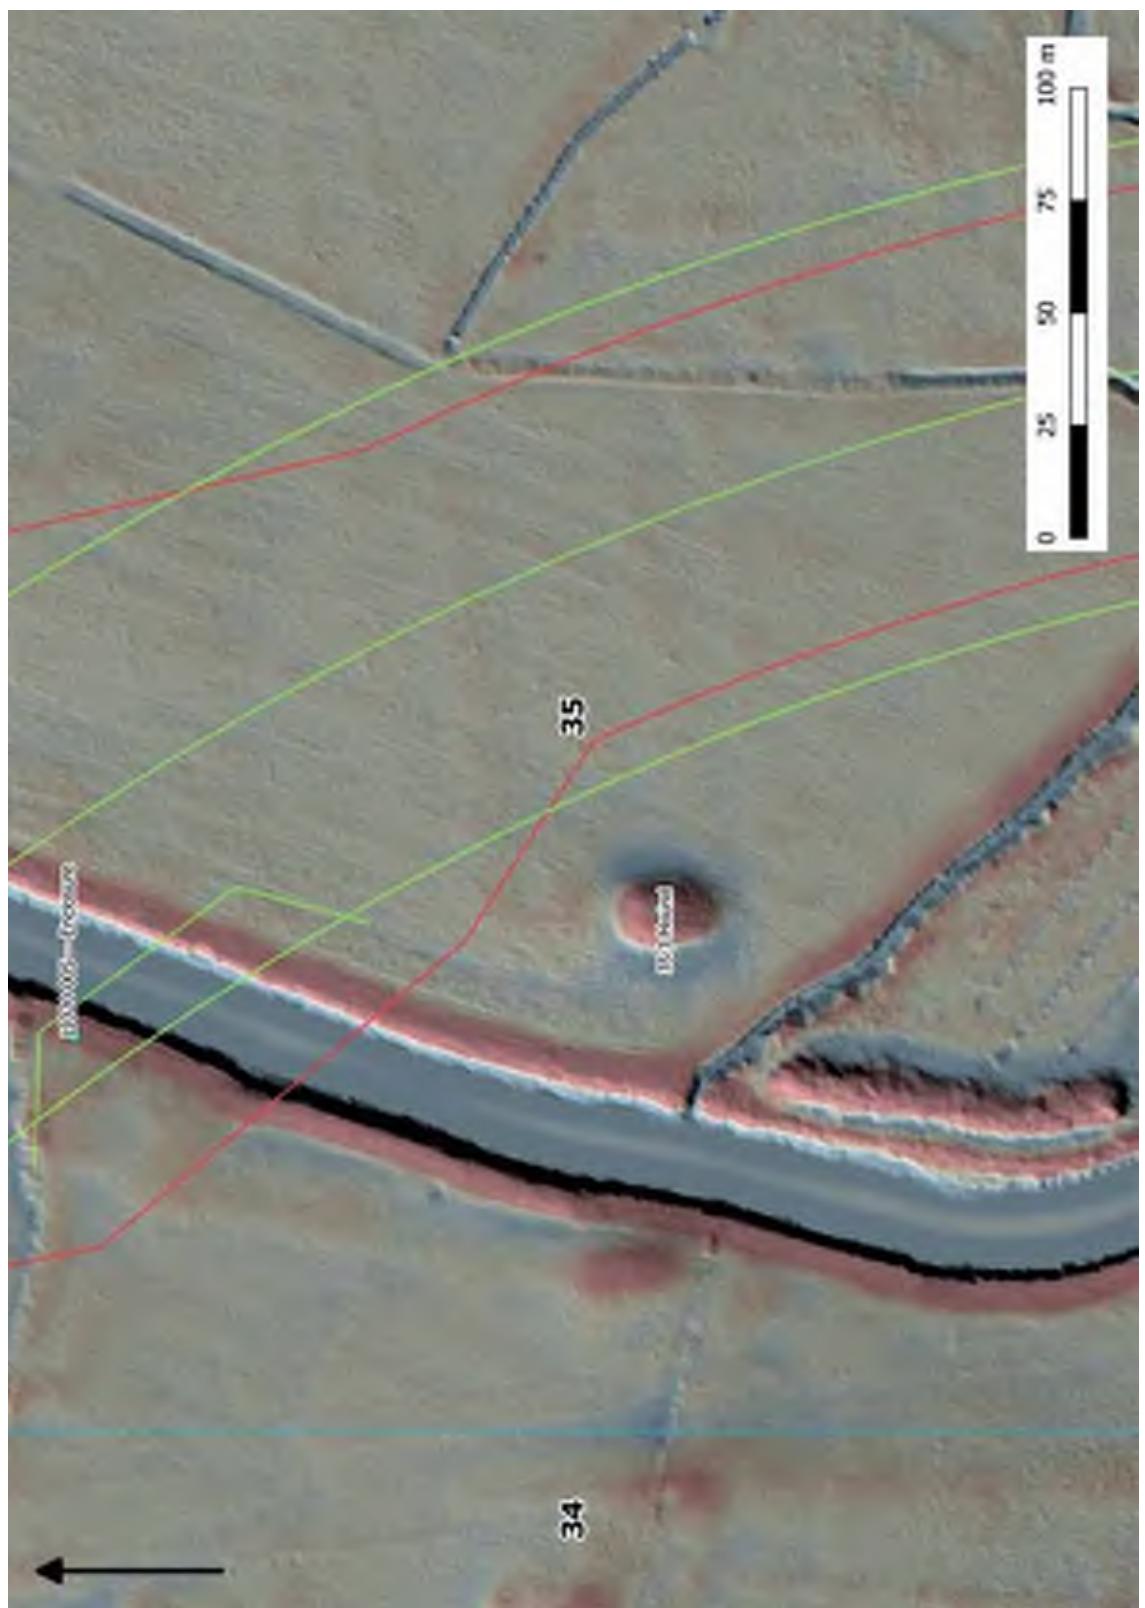

Feature 35.1. Possible enclosure; however, form suggests this might be a small quarry. 26 x 24 m. LRM over SVF image.

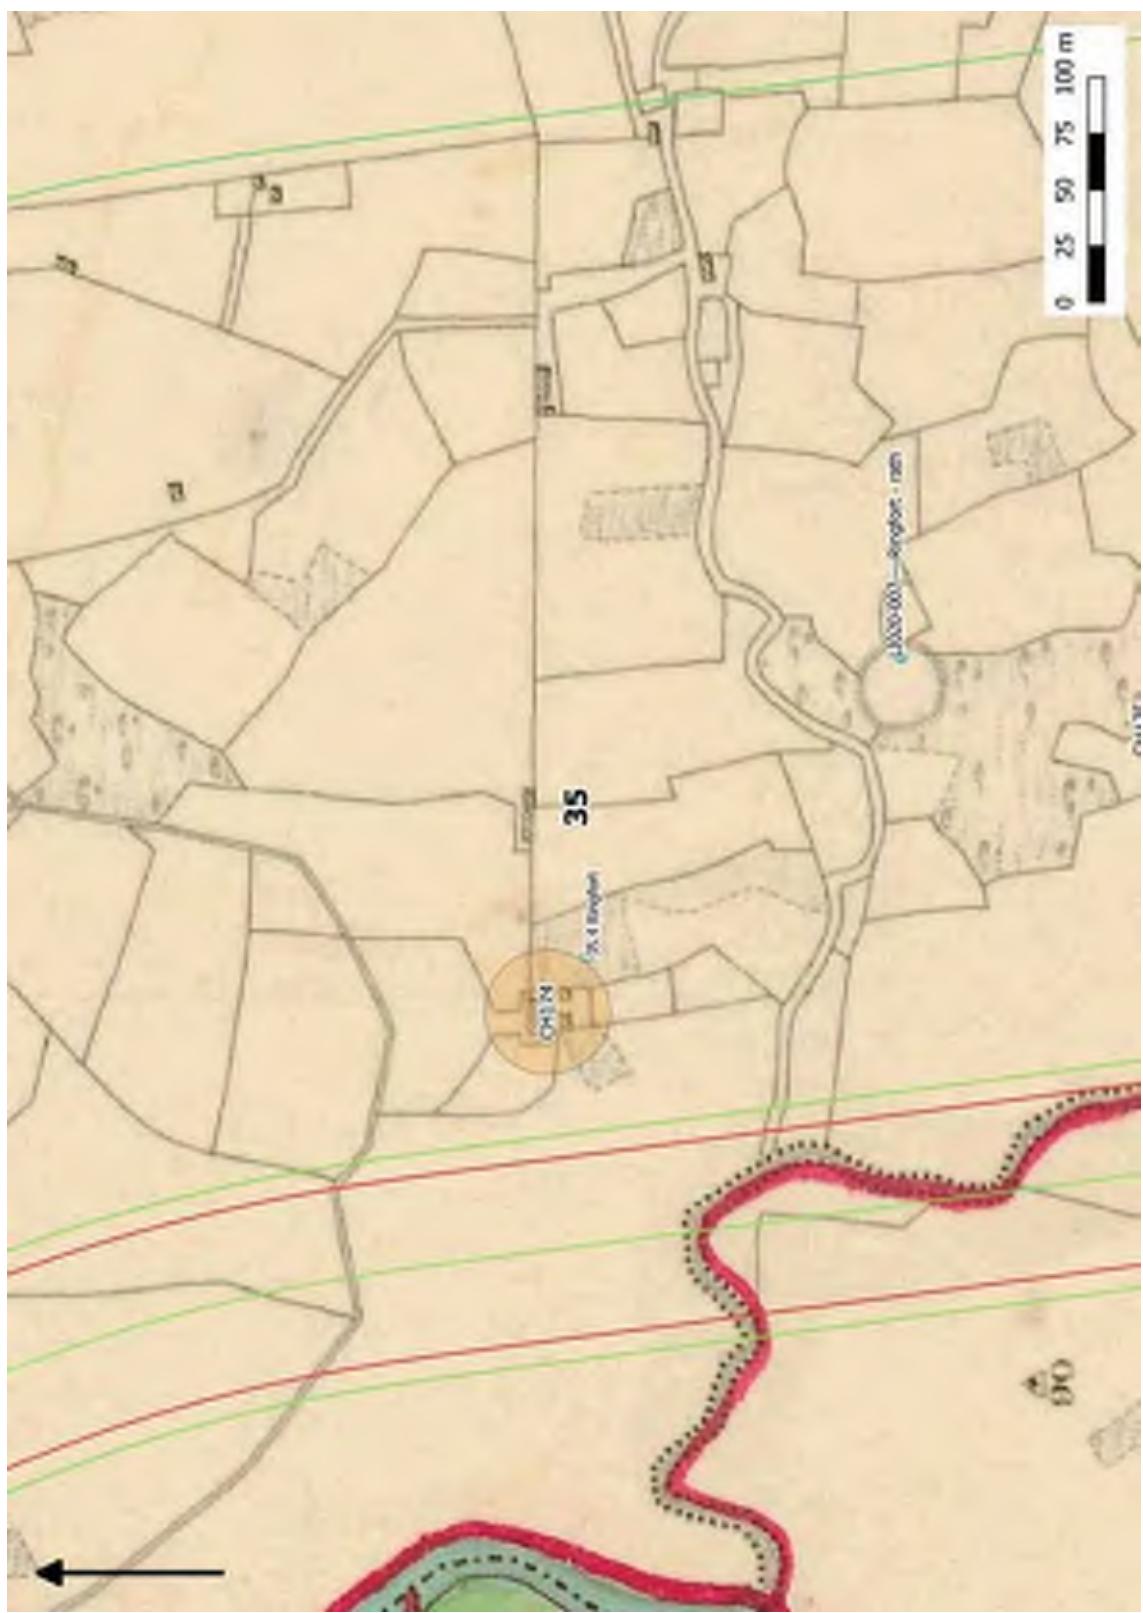

Feature 35.2. Rectangular platform, 44 x 56 m. Probably a natural rise with some modification. LRM over SVF image.

Feature 35.3. Tree-covered mound, 10 m diameter. Possibly landscape feature. Scheme orthophotography.

Feature 35.3. Tree-covered mound, 10 m diameter. Possibly landscape feature. LRM over 16-direction hillshade.

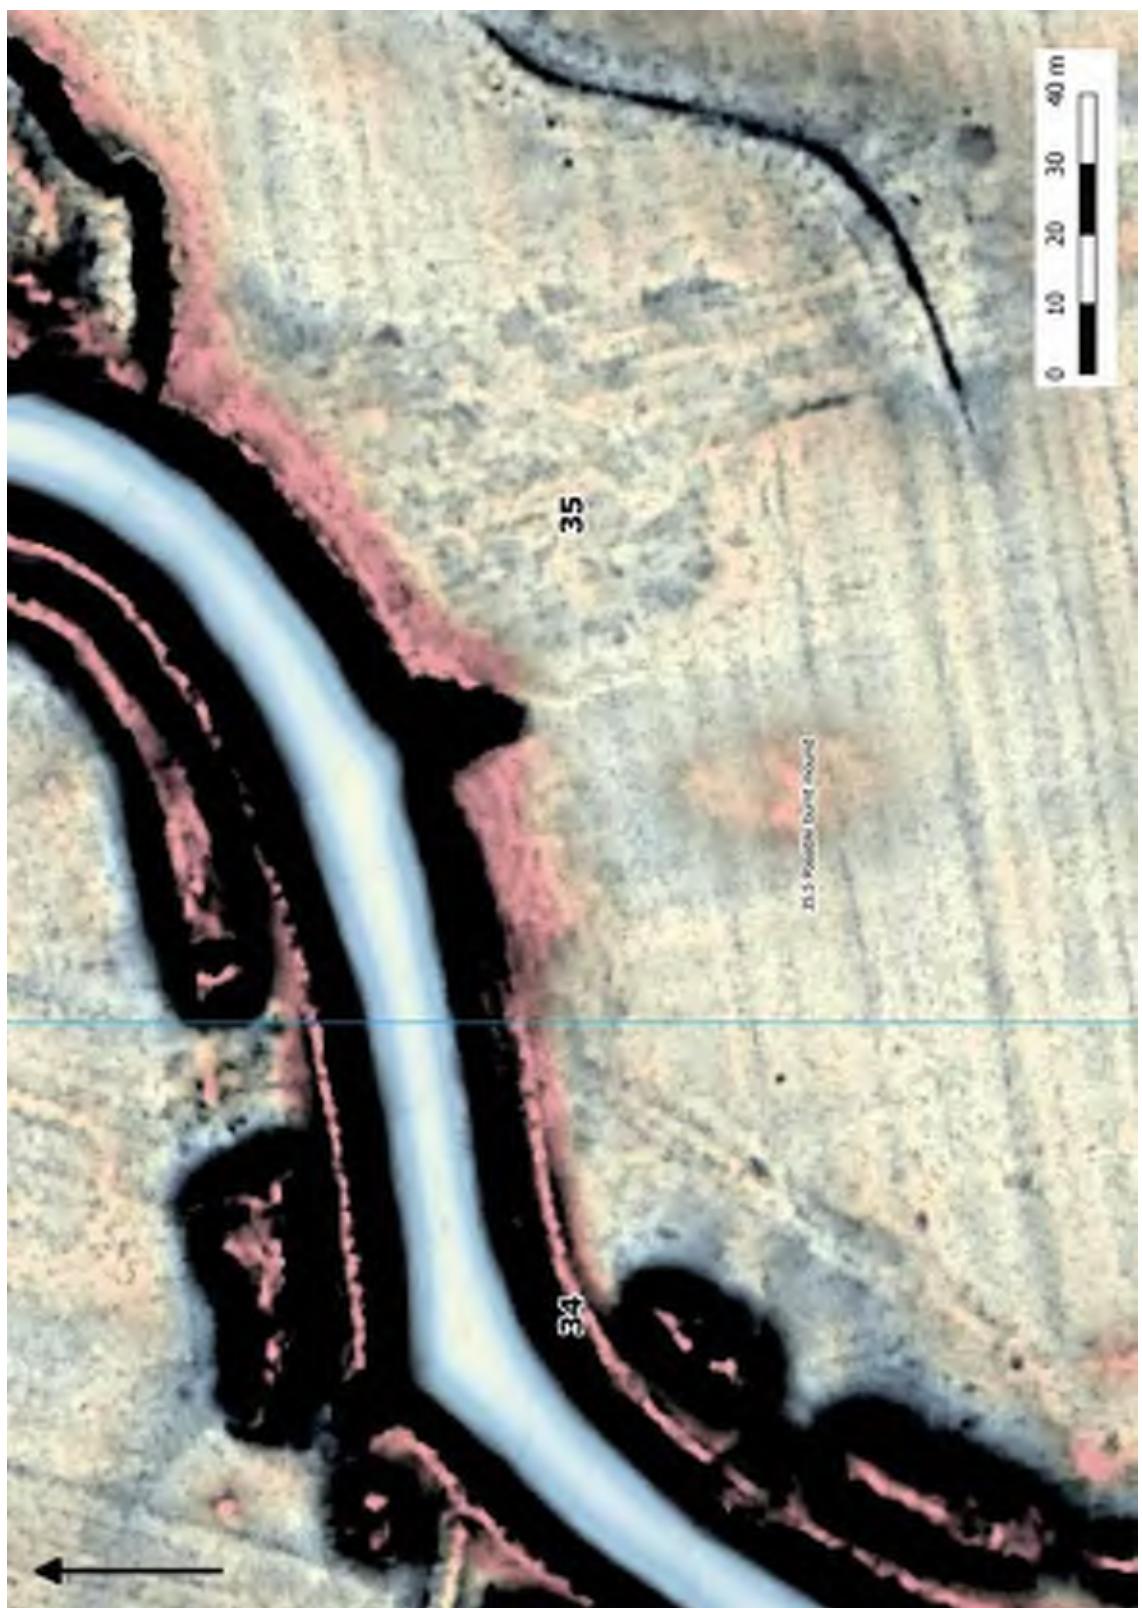

Feature 35.4. Ringfort, c. 27.5 x 24 m diameter. Under heavy woodland. 6 inch mapping

Feature 35.4. Ringfort, c. 27.5 x 24 m diameter. Under heavy woodland. Scheme orthophotography. Orange shading marks previously highlighted area CH174.

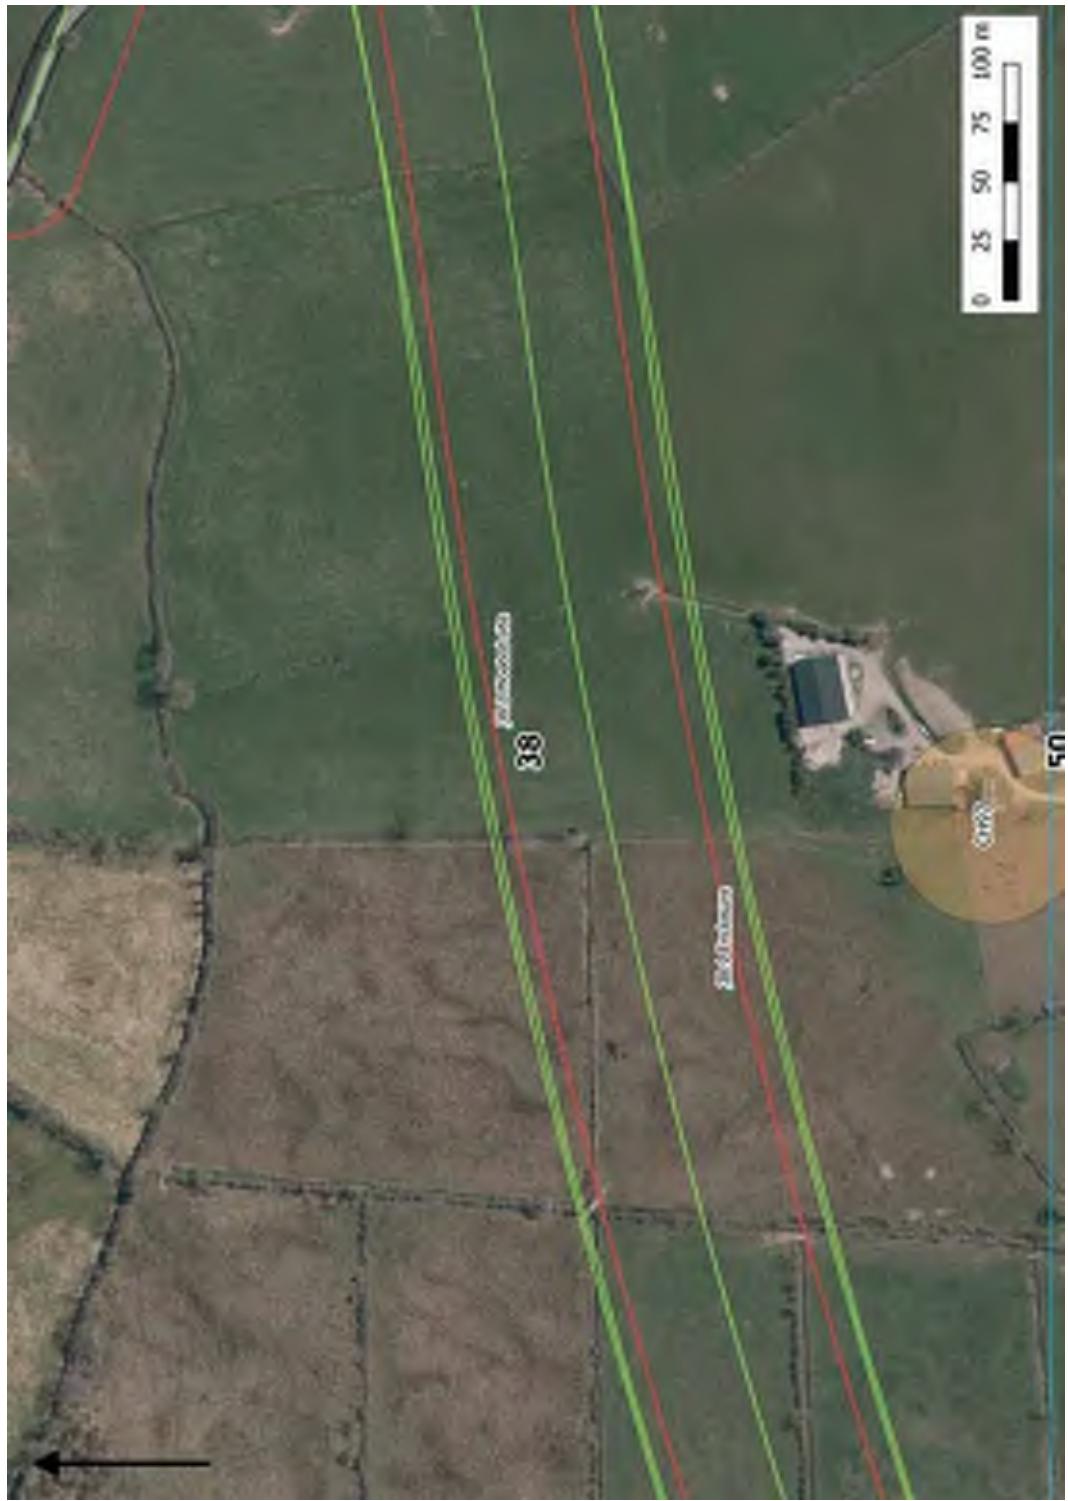

Feature 35.4. Ringfort, c. 24 m diameter. Under heavy woodland. LRM over SVF. Adjacent to, but not related to CH174.

Feature 35.5. Small, crescentic mound located adjacent to river, c. 13 m diameter with underlying spread N-S. LRM over SVF image.

Grid 38

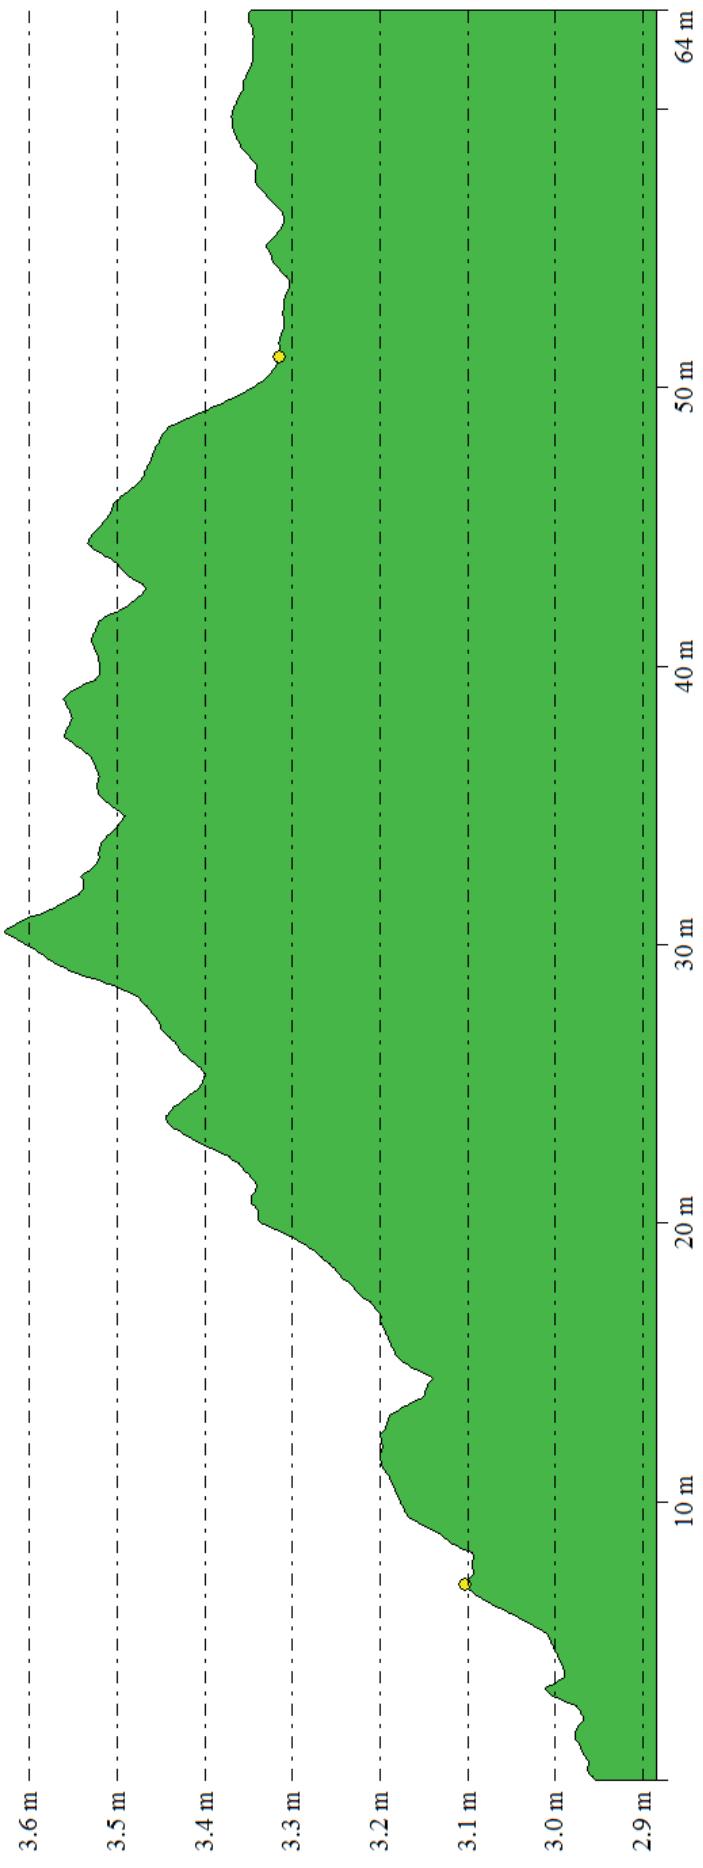

Feature 38.1. Possible enclosure. Curving bank to north with some disruption to south. 45 m diameter
Feature 38.2. Large moated site. 54 x 43m to exterior of ditches. Scheme orthophotography.

Feature 38.1. Possible enclosure. Curving bank to north with some disruption to south. 45 m diameter
Feature 38.2. Large moated site. 54 x 43m to exterior of ditches. LRM over SVF image.

To Pos: 544809.048, 646670.663

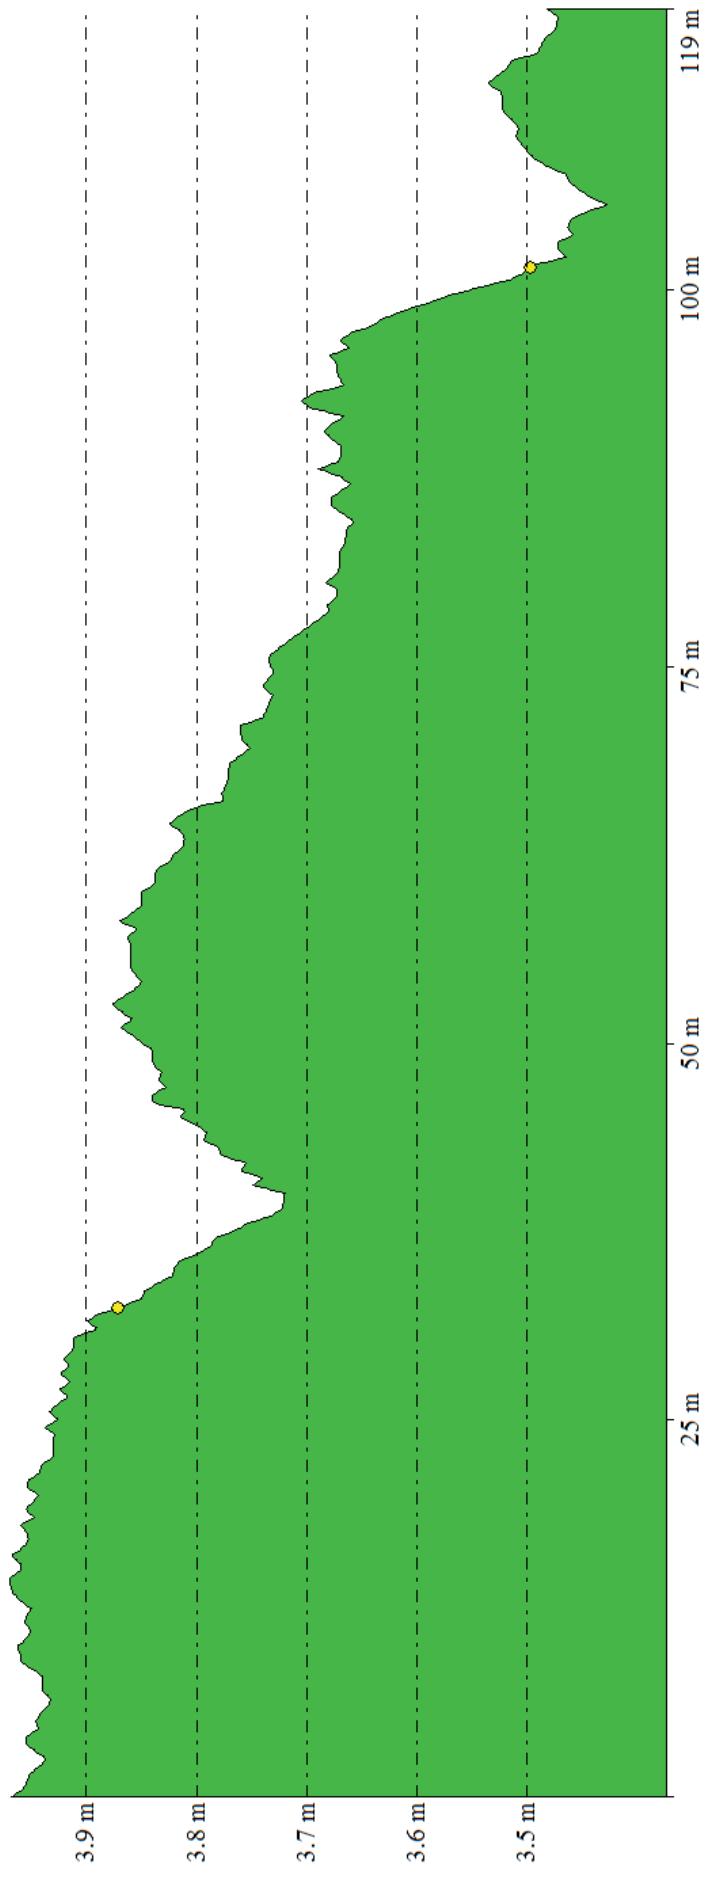

From Pos: 544764.282, 646715.722

To Pos: 538853.072, 642710.722

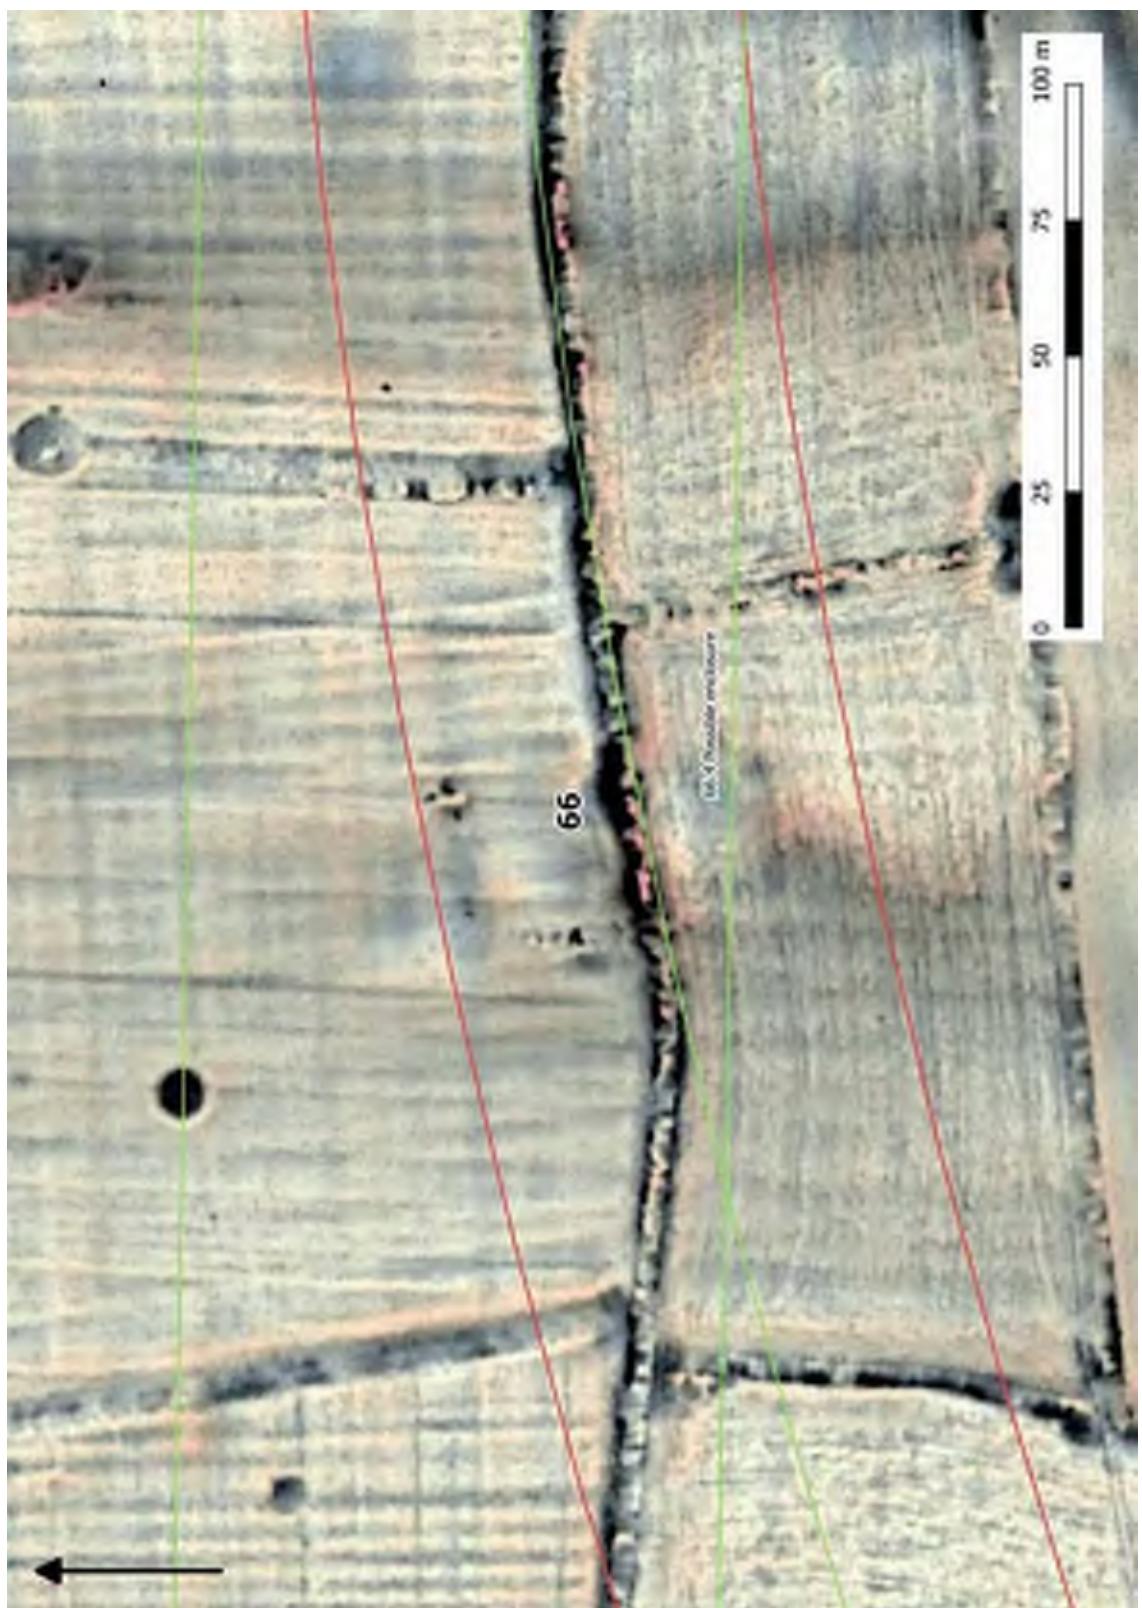

Feature 66.2. West-East profile of enclosure.

Feature 66.3. Small circular enclosure, probable ringfort, 19.4 m diameter LRM over SVF image.

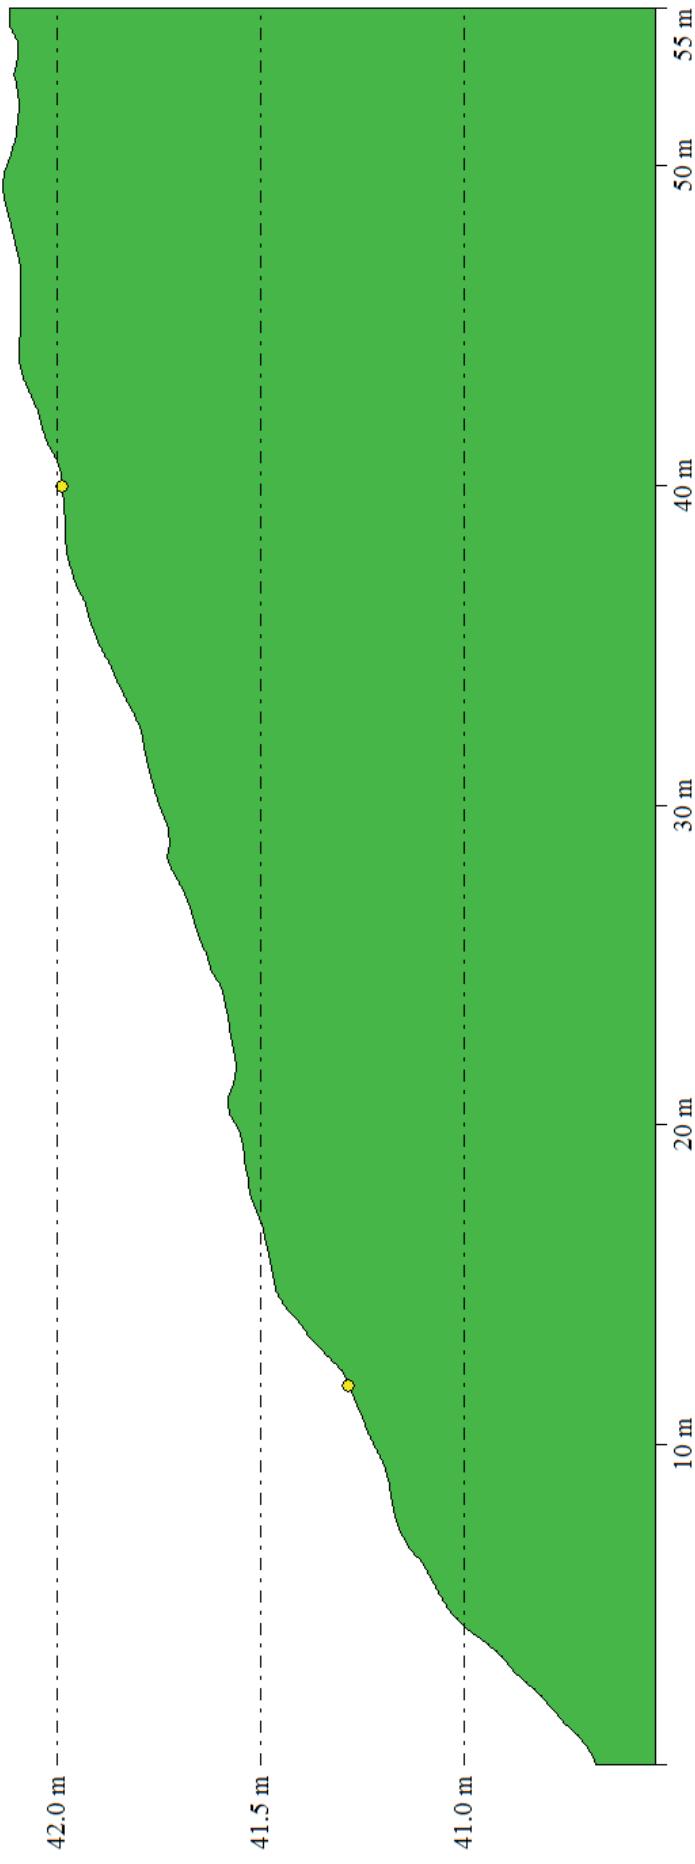

Feature 66.4. Small circular depression with possible ditch to SW. Possible quarry. 19.4 m diameter. Scheme orthophotography

Feature 66.4. Small circular depression with possible ditch to SW. Possible quarry. 19.4 m diameter. LRM over SVF image.

From Pos: 538946.445, 643256.697

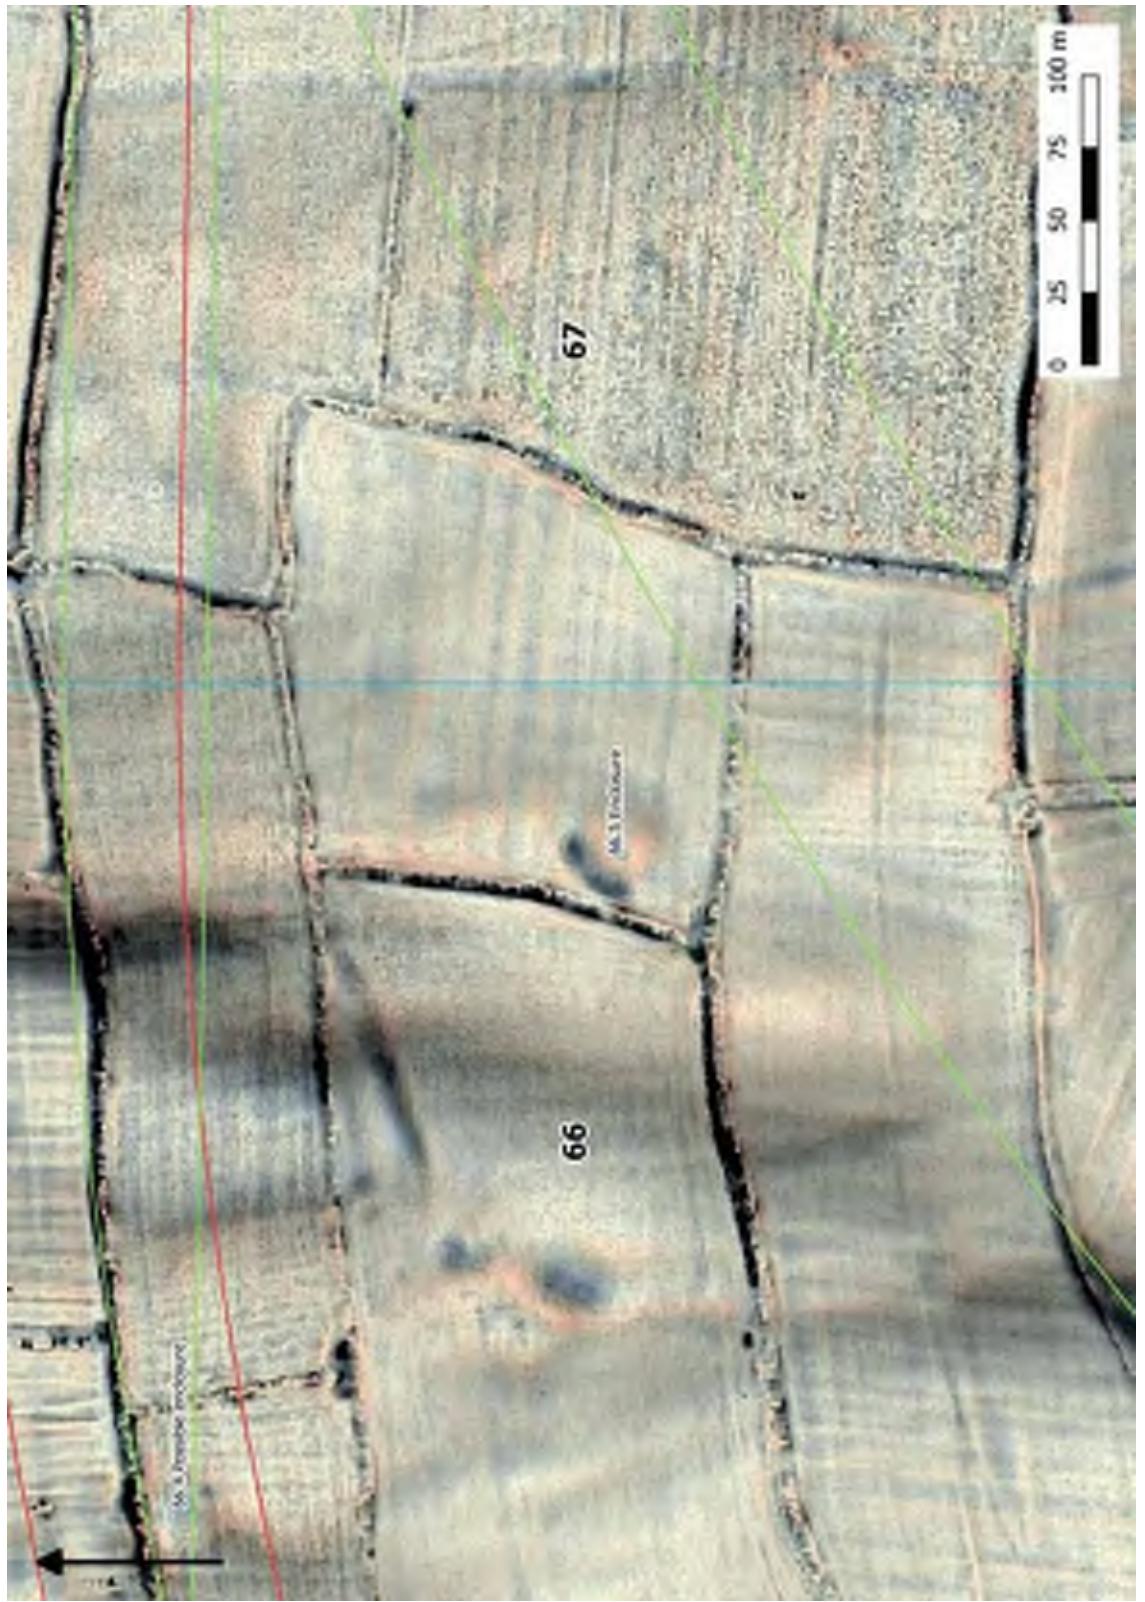

To Pos: 539001.306, 643257.136

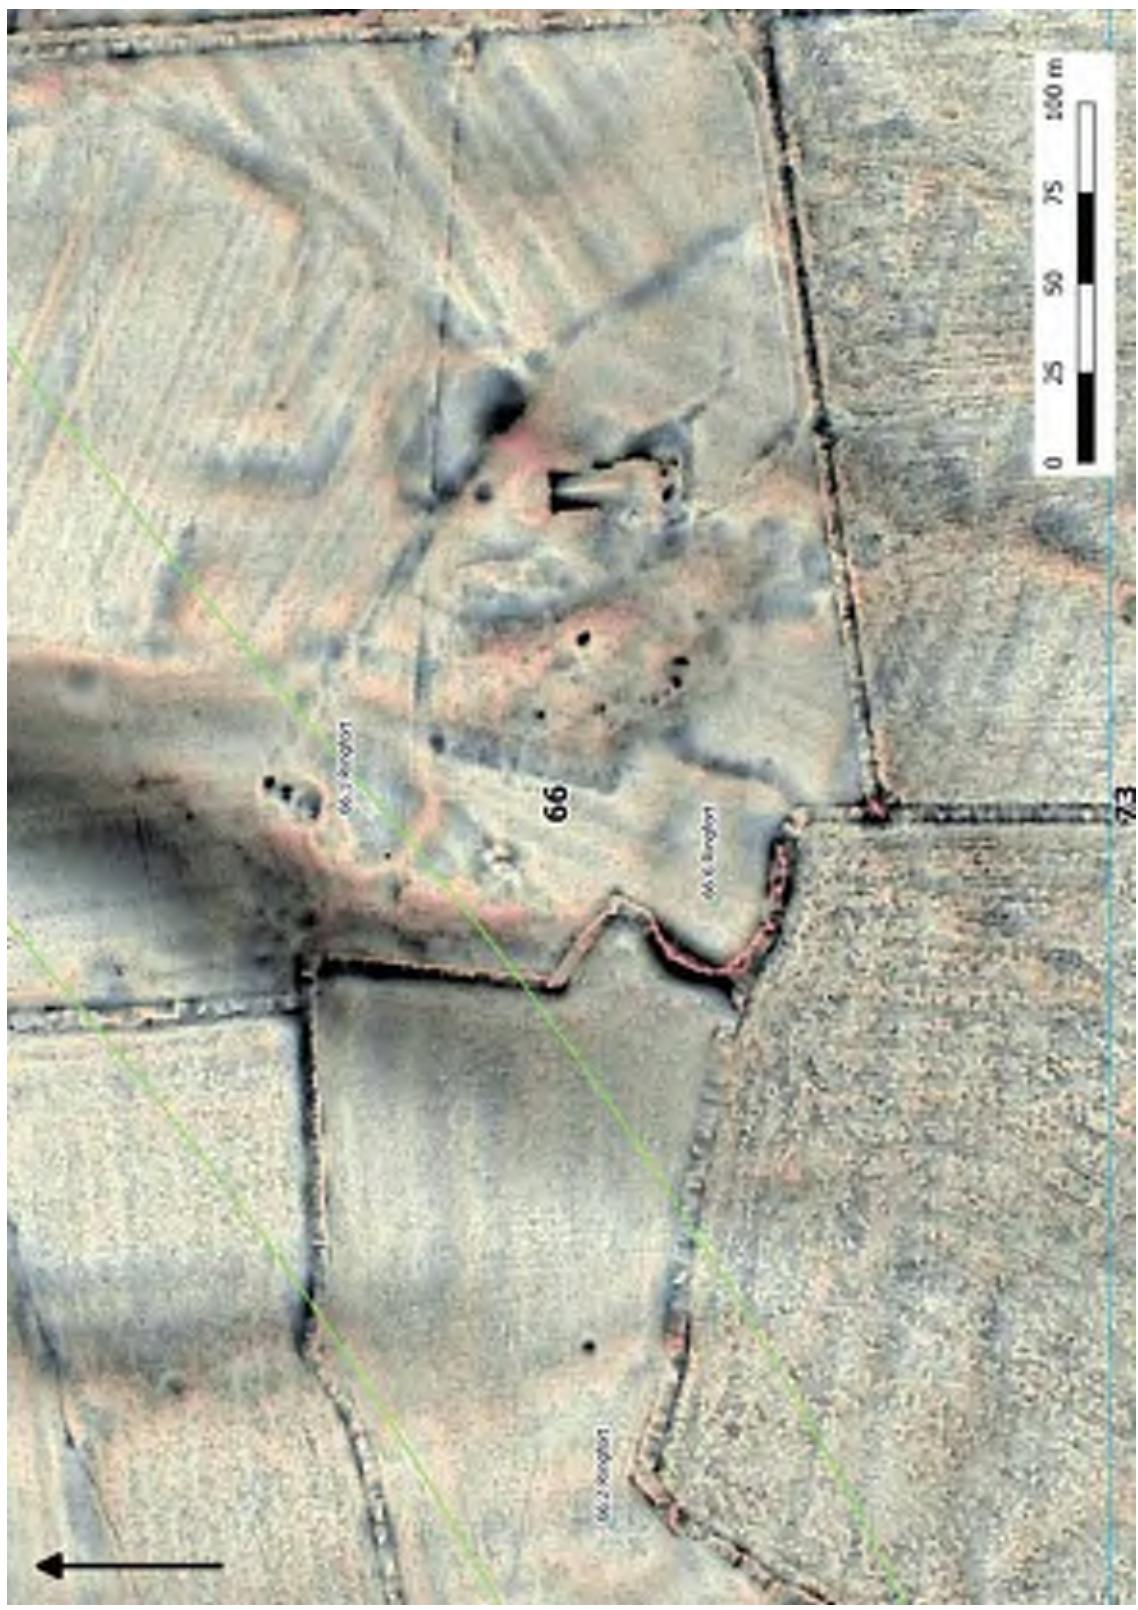

Feature 66.4. West-East profile of enclosure.

Feature 66.5. Low mound with ditch to northwest. Visible in orthophotography. 29 m diameter. Possibly natural mound with quarry. Scheme orthophotography.

Feature 66.5. Low mound with ditch to northwest. Visible in orthophotography. 29 m diameter. Possibly natural mound with quarry. LRM over SVF.

Feature 66.6, Ringfort, levelled to the east but well-preserved to the west. 46 x 30 m. LRM over SFV.

Grid 67

LJ020-120 (AH116). Very denuded, 40 m diameter, external fosse. Located to NW of RMP location at ITM 539563 642702. LRM over SVF image.

L1020-137 (AH115). No visible trace of the site remains. Scheme orthophotography..

L1020-137 (AH115). No visible trace of the site remains. LRM over SVF image.

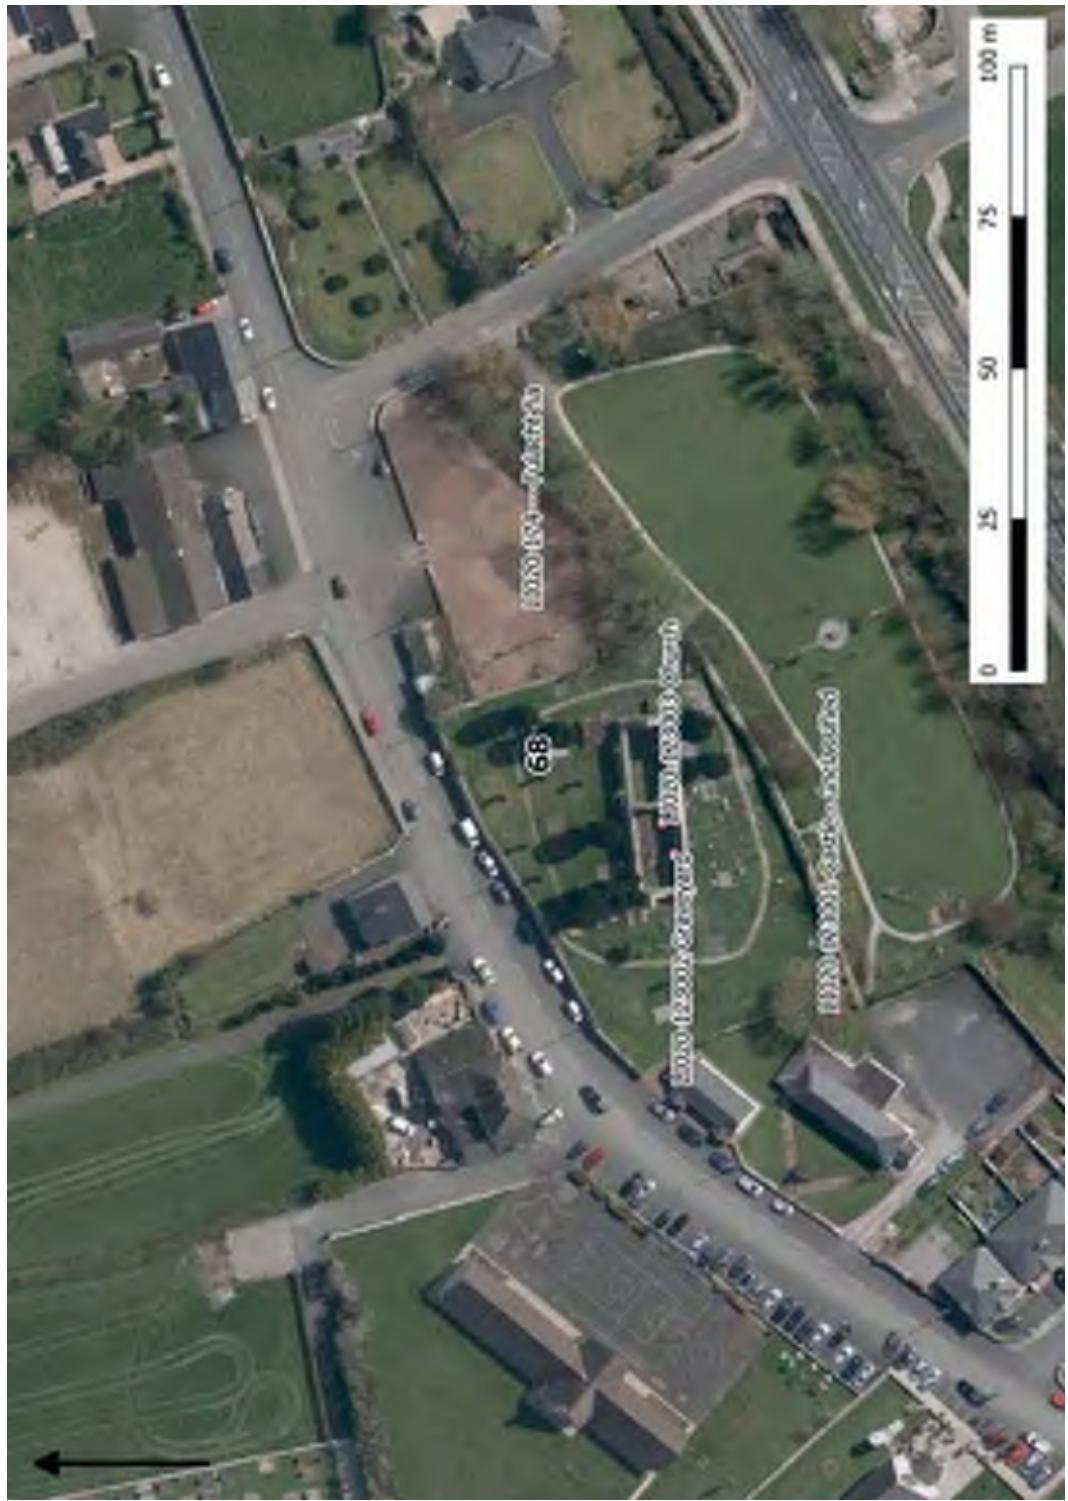

Grid 68

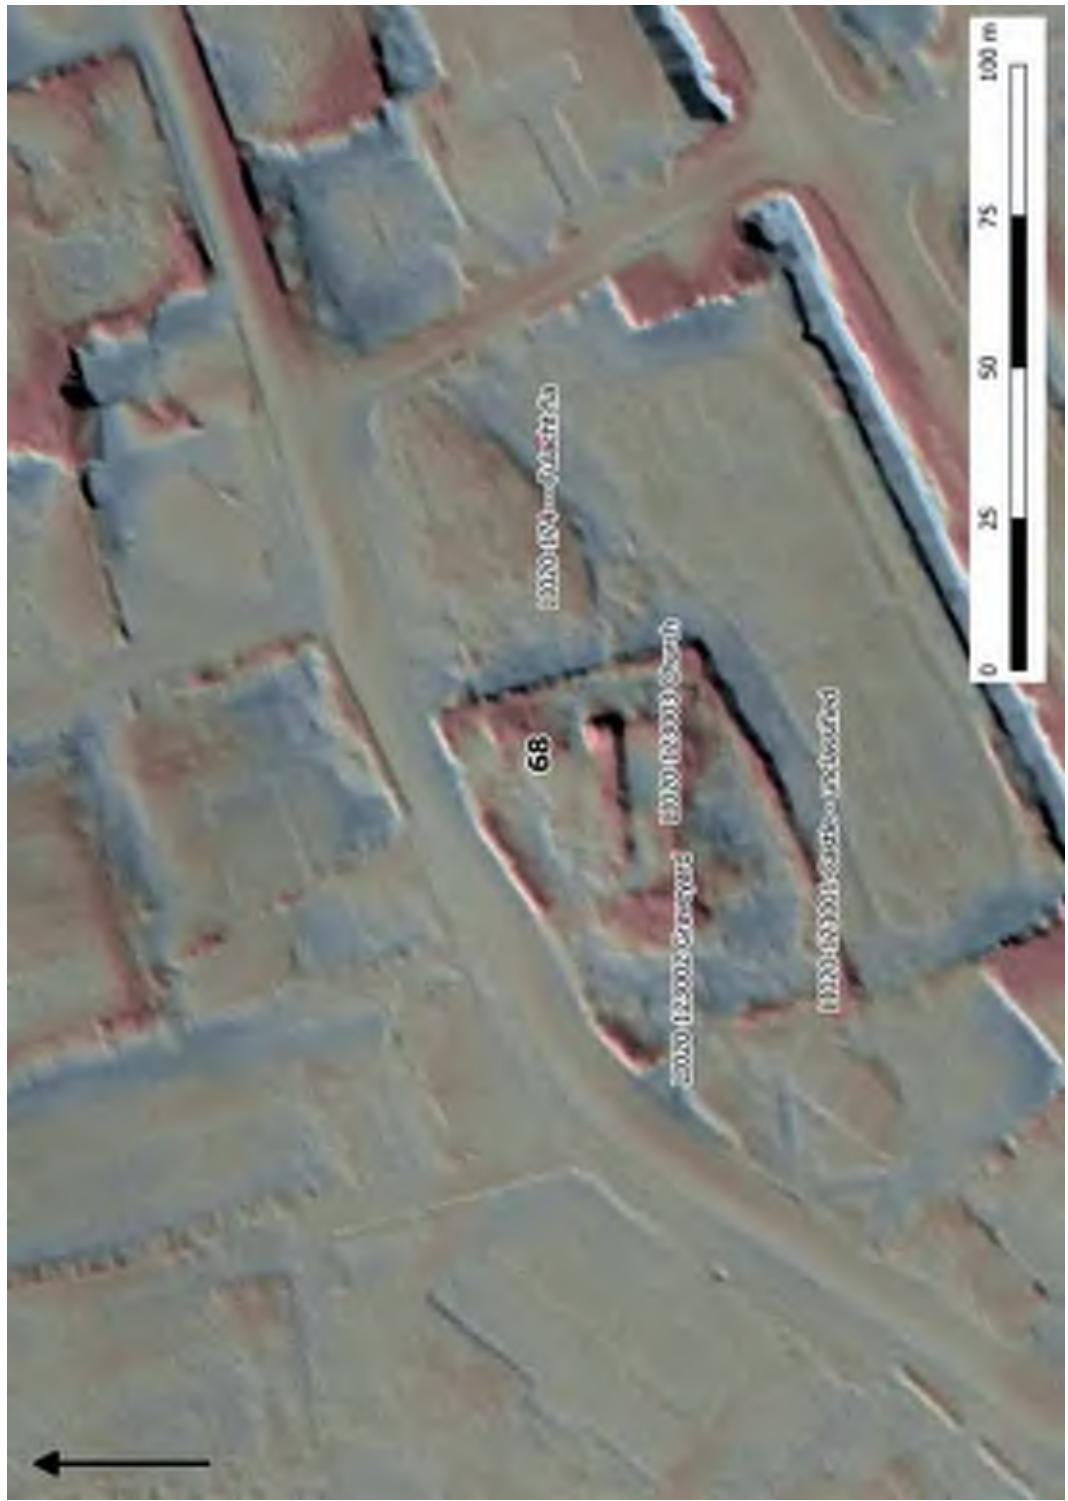

L1020-122. Ringfort, well-preserved under woodland to south, largely levelled to north. 31 m diameter. Scheme orthophotography.

LJ020-122. Ringfort, well-preserved under woodland to south, largely levelled to north. 31 m diameter. LRM over 16-direction hillshade.

L1020-123001. No obvious trace from aerial survey.
L1020-123002 and L1020-123003. Unsuitable for comment using airborne lidar.
L1020-174. No visible trace remains. Scheme orthophotography.

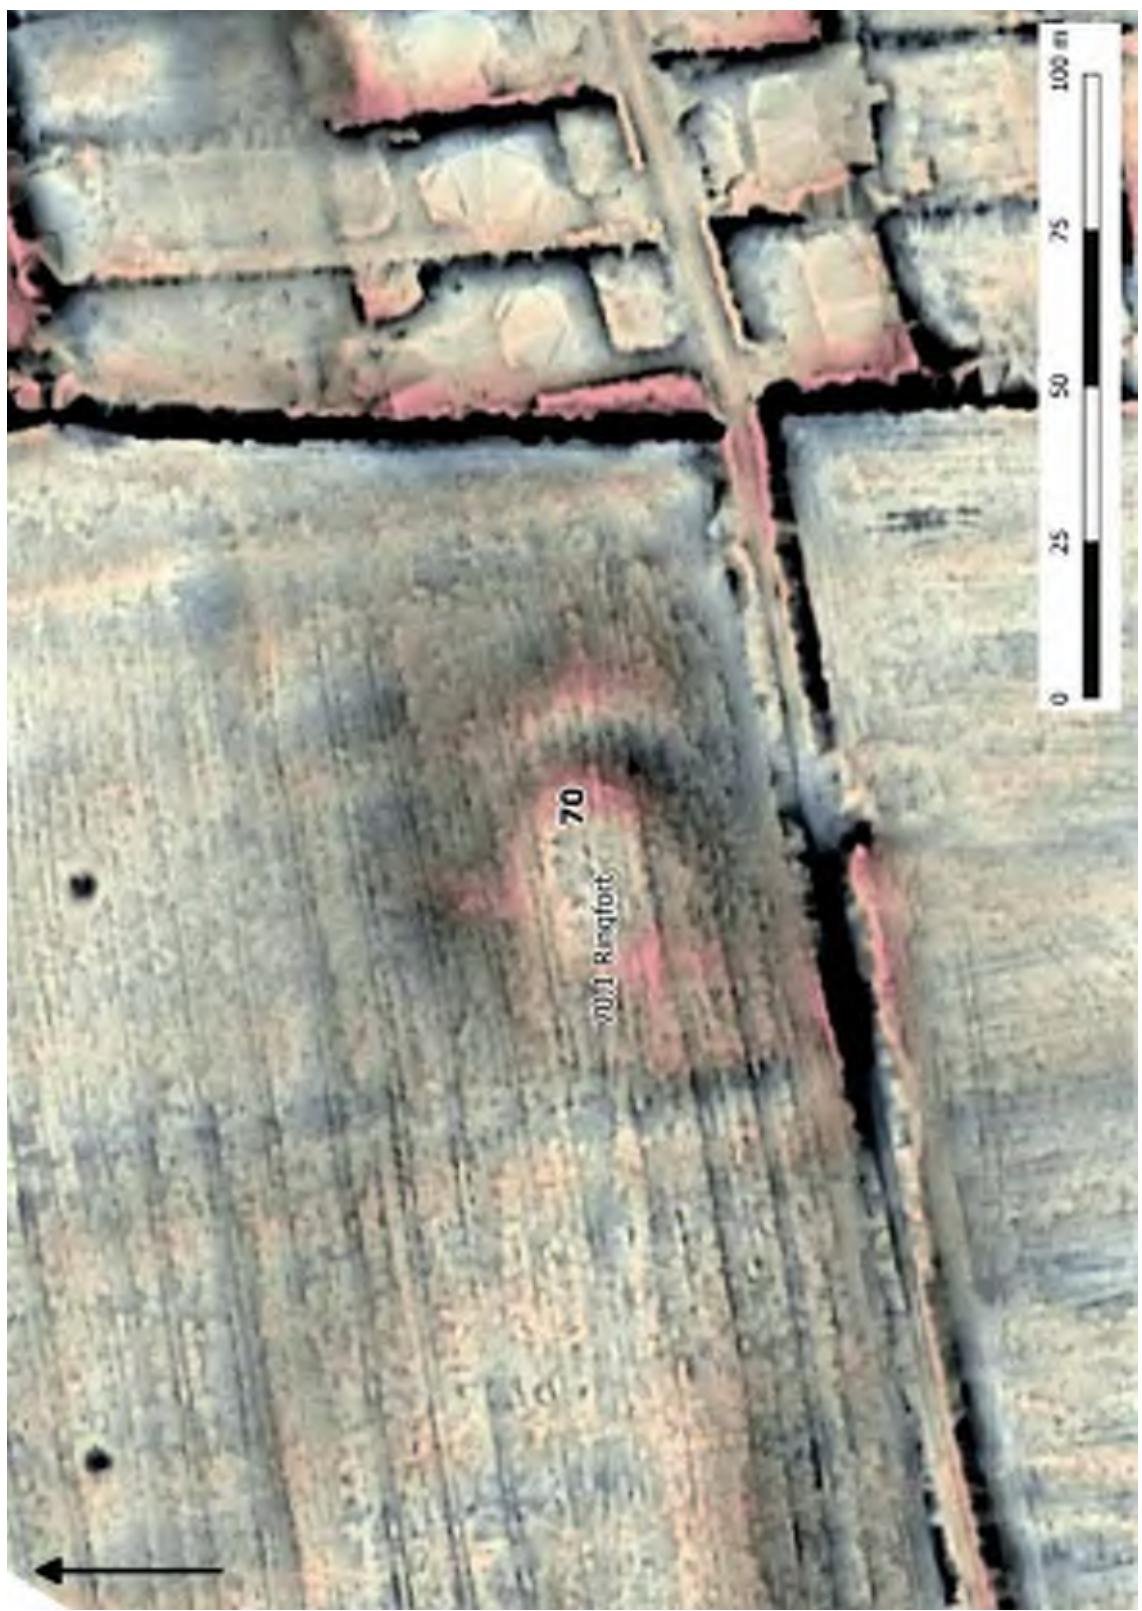

LJ020-123001. No obvious trace from aerial survey LRM over 16-direction hillshade.

LJ020-123002 and LJ020-123003. Unsuitable for comment using airborne lidar.

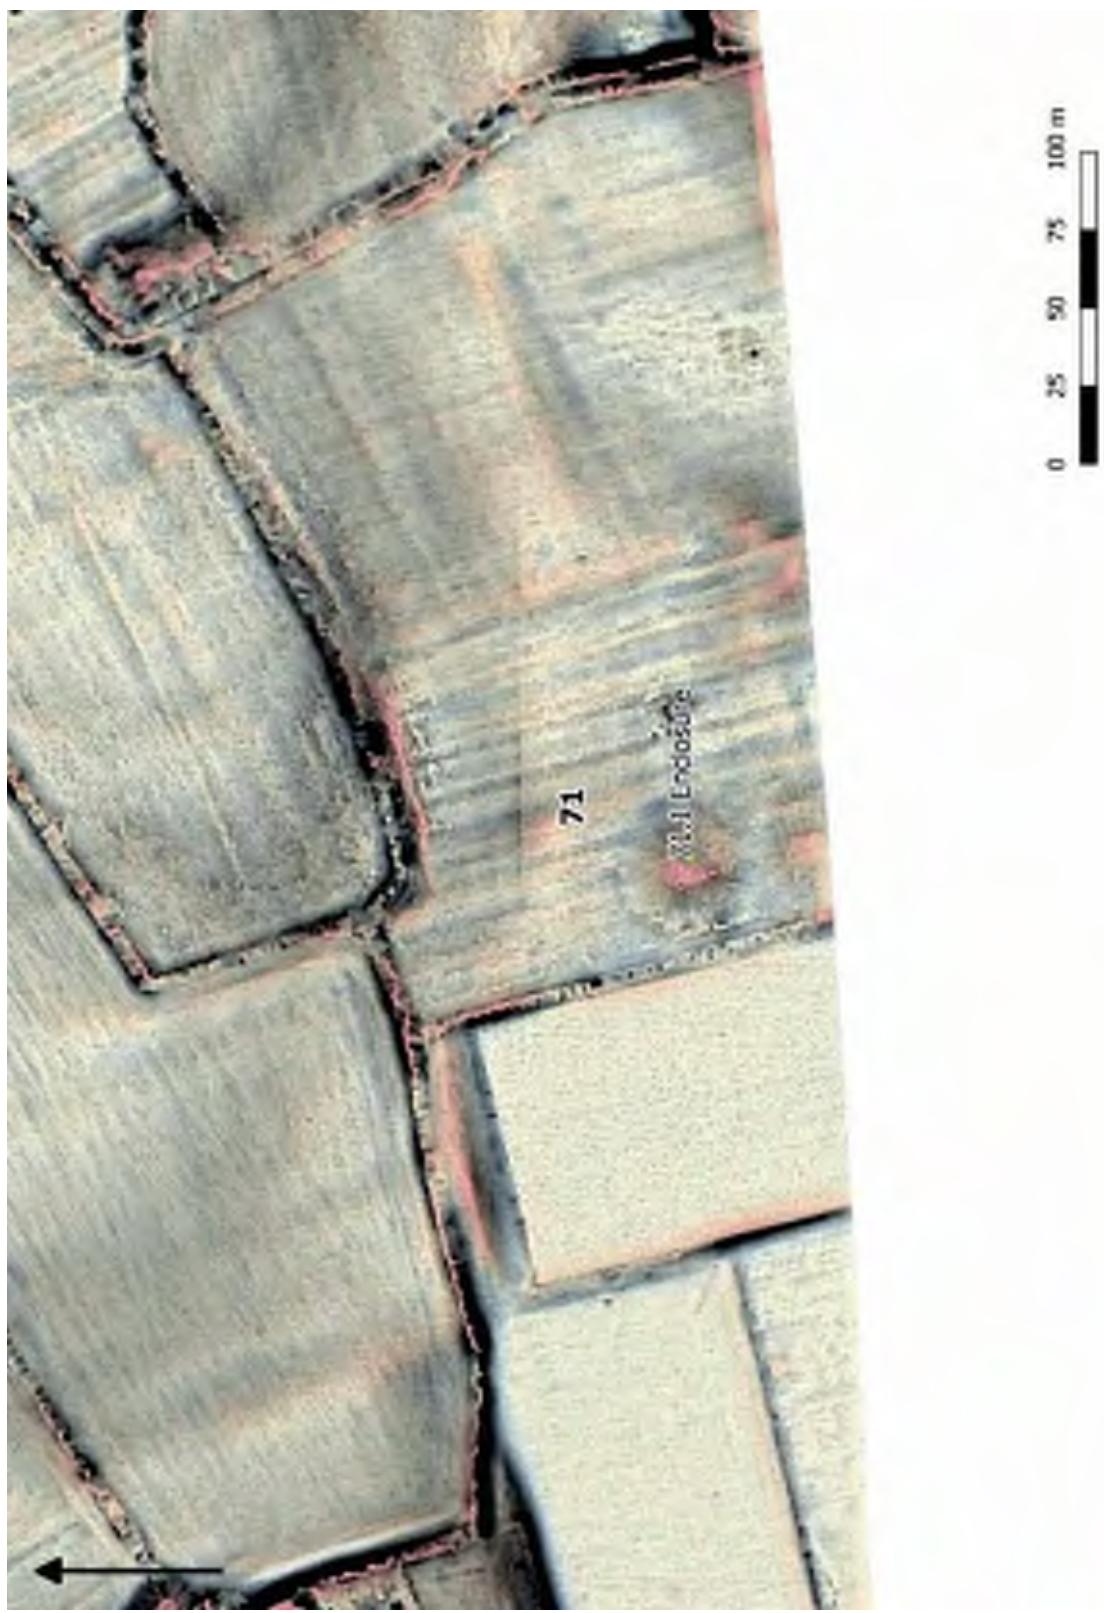

LJ020-174. No visible trace remains.

Grid 70

Feature 70.1. Small ringfort, 24 m diameter. LRM over SVF image.

Grid 71

Feature 71.1. Small enclosure with central mound area. 44 m diameter. LRM over SVF image.

Grid 72

L1029-034. Largely levelled. Section of northern bank is all that remains. Original diameter c. 23 m but already marked as damaged in 6-inch series.

L1029-034. Largely levelled. Section of northern bank is all that remains. Scheme orthophotography. Original diameter c. 23 m but already marked as damaged in 6-inch series.

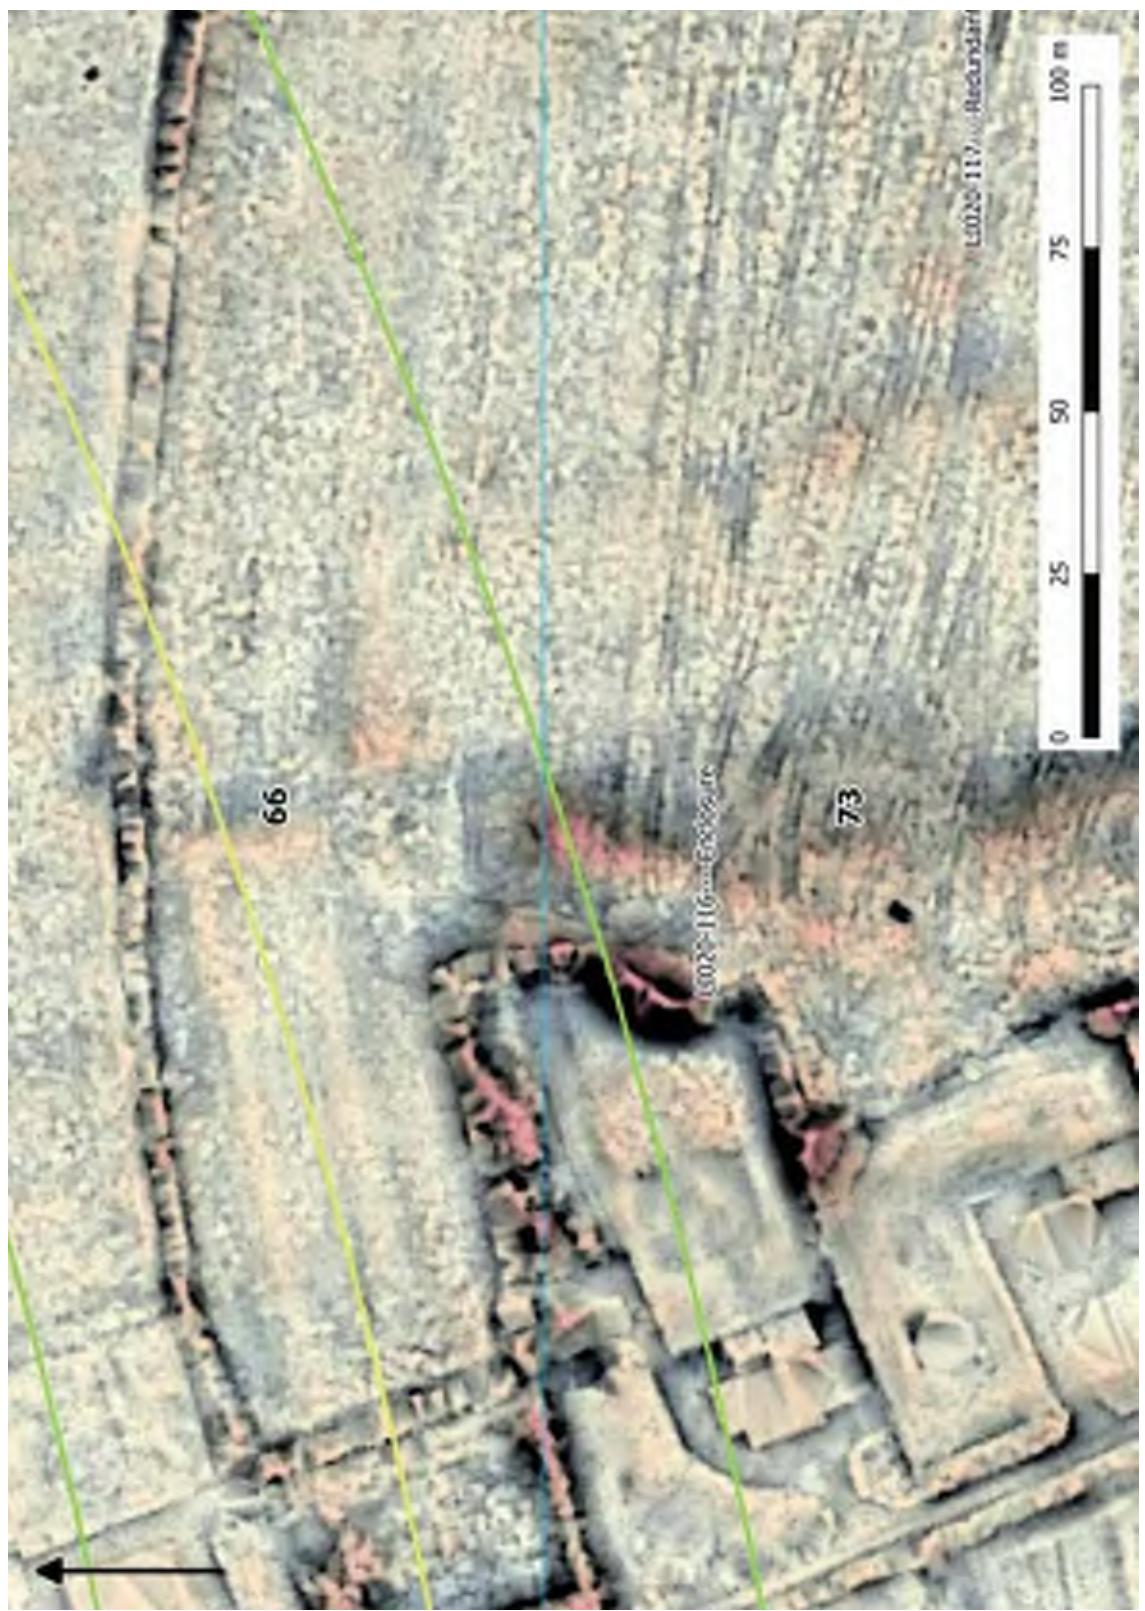

L1029-034. Largely levelled. Section of northern bank is all that remains. Scheme orthophotography LRM over SVF image.

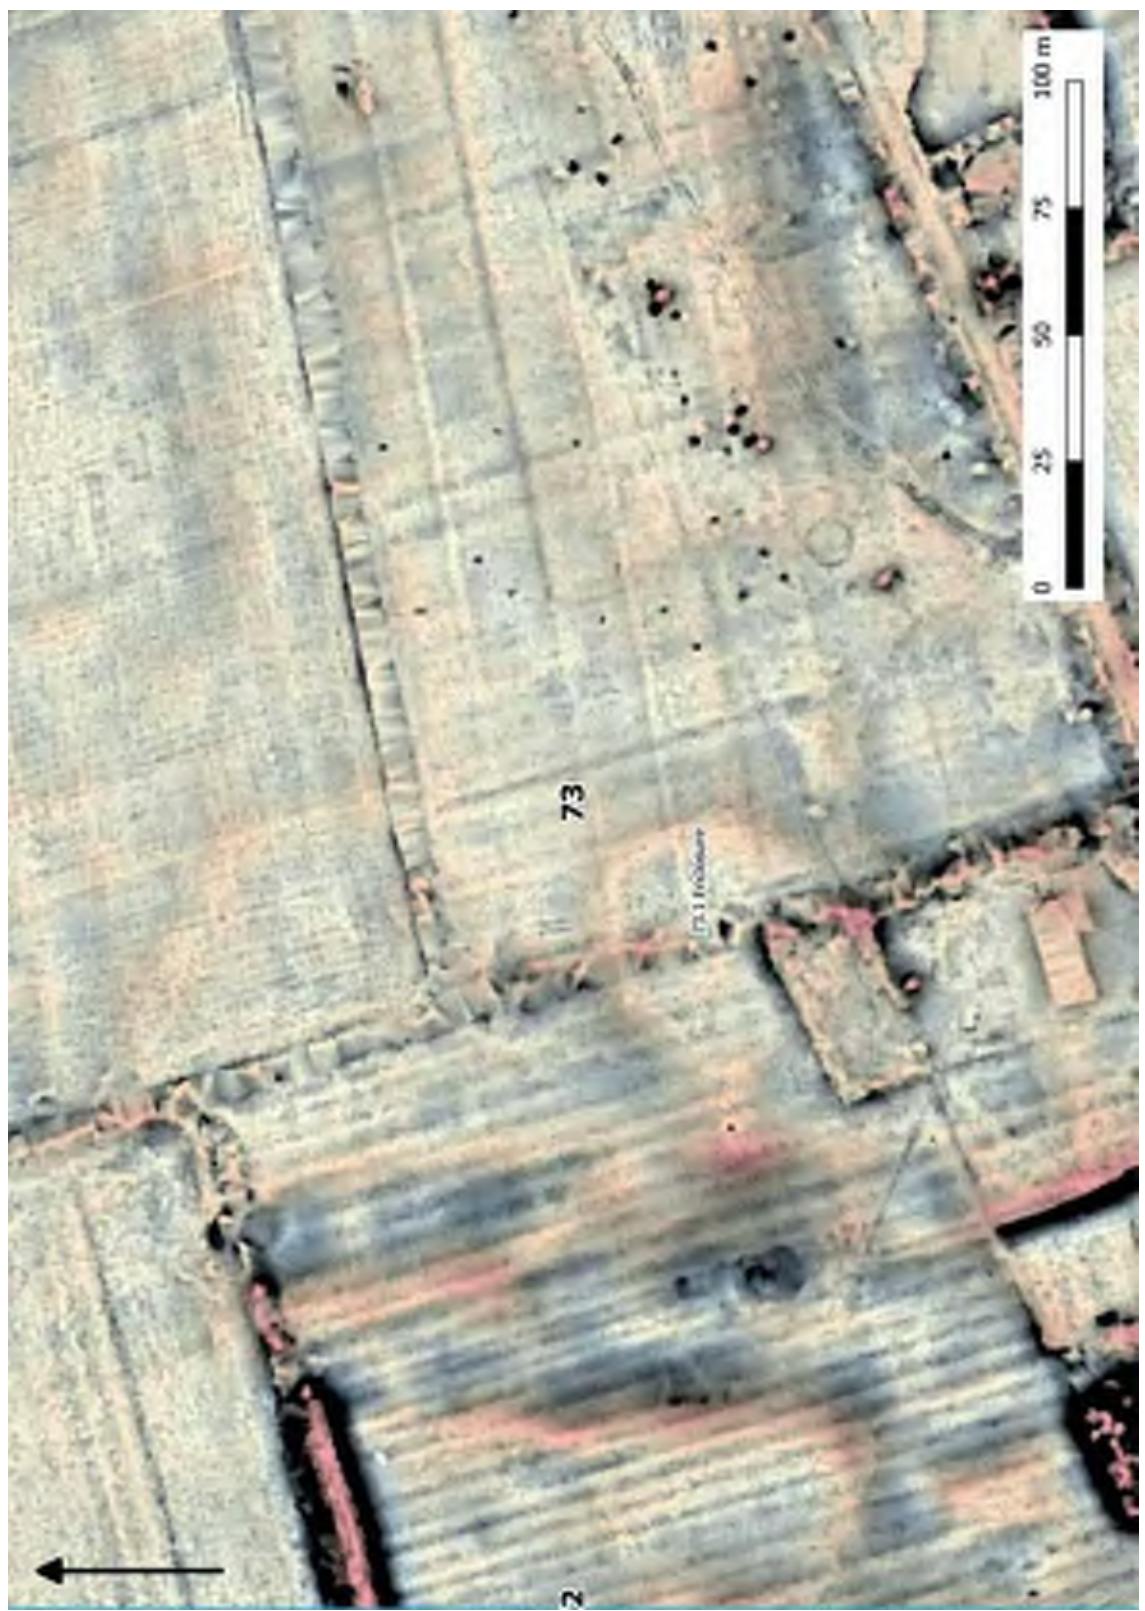

LJ029-037 (AH112). Substantially levelled save for northern section. Diameter c. 37 x 34 m. LRM over SVF image.

Grid 73

LJ020-116 (AH113). No obvious trace from aerial survey. LRM over SVF image.

Feature 73.1. Possible plectrum-shaped enclosure, partially overbuilt to SW by modern farmyard. 43 m diameter. 43 m diameter. LRM over SVF image.

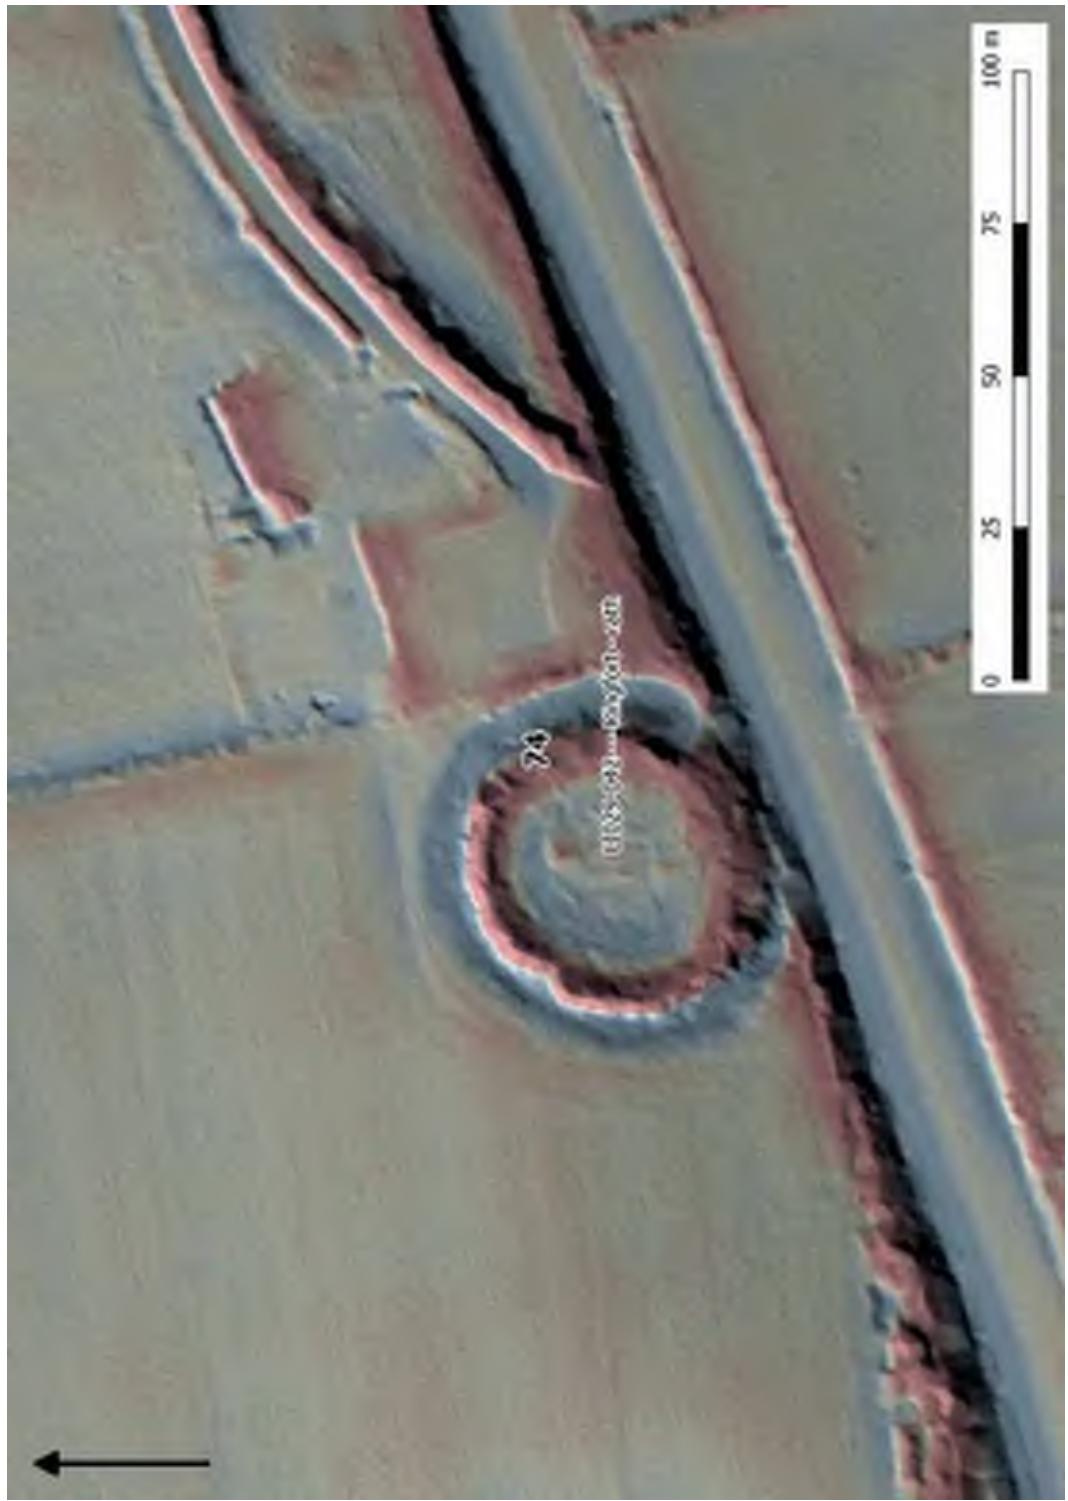

Feature 73.2. Probable ringfort located on low E-W ridge. Largely levelled but broad external fosse still visible. Diameter 39.8 m. LRM over SVF.

Grid 74

L1029-042. Substantial ringfort with broad external fosse. Possible entrance in NW. Interior area sunken, 42 m diameter. External diameter 49 m. Scheme orthophotography.

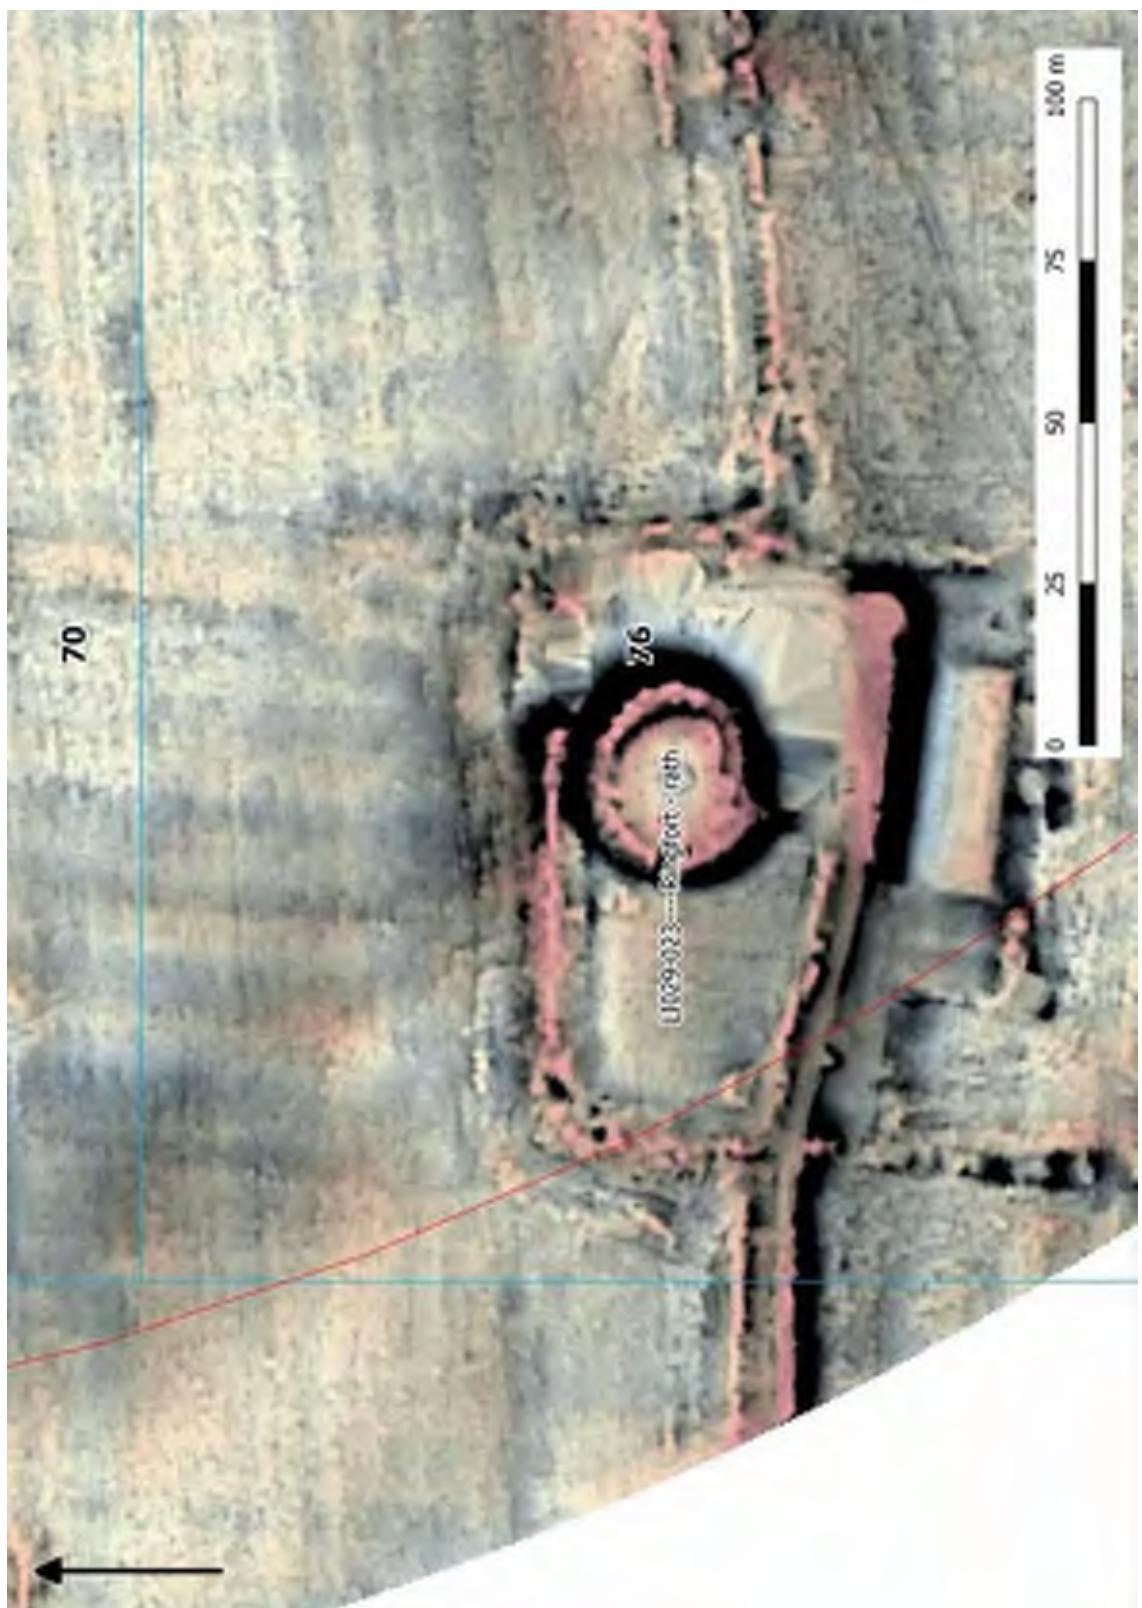

LJ029-042. Substantial ringfort with broad external fosse. Possible entrance in NW. Interior area sunken, 42 m diameter. External diameter 49 m. LRM over 16-direction hillshade.

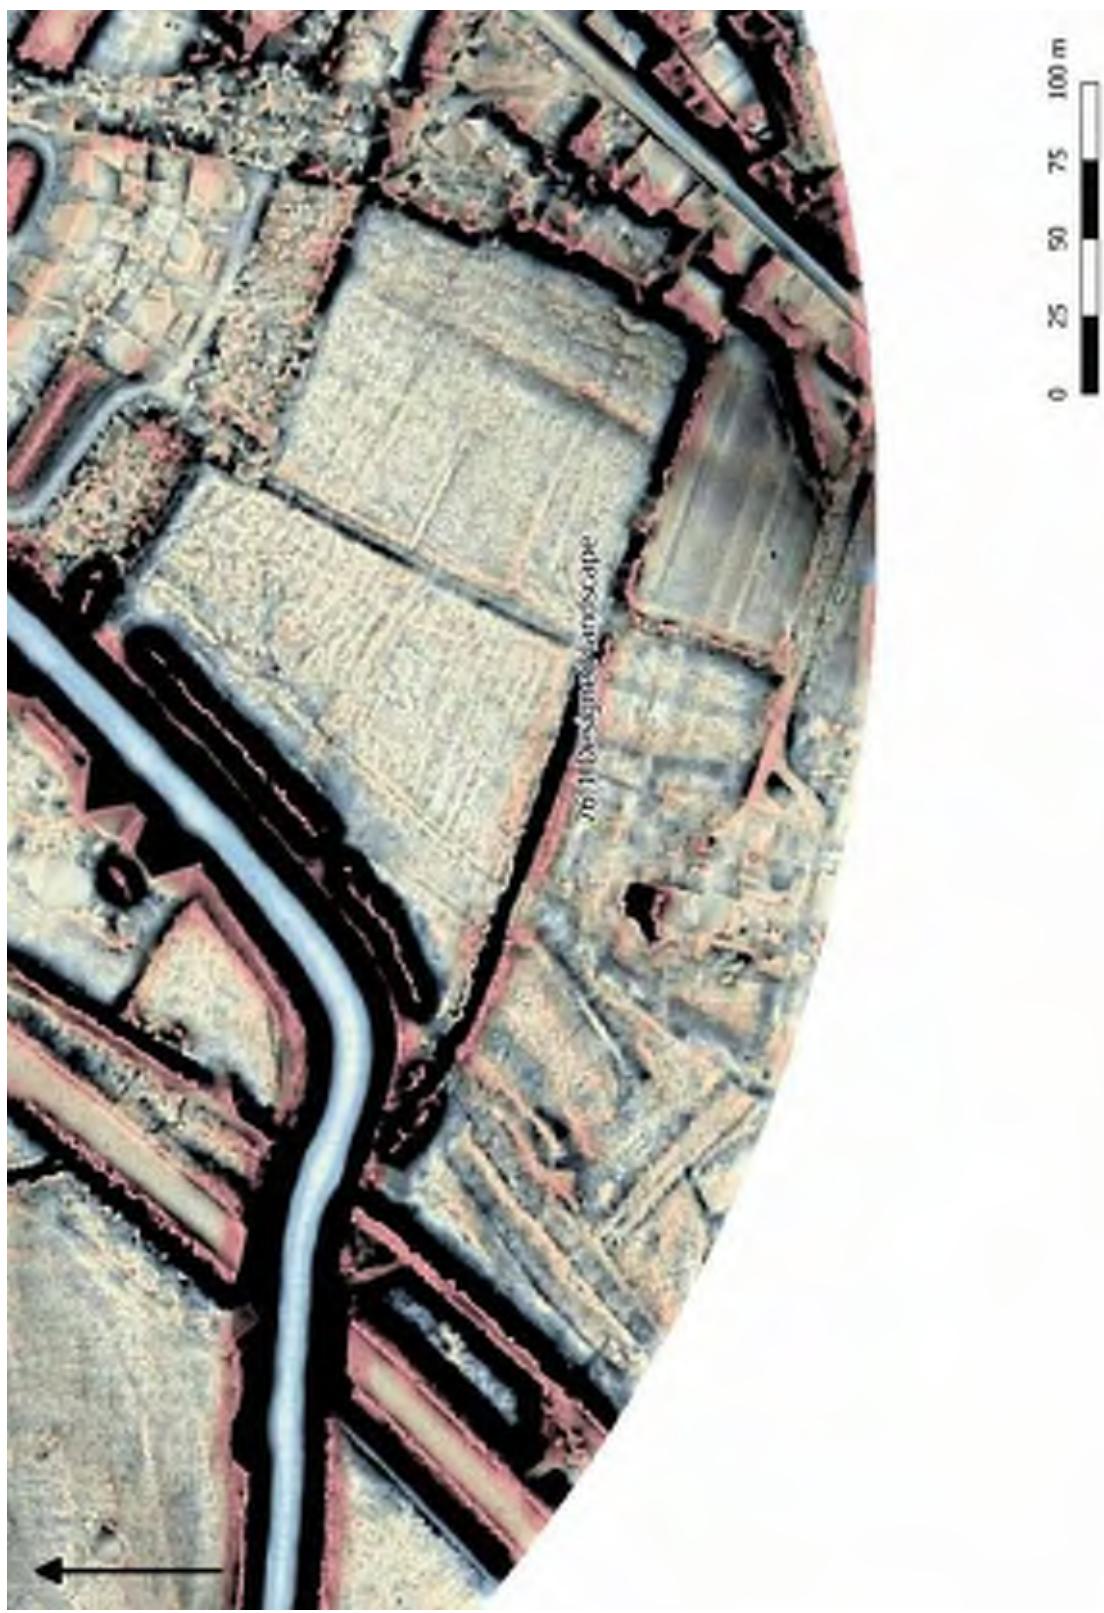

Grid 76

L1029-023. Small ringfort, 28 m diameter, apparently with internal enclosure. Modified by garden feature. Red line denotes limit of 1km corridor. Scheme orthophotography.

U029-023. Small ringfort, 28 m diameter, apparently with internal enclosure. Modified by garden feature. Red line denotes limit of 1km corridor LRM over SVF image

Feature 76.1. Complex of ditched features, probably part of the grounds of Castlematrix. Covering in excess of 1.7 ha. LRM over SVF image. See also Fig. 19.
